<i>List of contributors</i>	<i>page ix</i>
<i>Foreword</i> Eckhard Thiel	xiii
<i>Introduction</i> Wolf-Karsten Hofmann	1
1 Technique of microarrays: microarray platforms Sven de Vos	8
2 Quantitative quality control of microarray experiments: toward accurate gene expression measurements Xujing Wang and Martin J. Hessner	27
3 Statistical analysis of gene expression data David A. Elashoff	47
4 Genomic stratification in patients with heart failure Tara A. Bullard, Frédérick Aguilar, Jennifer L. Hall, and Burns C. Blaxall	80
5 Gene expression profiling for the diagnosis of acute leukemias Torsten Haferlach, Alexander Kohlmann, Susanne Schnittger, Claudia Schoch, and Wolfgang Kern	106
6 Gene expression profiling can distinguish tumor subclasses of breast carcinomas Ingrid A. Hedenfalk	132

viii Contents

7	Gene expression profiling in lymphoid malignancies Christof Burek, Elena Hartmann, Zhengrong Mao, German Ott, and Andreas Rosenwald	162
8	mRNA profiling of pancreatic beta-cells: investigating mechanisms of diabetes Leentje Van Lommel, Yves Moreau, Daniel Pipeleers, Jean-Christophe Jonas, and Frans Schuit	187
9	Prediction of response and resistance to treatment by gene expression profiling Philipp Kiewe and Wolf-Karsten Hofmann	212
	<i>Index</i>	238
