Contents

<i>List of contributors</i>	page ix
<i>Preface to the second edition</i>	xiii
<i>Preface</i>	xv
1 An Introduction to Description Logics <i>D. Nardi and R. J. Brachman</i>	1
1.1 Introduction	1
1.2 From networks to Description Logics	5
1.3 Knowledge representation in Description Logics	13
1.4 From theory to practice: Description Logic systems	17
1.5 Applications developed with Description Logic systems	22
1.6 Extensions of Description Logics	32
1.7 Relationship to other fields of Computer Science	39
1.8 Conclusion	42
Part I Theory	45
2 Basic Description Logics <i>F. Baader and W. Nutt</i>	47
2.1 Introduction	47
2.2 Definition of the basic formalism	50
2.3 Reasoning algorithms	81
2.4 Language extensions	98
3 Complexity of Reasoning <i>F. M. Donini</i>	105
3.1 Introduction	105
3.2 OR-branching: finding a model	109
3.3 AND-branching: finding a clash	117
3.4 Combining sources of complexity	124
3.5 Reasoning in the presence of axioms	127
3.6 Undecidability	133
3.7 Reasoning about individuals in ABoxes	140
3.8 Discussion	144

vi

Contents

3.9	A list of complexity results for subsumption and satisfiability	145
4	Relationships with other Formalisms <i>U. Sattler, D. Calvanese, and R. Molitor</i>	149
4.1	AI knowledge representation formalisms	149
4.2	Logical formalisms	161
4.3	Database models	174
5	Expressive Description Logics <i>D. Calvanese and G. De Giacomo</i>	193
5.1	Introduction	193
5.2	Correspondence between Description Logics and Propositional Dynamic Logics	195
5.3	Functional restrictions	202
5.4	Qualified number restrictions	209
5.5	Objects	213
5.6	Fixpoint constructs	217
5.7	Relations of arbitrary arity	221
5.8	Finite model reasoning	226
5.9	Undecidability results	232
6	Extensions to Description Logics <i>F. Baader, R. Küsters, and F. Wolter</i>	237
6.1	Introduction	237
6.2	Language extensions	238
6.3	Non-standard inference problems	270
Part II	Implementation	283
7	From Description Logic Provers to Knowledge Representation Systems <i>D. L. McGuinness and P. F. Patel-Schneider</i>	285
7.1	Introduction	285
7.2	Basic access	287
7.3	Advanced application access	290
7.4	Advanced human access	295
7.5	Other technical concerns	301
7.6	Public relations concerns	301
7.7	Summary	303
8	Description Logic Systems <i>R. Möller and V. Haarslev</i>	304
8.1	New light through old windows?	304
8.2	The first generation	305
8.3	Second generation Description Logic systems	313
8.4	The next generation: FaCT, DLP and RACER	324
8.5	Lessons learned	327

Table of Contents

[More information](#)

<i>Contents</i>		vii
9	Implementation and Optimization Techniques <i>I. Horrocks</i>	329
9.1	Introduction	329
9.2	Preliminaries	331
9.3	Subsumption-testing algorithms	336
9.4	Theory versus practice	341
9.5	Optimization techniques	347
9.6	Discussion	371
Part III Applications		375
10	Conceptual Modeling with Description Logics <i>A. Borgida and R. J. Brachman</i>	377
10.1	Background	377
10.2	Elementary Description Logic modeling	379
10.3	Individuals in the world	381
10.4	Concepts	384
10.5	Subconcepts	387
10.6	Modeling relationships	390
10.7	Modeling ontological aspects of relationships	392
10.8	A conceptual modeling methodology	399
10.9	The ABox: modeling specific states of the world	399
10.10	Conclusions	401
11	Software Engineering <i>C. A. Welty</i>	402
11.1	Introduction	402
11.2	Background	402
11.3	LASSIE	403
11.4	CODEBASE	408
11.5	CSIS and CBMS	409
12	Configuration <i>D. L. McGuinness</i>	417
12.1	Introduction	417
12.2	Configuration description and requirements	419
12.3	The PROSE and QUESTAR family of configurators	433
12.4	Summary	434
13	Medical Informatics <i>A. Rector</i>	436
13.1	Background and history	437
13.2	Example applications	441
13.3	Technical issues in medical ontologies	447
13.4	Ontological issues in medical ontologies	453
13.5	Architectures: terminology servers, views, and change management	456
13.6	Discussion: key lessons from medical ontologies	457

viii	<i>Contents</i>	
14	OWL: a Description-Logic-Based Ontology Language for the Semantic Web <i>I. Horrocks, P. F. Patel-Schneider, D. L. McGuinness, and C. A. Welty</i>	458
14.1	Background and history	458
14.2	Steps towards integration with the Semantic Web: OIL and DAML+OIL	461
14.3	Full integration into the Semantic Web: OWL	467
14.4	Summary	484
15	Natural Language Processing <i>E. Franconi</i>	487
15.1	Introduction	487
15.2	Semantic interpretation	488
15.3	Reasoning with the logical form	492
15.4	Knowledge-based natural language generation	497
16	Description Logics for Databases <i>A. Borgida, M. Lenzerini, and R. Rosati</i>	500
16.1	Introduction	500
16.2	Data models and Description Logics	504
16.3	Description Logics and database querying	513
16.4	Data integration	517
16.5	Conclusions	523
Appendix	Description Logic Terminology <i>F. Baader</i>	525
A.1	Notational conventions	525
A.2	Syntax and semantics of common Description Logics	526
A.3	Additional constructors	531
A.4	A note on the naming scheme for Description Logics	534
	<i>Bibliography</i>	537
	<i>Index</i>	593
