

Index

- additive coalescence, 244
 additive martingale, 56
 asymptotic frequency, 97, 125, 135
- backward equation, 10
 beta distribution, 75
 birth-time, 25
 Bolthausen-Sznitman coalescent, 205
 Borel distribution, 229
 branch, 32
 branching Markov chain, 14
 branching property, 14, 21, 119, 147, 155
 branching random walk, 15, 21
 bridge, 191
- Campbell formula, 79
 Chinese restaurant, 107
 coagulation kernel, 214
 coagulation operator, 174
 coagulation rate, 179, 182
 coagulation-fragmentation, 63, 65, 213
 coalescent chain, 215
 coefficient of binary coagulation, 183
 come down from infinity, 170, 203
 compatible, 95, 168
 compound Poisson process, 10, 35
 conservative, 16
- Dirichlet distribution, 75, 88
 Dirichlet process, 88
 dislocation measure, 18, 126
 dislocation rate, 126
 dissipative, 16
 doubly-exchangeable, 116
 drift coefficient, 134
- dual flow, 200
 duality fragmentation-coagulation, 76, 209, 213, 258, 263
 dust, 41, 67, 187
- EPPF, 105, 208
 erosion coefficient, 128
 erosion rate, 126
 Ewens sampling formula, 106
 exchangeable coalescent, 177
 exchangeable increments, 191
 exchangeable random partition, 98
 extinction, 38, 56
- Feller property, 120, 146, 154, 178, 187, 224
 first moment formula, 79
 fixation, 202
 Fleming-Viot process, 202
 flow of bridges, 196
 forward equation, 10
 fragmentation chain, 18
 fragmentation equation, 19
 fragmentation operator, 114, 153
- gamma distribution, 75
 gamma subordinator, 88, 211
 GEM, 89
 genealogical tree, 24
 generation, 24
- homogeneous fragmentation, 21, 46, 55, 119
 hydrodynamic limit, 226
- index of self-similarity, 18, 25, 149
 infinitesimal generator, 10, 19, 155, 216, 225
 intensity measure, 78

- interval-partition, 68
- intrinsic martingale, 28
- jump rate, 10, 121, 178
- killing rate, 133
- Kingman Theorem, 100
- Kingman's coalescent, 169
- Lévy measure, 87, 134
- Lévy-Itô decomposition, 87, 134, 140
- Lévy-Khintchine formula, 87, 134
- Laplace exponent, 87, 134
- large deviation principle, 61
- law of large numbers, 44
- lifetime, 25, 134
- Malthusian exponent, 27
- Malthusian hypotheses, 27
- Marcus-Lushnikov coalescents, 215
- mark, 24, 80
- Markov chain, 9, 121, 178, 215
- Markov sequence, 7
- mass-coalescent, 185
- mass-fragmentation, 152
- mass-partition, 67
- measure of multiple
 - coagulations, 183
- monodisperse, 226
- multiplicative coalescence, 227
- paint-box, 98
- Palm formula, 79
- partition, 95
- Pitman sampling formula, 106
- point measure, 11
- Poisson random measure, 78
- Poisson-Dirichlet partition, 88, 90, 209
- Poisson-Kingman partition, 81
- Poissonian construction, 124, 179, 217
- Poissonian rain, 22, 50, 70
- primitive Eve, 205
- proper, 67, 97
- random forest, 247
- random graph, 228
- random tree, 247
- renewal theory, 53
- residual allocation model, 89, 92
- scaling property, 21, 155
- self-similar fragmentation, 18, 145, 258
- self-similar Markov process, 151, 161
- semigroup, 9
- shattering, 64
- simple bridge, 193
- simple partition, 189
- size-biased permutation, 72
- size-biased reordering, 71
- size-biased sample, 71
- Smoluchowski's coagulation equation, 227
- spacing, 68
- splitting rate, 122
- stable subordinator, 90, 205
- standard, 119, 177
- standard additive coalescent, 255
- stick breaking scheme, 89
- structural distribution, 71, 162
- sub-multiplicative, 235
- subordination, 206
- subordinator, 87, 133, 188
- superposition, 80
- tagged branch, 32
- tagged fragment, 133, 150
- tagged particle, 33
- Wright-Fisher model, 163
