Contents

<i>Preface</i>	<i>page xi</i>
1 Setting the stage: star formation and hydrogen burning in single stars	1
1.1 Introduction	1
1.2 Background	2
1.3 Evolution	16
2 Stellar death: the inexorable grip of gravity	27
2.1 Red giants	27
2.2 Stellar winds	32
2.3 Quantum deregulation	35
2.4 Core collapse	37
2.5 Transfiguration	39
3 Dancing with stars: binary stellar evolution	42
3.1 Multiple stars	42
3.2 Stellar orbits	43
3.3 Roche lobes: the cult symbol	44
3.4 The first stage of binary evolution: the Algol paradox	46
3.5 Mass transfer	47
3.6 Large separation	50
3.7 Small separation	50
3.8 Evolution of the second star	51
3.9 Common-envelope phase	52
3.10 Gravitational radiation	54

Table of Contents

[More information](#)

viii Contents

4	Accretion disks: flat stars	55
4.1	The third object	55
4.2	How a disk forms	56
4.3	Let there be light - and X-rays	58
4.4	A source of friction	58
4.5	A life of its own	61
4.6	Fat centers? the DAF zoo	65
5	White dwarfs: quantum dots	68
5.1	Single white dwarfs	68
5.2	Cataclysmic variables	69
5.3	The origin of cataclysmic variables	72
5.4	The final evolution of cataclysmic variables	75
6	Supernovae: stellar catastrophes	79
6.1	Observations	79
6.2	The fate of massive stars	84
6.3	Element factories	87
6.4	Collapse and explosion	88
6.5	Polarization and jets: new observations and new concepts	93
6.6	Type Ia supernovae: the peculiar breed	102
6.7	Light curves: radioactive nickel	111
7	Supernova 1987A: lessons and enigmas	118
7.1	The large magellanic cloud awakes	118
7.2	The onset	120
7.3	Lessons from the progenitor	128
7.4	Neutrinos!	132
7.5	Neutron star?	133
7.6	The light curve	134
7.7	This cow's not spherical	135
7.8	Rings and jets	136
7.9	Other firsts	139
8	Neutron stars: atoms with attitude	141
8.1	History - theory leads, for once	141
8.2	The nature of pulsars - not little green men	143
8.3	Pulsars and supernovae - a game of hide and seek	147

	Contents	ix
8.4 Neutron star structure – iron skin and superfluid guts	148	
8.5 Binary pulsars – “tango por dos”	152	
8.6 X-rays from neutron stars – hints of a violent Universe	156	
8.7 X-ray flares – a story retold	162	
8.8 The Rapid Burster – none of the above	165	
8.9 Millisecond pulsars	167	
8.10 Soft gamma-ray repeaters – reach out and touch someone	170	
8.11 Geminga	174	
9 Black holes in theory: into the abyss	176	
9.1 Why black holes?	176	
9.2 The event horizon	179	
9.3 Singularity	180	
9.4 Being a treatise on the general nature of death within a black hole	182	
9.5 Black holes in space and time	183	
9.6 Black-hole evaporation: Hawking radiation	195	
9.7 Fundamental properties of black holes	198	
9.8 Inside black holes	199	
10 Black holes in fact: exploring the reality	207	
10.1 The search for black holes	207	
10.2 Cygnus X-1	209	
10.3 Other suspects	211	
10.4 Black-hole X-ray novae	213	
10.5 The nature of the outburst	215	
10.6 Lessons from the X-rays	216	
10.7 SS 433	219	
10.8 Miniquasars	221	
10.9 Giants among us	223	
10.10 The middle ground	227	
11 Gamma-ray bursts, black holes and the Universe: long, long ago and far, far away	229	
11.1 Gamma-ray bursts: yet another cosmic mystery	229	
11.2 The revolution	233	
11.3 The shape of things	239

x	Contents	
	11.4	The supernova and gamma-ray-burst connection 246
	11.5	The possibilities: birth pangs of black holes? 251
	11.6	The short hard bursts 255
	11.7	The future 258
	11.8	The past in our future: the Dark Ages 259
12	Supernovae and the Universe	263
	12.1	Our expanding Universe 263
	12.2	The shape of the Universe 264
	12.3	The age of the Universe 266
	12.4	The fate of the Universe 269
	12.5	Dark matter 270
	12.6	Vacuum energy – Einstein’s blunder that wasn’t 272
	12.7	Type Ia supernovae as calibrated candles and understood candles 273
	12.8	Supernovae and cosmology 275
	12.9	Acceleration! 278
	12.10	The shape of the Universe revisited 281
	12.11	Dark energy 282
	12.12	The fate of the Universe revisited 284
13	Wormholes and time machines: tunnels in space and time	286
	13.1	The mystery of time 286
	13.2	Wormholes 286
	13.3	Time machines 292
14	Beyond: the frontiers	297
	14.1	Quantum gravity 299
	14.2	When the singularity is not a singularity 302
	14.3	Hyperspace perspectives 308
	14.4	String theory 310
	14.5	Brane worlds 317
	14.6	A holographic Universe 322
	14.7	Coda 326
	<i>Index</i>	328
