Cambridge University Press has no responsibility for the persistence or
 accuracy of URLs for external or third-party Internet websites referred to
 in this publication, and does not guarantee that any content on such
 websites is, or will remain, accurate or appropriate.

Every effort has been made in preparing this publication to provide
 accurate and up-to-date information which is in accord with accepted
 standards and practice at the time of publication. Although case
 histories are drawn from actual cases, every effort has been made to
 disguise the identities of the individuals involved. Nevertheless, the
 authors, editors and publishers can make no warranties that the
 information contained herein is totally free from error, not least
 because clinical standards are constantly changing through research
 and regulation. The authors, editors and publishers therefore disclaim
 all liability for direct or consequential damages resulting from the use of
 material contained in this publication. Readers are strongly advised to
 pay careful attention to information provided by the manufacturer of
 any drugs or equipment that they plan to use.
