Contents

<i>Contributors</i>	page ix
<i>Introduction by the Editors</i>	xi
<i>Richard Blundell, Whitney K. Newey, and Torsten Persson</i>	
1 Identification of Nonadditive Structural Functions <i>Andrew Chesher</i>	1
2 Nonadditive Models with Endogenous Regressors <i>Guido W. Imbens</i>	17
3 Heterogeneity and Microeconometrics Modeling <i>Martin Browning and Jesus Carro</i>	47
4 Heterogeneous Choice <i>Rosa L. Matzkin</i>	75
5 Modeling Heterogeneity <i>Arthur Lewbel</i>	111
6 Inference with Weak Instruments <i>Donald W. K. Andrews and James H. Stock</i>	122
7 Empirical Likelihood Methods in Econometrics: Theory and Practice <i>Yuichi Kitamura</i>	174
8 Weak Instruments and Empirical Likelihood: A Discussion of the Papers by D. W. K. Andrews, J. H. Stock, and Y. Kitamura <i>Richard J. Smith</i>	238
9 Estimating Continuous-Time Models with Discretely Sampled Data <i>Yacine Aït-Sahalia</i>	261
10 Variation, Jumps, and High-Frequency Data in Financial Econometrics <i>Ole E. Barndorff-Nielsen and Neil Shephard</i>	328
