Abelson, H., 141
Antonelli, G. B., 68
Arrow, K., 160

bordered mixed Hessian, 137
  generalized, 174
Brown, D. J., 160

Chen, P., 86, 140, 141, 152
Chiappori, P.-A., 161, 166
Clarke, E. H., 19, 22, 23, 184
Clarke–Groves–Vickrey mechanism, 184
Clarke–Groves-Vickrey transfers, 18, 22, 23
common value, 178
competitive mechanism, 82, 145, 158
  in terms of net trades, 162, 164
convexity of objective, 178
Cournot duopoly, 75

Debreu, G., 59, 69, 70, 159
demand, 25
Differential Ideal, 119
  and *Product Structure*, 121, 132
Direct Sum, 29, 85, 89, 119, 121
  ⇒*Global Product Structure*, 109, 113, 114, 118
  ⇒*Message Process*, 75
  ⇒*Product Structure*, 95, 108
    ⇒*Local Product Structure*, 109
Distribution, 24, 35
  ⇒*Foliation*, 50, 57, 61
  ⇒*Mapping*, 50, 57–59, 61, 65
dynamics, 10

Eisenberg, J., 121
Ekeland, I., 161, 166
excess demand mapping, 159

Foliation, 24, 35
  ⇒*Distribution*, 50
  ⇒*Mapping*, 57
Frobenius Theorem, xiii, 48, 182
  geometric interpretation, 50
  proof
    case of $c = 1$ and $d = 2$, 52
    general case, 54
    geometric intuition, 65, 99
Frobenius Theorem for Mechanism Design, 93, 96
  notation, 93
  proof
    case of $n = 2$ and $c_1 = d_1 = c_2 = d_2$, 101
    general case, 106
    geometric intuition, 99, 101

Gibbard, A., 184
Golubitsky, M., 140
Groves, T., xiv, 19, 22, 23, 184
Guillemin, V., 140

Hahn, F., 160
Hajek, B., 19
Hayek, F., 149, 160, 188
Hicks, J. R., 160
Hilbert's Thirteenth Problem, 187
Hurwicz et al. (1978), xiii, xiv, 86, 109, 111, 121, 126
  Lemma A′, 96

Hurwicz et al. (*cont.*)
  Proposition 1, 87
  Theorem 4″, 142
  Theorem 6, 128
  Theorem 7, 119, 132
Hurwicz, L., xi–xiii, 2–4, 37, 66, 69, 70, 111, 126, 140, 149, 160, 186

implementation, 8, 125
  dominant strategy, 180
  Nash, 181
  and realization, 16, 149
incentive compatibility, 176, 188
informational decentralization, xi, 1, 4
informational externality, 177
Ingrao, B., 160
integrability, 39
  geometric interpretation, 42
  mixed partial condition, 40
integral curve, 42
integral manifold, 36
  maximal, 61
Israel, G., 160

Jackson, M., xiv
Jordan, J. S., xiv, 10, 149

Kübler, F., 161, 166

Lie bracket, 39
local coordinate system, 35, 55
Lorentz, G. G., 187

Mantel, R., 159
Mapping, 24, 36
  ⇒*Distribution*, 50
Marschak, J., 175
Marschak, T., xiv, 186
Mas-Colell, A., 160
Maskin, E.
  monotonicity, 125
Matzkin, R. L., 160
mechanism, 2
  equilibrium message correspondence, 3
  message adjustment rule, 3
  message process, 4
  notation, 4
  objective, 4
  outcome mapping, 4
  regularity condition, 127
Message Process, 29, 85
  ⇒*Product Structure*, 90
  uniqueness of equilibrium, 86
Mount, K., xiii, 2–5, 10, 126, 149, 162, 183
Mount–Reiter diagram, 2
  noncooperative game theory, 8
multidimensional mechanism design, 16
Myerson, R., 5, 176

Osana, H., 149

parameter space, 74
parameter transfer mechanism, 5, 140, 150, 183
  approximation, 188
  hierarchy, 187
  Wilson's critique, 187
parameter vector, 74
Polemarchakis, H. M., 161, 166
privacy preserving, 3
  strategy, 9, 179, 180
private value, 176
Product Structure, 14, 29, 75, 85, 89, 121
  ⇒*Direct Sum*, 92
  and dominant strategy implementation, 179, 181, 184
  equivalence, 135
  Global Product Structure, 109, 113, 114, 118
  Local Product Structure, 109
  message-indexed vs. parameter-indexed, 29, 109, 111
  in realizing competitive prices and net trades, 164
profile, 126

Radner, R., xiv, 175
realization, 5, 125
  approximation, 186
  first-order conditions, 128
  generic mapping, 150
  of a Pareto optimal allocation, 146
  of a Walrasian allocation, 145
Reichelstein, S., xiv, 16
Reiter, S., xi–xiii, 2–5, 10, 14, 16, 37, 66, 111, 126, 149, 162, 183
revelation mechanism, 5, 184
Revelation Principle, 179
Rojas, F., 121
