Global e-Commerce

Are the Internet and e-commerce truly revolutionizing business practice? This book explodes the transformation myth by demonstrating that the Internet and e-commerce are in fact being adapted by firms to reinforce their existing relationships with customers, suppliers, and business partners. Detailed case studies of eight countries show that, rather than creating a borderless global economy, e-commerce strongly reflects existing local patterns of commerce, business, and consumer preference, and its impact therefore varies greatly by country. Paradoxically, while e-commerce is increasing the efficiency, effectiveness, and competitiveness of firms, it is also increasing the complexity of their environments as they have to deal with more business partners and also face greater competition from other firms. This incisive analysis of the diffusion and impact of e-business provides academic researchers, graduates, and MBA students with a solid basis for understanding its likely evolution.

KENNETH L. KRAEMER is Professor at the Paul Merage School of Business and at the Donald Bren School of Information and Computer Science, University of California, Irvine. He is also Director of the Center for Research on Information Technology and Organizations (CRITO) and Director of the Personal Computing Industry Center (PCIC).

JASON DEDRICK is Co-Director of the Personal Computing Industry Center and Senior Research Fellow at CRITO, University of California, Irvine.

NIGEL P. MELVILLE is Assistant Professor of Business Information Technology at the Stephen M. Ross School of Business, University of Michigan.

KEVIN ZHU is Associate Professor at the Rady School of Management, University of California, San Diego.

Roman Beck is Assistant Professor at the Johann Wolfgang Goethe University, Institute of Information Systems in Frankfurt, Germany. As a political economist he worked for two years at the Institute for Rural Development Studies on different research projects about the impacts of infrastructure on economic developments. He coordinated the research project “IT Standards and Network Effects” funded by the German National Science Foundation. His research focuses on the role of IT in creating new business models, the diffusion of IT innovations, and the role of externalities and network effects on the adoption of new standards, especially among SMEs. He publishes on a wide array of topics in the field of IT standards such as EDI, Web EDI, and m-commerce. His academic research has been published at several international IS conferences and proceedings and in academic journals such as *EM-Electronic Markets*, *Wirtschaftsinformatik*, *JGIM*, *Information Polity*, and *CAIS*.

Eric Brousseau is Professor of Economics at the University of Paris X, France and Director of EconomiX, a joint research center between the CNRS (French National Science Foundation) and the University of Paris X. He is also co-director of the GDR TICS (Research Consortium “Information Technologies and the Society”) of the CNRS. His research agenda focuses on the economics of institutions and the economics of contracts, with two main fields of applications: the economics of intellectual property rights and the economics of the Internet and digital activities. On this last issue he works on digital business models, on the development of e-commerce and e-markets, and on the governance of the Internet and of the information society.

Bruno Chaves is Research Engineer for Economics at the University of Paris X, France at EconomiX. His research focuses on economics

of online coordination systems. He is also webmaster for various research organizations.

Tain-Jy Chen is Professor in the Department of Economics at National Taiwan University, and former President of Chung-Hua Institution for Economic Research. His research interests are in international trade and industrial development.

Jason Dedrick is Senior Research Fellow at CRITO at the University of California, Irvine. His research is focused on the globalization of information technology and the economic impacts of IT at the firm, industry, and national levels. He is now working on a multi-country study of the adoption and impacts of electronic commerce, as well as a study of global knowledge networks in the personal computer industry. Mr. Dedrick is co-author, with Kenneth L. Kraemer, of *Asia's Computer Challenge: Threat or Opportunity for the United States and the World?* (Oxford University Press, 1998). He is also author of numerous journal articles, book chapters, and other publications.

Satoshi Hamaya is Senior Research Analyst at the Center for Economic Research at the Fujitsu Research Institute in Japan. His key research interests focus on Internet business in Japan, electronic commerce, and IT business strategies and governance. His major publications include "Internet Business White Paper 2002" co-authored and edited, "The Diffusion and Utilization of E-Commerce: The Comparative Characteristics of Ten Countries and Regions," and "Outsourcing for Sustainable Competitive Advantage: Information Systems."

John L. King is Dean and Professor at the School of Information at the University of Michigan. His research over the past two decades has concentrated on the relationship between technical and social change, and especially on IT-related changes in highly institutionalized production sectors such as transport, financial services, health care, criminal justice, and government. He has served as Professor at the University of California at Irvine, as Editor-in-Chief of the INFORMS journal *Information Systems Research*, as Marvin Bower Professor at Harvard Business School, as Board Member for the Computing Research Association, as Fulbright Distinguished Chair of American Studies at the University of Frankfurt in Germany, and as a

senior scientific advisor to the Computer and Information Science and Engineering Directorate, and the Social, Behavioral, and Economic Research Directorate at the US National Science Foundation.

