- water 18, 19, 20, 22, 24
box, construction of 302–5
complexes with ions 109, 200
dimer 109, 114–15, 201
free energy of 286–91, 326
molecular dynamics 215–17,
244–6
Monte Carlo calculations 325
quantum chemical energy 73–4
TIP3P model 95–6, 313
trajectory analysis 233–5
- wavefunction 52, 112
closed-shell 57
electronic 53, 55
open-shell 57
spin-restricted 56
spin-unrestricted 57
- weighted histogram analysis method 250ff., 323
- window, free-energy calculations 250ff., 283ff.
- World Wide Web 294
- X-ray crystallography 21, 31, 103
- XML; *see* extensible markup language
- XPK format 25, 28, 217
- XYZ format 19, 27
- zero-point motion 171
