

Contents

	<i>Preface</i>	<i>page vii</i>
1	Introduction	1
	1.1 Biodiversity and the Acanthocephala	1
	1.2 An ecological approach to the Acanthocephala	8
2	Life cycles and transmission	12
	2.1 General strategy	12
	2.2 The adult stage	14
	2.3 Eggs	16
	2.4 Intermediate hosts and cystacanths	18
	2.5 Paratenic hosts	20
	2.6 Post-cyclic transmission	24
	2.7 Variation in life cycles	26
3	Biogeography and distribution	28
	3.1 Phylogenetic influences	28
	3.2 Biogeographical influences	32
	3.3 Host features	43
4	Specificity	52
	4.1 General strategy	52
	4.2 Criteria for specificity	56
	4.3 Spatial variations in specificity	63
	4.4 Strain specificity	69
5	Host–parasite interactions	75
	5.1 Distribution of acanthocephalans within hosts	75
	5.2 Relations in vertebrate hosts	81
	5.3 Relations in invertebrate hosts	84

vi Contents

5.4	Alterations in intermediate host behaviour	87
5.5	Significance of behavioural changes in hosts	99
6	Population dynamics	101
6.1	General considerations	101
6.2	Seasonality and short-term studies	104
6.3	Regulatory mechanisms	110
6.4	Long-term studies	116
6.5	Mathematical models	121
7	Community dynamics	125
7.1	General considerations	125
7.2	Richness and dominance of communities	127
7.3	Spatial and temporal variability	137
7.4	Niche dynamics	141
7.5	Interspecific interactions	146
8	Introductions and extinctions	158
8.1	Dispersal	158
8.2	Introductions and colonisation	165
8.3	Rarity	172
8.4	Extinctions	174
9	Relations to ecosystem changes	179
9.1	Biological tags	179
9.2	Acanthocephalans as indicators of pollution	183
9.3	Impact on ecosystems	192
10	Conclusions and overview	200
	<i>References</i>	211
	<i>Index</i>	241
