<b>Introduction</b>	<i>page</i> 1
<b>1 The Lévy Laplacian</b>	05
1.1 Definition of the infinite-dimensional Laplacian	05
1.2 Examples of Laplacians for functions on infinite-dimensional spaces	09
1.3 Gaussian measures	13
<b>2 Lévy–Laplace operators</b>	22
2.1 Infinite-dimensional orthogonal polynomials	23
2.2 The second-order differential operators generated by the Lévy Laplacian	30
2.3 Differential operators of arbitrary order generated by the Lévy Laplacian	33
<b>3 Symmetric Lévy–Laplace operator</b>	40
3.1 The symmetrized Lévy Laplacian on functions from the domain of definition of the Lévy–Laplace operator	40
3.2 The Lévy Laplacian on functions from the domain of definition of the symmetrized Lévy–Laplace operator	44
3.3 Self-adjointness of the non-symmetrized Lévy–Laplace operator	48
<b>4 Harmonic functions of infinitely many variables</b>	53
4.1 Arbitrary second-order derivatives	54
4.2 Orthogonal and stochastically independent second-order derivatives	59
4.3 Translationally non-positive case	64

vi	<i>Contents</i>	
<b>5</b>	<b>Linear elliptic and parabolic equations with Lévy Laplacians</b>	68
5.1	The Dirichlet problem for the Lévy–Laplace and Lévy–Poisson equations	68
5.2	The Dirichlet problem for the Lévy–Schrödinger stationary equation	84
5.3	The Riquier problem for the equation with iterated Lévy Laplacians	86
5.4	The Cauchy problem for the heat equation	88
<b>6</b>	<b>Quasilinear and nonlinear elliptic equations with Lévy Laplacians</b>	92
6.1	The Dirichlet problem for the equation $\Delta_L U(x) = f(U(x))$	92
6.2	The Dirichlet problem for the equation $f(U(x), \Delta_L U(x)) = F(x)$	94
6.3	The Riquier problem for the equation $\Delta_L^2 U(x) = f(U(x))$	96
6.4	The Riquier problem for the equation $f(U(x), \Delta_L^2 U(x)) = \Delta_L U(x)$	99
6.5	The Riquier problem for the equation $f(U(x), \Delta_L U(x), \Delta_L^2 U(x)) = 0$	103
<b>7</b>	<b>Nonlinear parabolic equations with Lévy Laplacians</b>	108
7.1	The Cauchy problem for the equations $\partial U(t, x)/\partial t = f(\Delta_L U(t, x))$ and $\partial U(t, x)/\partial t = f(t, \Delta_L U(t, x))$	108
7.2	The Cauchy problem for the equation $\partial U(t, x)/\partial t = f(U(t, x), \Delta_L U(t, x))$	115
7.3	The Cauchy problem for the equation $\varphi(t, \partial U(t, x)/\partial t) = f(F(x), \Delta_L U(t, x))$	121
7.4	The Cauchy problem for the equation $f(U(t, x), \partial U(t, x)/\partial t, \Delta_L U(t, x)) = 0$	126
	<b>Appendix. Lévy–Dirichlet forms and associated Markov processes</b>	133
A.1	The Dirichlet forms associated with the Lévy–Laplace operator	133
A.2	The stochastic processes associated with the Lévy–Dirichlet forms	137
