

Contents

	Preface	<i>page vii</i>
1	Basic Concepts	1
	1.1 Outcomes, events, and probability	1
	1.2 Flipping coins and the World Series	6
	1.3 Independence	9
	1.4 Random variables and distributions	12
	1.5 Expected value	17
	1.6 Moments and variance	21
	1.7 Exercises	26
2	Combinatorial Probability	32
	2.1 Permutations and combinations	32
	2.2 Binomial and multinomial distributions	41
	2.3 Poisson approximation to the binomial	47
	2.4 Card games and other urn problems	56
	2.5 Probabilities of unions, Joe DiMaggio	62
	2.6 Blackjack	68
	2.7 Exercises	71
3	Conditional Probability	81
	3.1 Definition	81
	3.2 Two-stage experiments	86
	3.3 Bayes' formula	94
	3.4 Discrete joint distributions	100
	3.5 Exercises	105

vi	Contents	
4	Markov Chains	114
	4.1 Definitions and examples	114
	4.2 Multistep transition probabilities	120
	4.3 Stationary distributions	124
	4.4 Limit behavior	131
	4.5 Gambler's ruin	138
	4.6 Absorbing chains	142
	4.7 Exercises	151
5	Continuous Distributions	161
	5.1 Density functions	161
	5.2 Distribution functions	166
	5.3 Functions of random variables	173
	5.4 Joint distributions	177
	5.5 Marginal and conditional distributions	182
	5.6 Exercises	186
6	Limit Theorems	190
	6.1 Sums of independent random variables	190
	6.2 Mean and variance of sums	196
	6.3 Laws of large numbers	203
	6.4 Normal distribution	208
	6.5 Central limit theorem	212
	6.6 Applications to statistics	219
	6.7 Exercises	223
7	Option Pricing	229
	7.1 Discrete time	229
	7.2 Continuous time	233
	Normal Table	237
	Answers to Odd Problems	239
	Index of Terms	241
	Index of Examples	243