Wolfgang Koenig is Professor of Information Systems at Johann Wolfgang Goethe University, Institute of Information Systems in Frankfurt, Germany. From 1995 to 2000 he headed an interdisciplinary research program sponsored by the German National Science Foundation on “Competitive Advantage by Networking – the Development of the Frankfurt and Rhine–Main Region.” Since the end of 2002 he has chaired the “E-Finance Lab Frankfurt am Main,” a joint research program with Accenture, Bearing Point, Deutsche Bank, Deutsche Postbank, Finanz IT, IBM, Microsoft, Siemens, and T-Systems. Since October 2004, he has been Dean of the faculty of Economics and Business Administration. Moreover, he serves as Editor-in-Chief of the leading mid-European IS journal *Wirtschaftsinformatik*. He is a member of the board of external directors of several companies. His research interests are in standardization, networking, and e-finance. His research has been published in academic journals such as *EM-Electronic Markets*, *Wirtschaftsinformatik*, *JGIM*, *JISeB*, *JITSR*, and *CAIS*.

Kenneth L. Kraemer is Professor of Management and Computer Science at the Paul Merage School of Business and the Donald Bren School of Information and Computer Science at the University of California, Irvine, where he has been since 1967. He is Director of CRITO and PCIC. He was also Director of the NSF Industry–University Cooperative Research Center (I/UCRC – CRITO Consortium) from 1997 to 2003. He holds the Taco Bell Chair in Information Technology for Management and has held the Shaw Professor Chair in Information Systems at the National University of Singapore (1990–1991). He was elected a “Fellow” of the Association for Information Systems in 2003. His research spans thirty-nine years in information technology management: social and organizational implications of IT, national policy for IT production and use, contributions of IT to productivity, IT in developing countries, and the dynamics of the IT industry and offshore sourcing. He has published over 175 papers in scholarly journals such as *Management Science*, *Information Systems Research*, *MIS Quarterly*,

Kalle Lyytinen is Iris S. Wolstein Professor at Case Western Reserve University. He currently serves on the editorial boards of several leading IS journals, including *Journal of AIS* (Editor-in-Chief), *Journal of Strategic Information Systems*, *Information and Organization*, *Requirements Engineering Journal*, *Information Systems Journal*, *Scandinavian Journal of Information Systems*, and *Information Technology and People*, among others. He is an AIS fellow (2004), and the former chairperson of IFIP 8.2. He has published over 150 scientific articles and conference papers and edited or written ten books on topics related to system design, method engineering, implementation, software risk assessment, computer-supported cooperative work, standardization, and ubiquitous computing. He is currently involved in research projects that look at the IT-induced innovation in software development, architecture and construction industry, design and use of ubiquitous applications in health care, high-level requirements model for large-scale systems, and the development and adoption of broadband wireless standards and services, where his recent studies have focused on South Korea and the USA.

Nigel P. Melville is Assistant Professor at the Stephen M. Ross School of Business, at the University of Michigan, where he researches and teaches innovation with information and information technology. Previously, he was the Students in Free Enterprise Sam Walton Fellow and Assistant Professor of Information Systems at the Carroll School of Management, Boston College. He earned his Ph.D. in management

from the Graduate School of Management at UC Irvine. His papers have appeared in *MIS Quarterly*, *Information Systems Research*, and *Communications of the ACM*. Prior to earning his Ph.D., he worked as a new product development engineer for Motorola, as a technical editor in Osaka Japan, and co-founded a customer relationship management software company. He is a member of the Association for Computing Machinery and INFORMS. He earned an M.S. in electrical and computer engineering from UC Santa Barbara and a B.S. in electrical engineering from UCLA.

Juan J. Palacios is Professor of Economics and Head, Transnational Studies Program at the Department of Political Studies, University of Guadalajara, Mexico. Professor Palacios is a member of Mexico's National Research System (SNI) and of the Information and Communication Technology Innovation Program for E-business and SME Development (ICT-4-BUS) Program Advisory Council of the Inter American Development. His research interests include the PC industry and e-commerce in Mexico, and he has published articles on topics such as "Impacts of liberalization and economic integration on Mexico's computer sector," "Globalization and e-commerce: environment and policy in Mexico," and "The development of e-commerce in Mexico: A business-led passing boom or a step toward the emergence of a digital economy?" He is also author of *Production Networks and Industrial Clustering in Developing Regions. Electronics Manufacturing in Guadalajara, Mexico* (2001, Mexico: Universidad de Guadalajara).

