Contents

Preface	page vii
Introduction	ix
Acknowledgments	xiii
Contributors	xv
Acronyms and Abbreviations	xvii

Part I Algebraic Structures

1 Compositions and Clones of Boolean Functions	3
<i>Reinhard Pöschel and Ivo Rosenberg</i>	
2 Decomposition of Boolean Functions	39
<i>Jan C. Bioch</i>	

Part II Logic

3 Proof Theory	79
<i>Alasdair Urquhart</i>	
4 Probabilistic Analysis of Satisfiability Algorithms	99
<i>John Franco</i>	
5 Optimization Methods in Logic	160
<i>John Hooker</i>	

Part III Learning Theory and Cryptography

6 Probabilistic Learning and Boolean Functions	197
<i>Martin Anthony</i>	
7 Learning Boolean Functions with Queries	221
<i>Robert H. Sloan, Balázs Szörényi, and György Turán</i>

Table of Contents

[More information](#)

vi

Contents

- 8 Boolean Functions for Cryptography and Error-Correcting Codes** 257
Claude Carlet
- 9 Vectorial Boolean Functions for Cryptography** 398
Claude Carlet
- Part IV Graph Representations and Efficient Computation Models**
- 10 Binary Decision Diagrams** 473
Beate Bollig, Martin Sauerhoff, Detlef Sieling, and Ingo Wegener
- 11 Circuit Complexity** 506
Matthias Krause and Ingo Wegener
- 12 Fourier Transforms and Threshold Circuit Complexity** 531
Jehoshua Bruck
- 13 Neural Networks and Boolean Functions** 554
Martin Anthony
- 14 Decision Lists and Related Classes of Boolean Functions** 577
Martin Anthony
- Part V Applications in Engineering**
- 15 Hardware Equivalence and Property Verification** 599
J.-H. Roland Jiang and Tiziano Villa
- 16 Synthesis of Multilevel Boolean Networks** 675
Tiziano Villa, Robert K. Brayton, and Alberto L. Sangiovanni-Vincentelli
- 17 Boolean Aspects of Network Reliability** 723
Charles J. Colbourn
