List of contributors viii
Acknowledgments xiii

1 Space and time: the fabric of thought and reality 1
   Beena Khurana and Romi Nijhawan

Part I Time–space during action: perisaccadic mislocalization and reaching

2 The internal eye position signal, psychophysics, and neurobiology 9
   John Schlag and Madeleine Schlag-Rey

3 Factors influencing perisaccadic visual mislocalization 19
   Hitoshi Honda

4 Visual and nonvisual factors in perisaccadic compression of space 38
   Markus Lappe, Lars Michels, and Holger Awater

5 Keeping vision stable: rapid updating of spatiotopic receptive fields may cause relativistic-like effects 52
   M. Concetta Morrone, John Ross, and David C. Burr

6 Combined influences of extraretinal signals, retinal signals, and visual induction on space perception and manual behavior in perisaccadic and steady viewing 63
   Leonard Matin and Wenxun Li

7 Space constancy: the rise and fall of perceptual compensation 94
   Bruce Bridgeman

8 Intercepting moving objects: do eye movements matter? 109
   Eli Brenner and Jeroen B. J. Smeets

9 The utility of visual motion for goal-directed reaching 121
   David Whitney, Ikuya Murakami, and Hiroaki Gomi

Part II Temporal phenomena: perception

10 Saccadic chronostasis and the continuity of subjective temporal experience across eye movements 149
   Kielan Yarrow, Patrick Haggard, and John C. Rothwell
## Contents

### Part III Temporal phenomena: binding and asynchrony

13 Dynamics of visual feature binding  
*Colin W. G. Clifford*

14 How does the timing of neural signals map onto the timing of perception?  
*David M. Eagleman*

15 Mechanisms of simultaneity constancy  
*Laurence Harris, Vanessa Harrar, Philip Jaekl, and Agnieszka Kopinska*

16 Relative timing and perceptual asynchrony  
*Derek H. Arnold*

17 The time marker account of cross-channel temporal judgments  
*Shin’ya Nishida and Alan Johnston*

18 Simultaneity versus asynchrony of visual motion and luminance changes  
*Martin J. M. Lankheet and Wim A. van de Grind*

### Part IV Spatial phenomena: forward shift effects

19 The Fröhlich effect: past and present  
*Dirk Kerzel*

20 Approaches to representational momentum: theories and models  
*Timothy L. Hubbard*

21 Conceptual influence on the flash-lag effect and representational momentum  
*Masayoshi Nagai, Mutsumi Sugauma, Romi Nijhawan, Jennifer J. Freyd, Geoffrey Miller, and Katsumi Watanabe*

22 Perceptual asynchronies and the dual-channel differential latency hypothesis  
*Hulusi Kafaligönül, Saumil S. Patel, Haluk Öğmen, Harold E. Bedell, and Gopathy Purushothaman*

23 Paying attention to the flash-lag effect  
*Marcus V. C. Baldo and Stanley A. Klein*

24 Illusions of time, space, and motion: flash-lag meets chopsticks and reversed phi  
*Stuart Anstis*
Part V  Space–time and awareness

28  Object updating: a force for perceptual continuity and scene stability in human vision  
    James T. Enns, Alejandro Lleras, and Cathleen M. Moore  
    503

29  A motion illusion reveals the temporally discrete nature of visual awareness  
    Rufin VanRullen, Leila Reddy, and Christof Koch  
    521

30  Priming and retouch in flash-lag and other phenomena of the streaming perceptual input  
    Talis Bachmann  
    536
