

## Index

---

- accumulation factor, 48
- additional benefits, 140
- approximation price, 191
- arbitrage, 23, 85, 116
- attainability, 85, 118, 122, 173
- basis
  - first order, 13
  - real, 15
  - second order, 12
- binomial model, 115, 143, 175
  - representation formula, 176
- Black's formula
  - cap, 251
  - caplet, 251
  - floor, 251
  - floorlet, 251
  - swaption, 252
- Black–Scholes equation, 129
- Black–Scholes formula, 130
- Black–Scholes model, 124, 144, 155
- bonus, 222
  - cash, 138
  - terminal, 135
- bonus potential, 18
  - collective, 19
  - free policy, 39
  - individual, 19, 29, 36, 65
  - premiums, 39, 43
- Brownian motion, 125
- cap, 239
  - in discrete time, 249
- CMS, 240
  - cap, 240
    - in discrete time, 253
    - floor, 240
  - complete market, 118, 122, 174
  - constant maturity swap. *see* CMS
  - contingent claim, 117, 126
    - integrated, 147, 174
    - purely financial, 174
  - cost process
    - multi-period model, 84, 172
    - one-period model, 164
  - Cox–Ingersoll–Ross model, 95, 98
  - credit risk, 59
  - discount factor, 48
  - diversification, 24, 46
  - dividends, 207
  - equity-linked insurance, 148
  - equivalence principle, 14, 49, 206
  - equivalent martingale measure, 173
  - filtration, 79
  - financial standard deviation
    - principle, 196
  - financial variance principle, 196
  - floor, 239
    - in discrete time, 249
  - forward measure, 241
  - forward rate, 60
  - forward swap rate
    - in discrete time, 248
  - free policy, 37
  - hedging, 52, 118, 122

- incomplete market, 147, 174
- integrated risk, *see* contingent claim, integrated
- intervention, 32, 39
- investment strategy, 172
  
- Kunita–Watanabe decomposition, 185
  
- law of large numbers, 46
  
- martingale measure, 87, 117, 122
- mean-self-financing, 186
- mean-variance hedging, 190
- mean-variance indifference pricing, 194
- mean-variance utility function, 194
- mortality bond, 171
- mortality risk
  - diversifiable, 50, 168
  - non-diversifiable, 168
  - systematic, 48, 170
  - trading with, 171
  - unsystematic, 48
- mortality swap, 171
  
- payer swap, 238
  - in discrete time, 247
- payment process, 27
  - guaranteed, 29
  - not guaranteed, 29
- portfolio, 121
  
- quantile hedging, 198
  
- receiver swap, 237
- replication, 53, 118, 122
  - price, 174
- reserve, 132
  - market, 18
  - technical, 12, 13, 104, 132, 206
  - total, 15, 104, 132
  - undistributed, 15, 105, 133
  
- risk minimization
  - multi-period model, 184
  - one-period model, 166
- risk-neutral with respect to mortality, 162
  
- self-financing, 84, 126, 172
- strategy, 82
- super-hedging, 181
  - price, 181
  - strategy, 181
- surplus, 210
  - individual, 211
  - systematic, 213
- surrender, 30
- swap rate, 237
  - in discrete time, 248
- swaption
  - in discrete time, 252
  - payer, 239
  - receiver, 239
  
- Thiele’s differential equation
  - with forward rates, 64
  - with free policy option, 43
  - with surrender option, 31
  
- unit-linked insurance, 148
  - indifference pricing, 197
  - mean-variance hedging, 193
  - pure, 150
  - risk minimization, 187
  - super-hedging, 182
  - terminal guarantee, 150
  
- value process, 83, 116, 121, 172
- variance minimization, one-period model, 165
- Vasiček model, 94, 96, 242
  
- zero coupon bond, 50, 59