Dennis S. Tachiki is Professor at the faculty of Business Administration and Graduate School of Business Administration at Tamagawa University in Tokyo, Japan. He has been a consultant for the Japanese Ministry of Economy, Trade and Industry, and for the Machine Tool Industry Association, on e-commerce and industrial competitiveness. His current research focus is on the diffusion of technology across the production networks of multinational corporations in the Asia-Pacific region. He has co-edited *Regional Strategies in a Global Economy* and *Pathways to Innovation*.

Zixiang (Alex) Tan is Associate Professor at the School of Information Studies at Syracuse University in New York. His research and teaching interests include policy and regulation, industry

restructuring, global competition, and application deployment in the ICT sector, with a geographic focus on China and Asia.

Paulo Bastos Tigre is Economist MSc in Production Engineering, and D.Phil. in Science and Technology Policy. Presently he is Professor of Industrial Organization at the Institute of Economics of Rio de Janeiro Federal University, Brazil. He was visiting research fellow at the University of California Berkeley (1997), University of Brighton (1994), and Université de Paris XIII (1996), and has served as consultant and advisor to several national and international institutions related to technology development. He has been conducting research in technology development issues for twenty-five years, especially in the field of economics of information and communications technologies. These include the development of the computer and software industry in developing countries, electronic commerce, strategies and policies for the telecommunications industry, regulations, and international agreements for trade in services.

Rolf T. Wigand is Maulden-Entergy Chair and Distinguished Professor of Information Science and Management at the University of Arkansas at Little Rock. He is the immediate past Director of the Center for Digital Commerce and the Graduate Program in Information Management at Syracuse University. Mr. Wigand researches information management, electronic commerce and markets, IS standards, and the strategic deployment of information and communication technology. His research interests lie at the intersection of information and communication business issues, the role of newer IT, and its strategic alignment within business and industry. His research has been supported by the National Science Foundation, the German National Science Foundation (DFG), the Volkswagen Foundation, the International Social Science Council, Rome Laboratory, and others. He is an editorial board member of almost thirty academic journals, book series, and yearbooks, and the author of five books and over 110 articles, book chapters, and monographs.

Ouyang Wu is Division Head of the Department of Policy and Planning under State Council Informatization Office in the People's Republic of China. He moved to this position after he finished his

research project organized by CRITO. Some of his publications include “Deregulating Telecommunications in the US,” “What Can We Learn from the Reform of Telecommunications in the US?” “Convergence in China: Barriers in the System, Business and Management,” “Some Issues in the Process of Restructuring the Chinese Telecommunications Market,” “Cable Networks, Electronic Commerce and Social Informatization,” “Opportunities and Challenges for Non-State Owned Enterprises in China Telecommunications Market,” “ITA: The Trade Framework in Information Age,” and so on. He has visited Canada and the Netherlands as a visiting scholar and worked as an affiliate researcher for a year for the Program on Information Resources Policy at Harvard University.

Sean Xu is a doctoral candidate at the Paul Merage School of Business, University of California, Irvine. His research interests include IT assimilation and usage by firms, organizational/economic impacts of IT and e-business, the diffusion of network technologies, and economics of network standards. His work has been published or accepted for publication in *MIS Quarterly*, *Journal of Management Information Systems*, *European Journal of Information Systems*, and *Electronic Markets*. He won two Best Paper Awards at the International Conference on Information Systems in 2002 and 2003, and a Best Paper Award at the America’s Conference on Information Systems in 2004.

Kou Yukawa is Senior Research Associate at the Center for Economic Research at the Fujitsu Research Institute in Japan. He is also a Visiting Researcher at Tokyo University. His key research interests include Internet business and cluster of Internet companies, especially the Bit Valley phenomenon in Japan. Two of his main English publications are “Internet Companies in Japan after the Collapse of the Internet Bubble – an Analysis of Internet Companies and Their Cluster” and “A Cluster of Internet Companies in Tokyo: Review of Bit Valley.”

Kevin Zhu is Associate Professor at the Rady School of Management, University of California, San Diego. His research falls in the intersection of economics, technology, and management science, with a focus on economics of information systems, technology diffusion, business value of IT, and strategic adoption of technology standards.
