- 20-moment approximation, 65
- 630 nm radiation, 249, 364
- absorption cross section, 255, 256, 349, 584
- accidental resonance, 232
- activation energy, 237, 247
- AE index, 346
- airglow, 248, 328
- Akebono spacecraft, 522
- AL index, 346
- Alfvén wave speed, 20, 186, 223
- Alfvén waves, **185, 221**
- Akebono spacecraft, 533
- ambipolar diffusion, 126, 151
- ambipolar diffusion coefficient, 127, 152
- ambipolar diffusion equations, 127, 133, 152, 350, 370, 608
- ambipolar electric field (see polarization electric field)
- ambipolar expansion, 135, 136
- Ampère’s Law, 68, 161, 214, 561
- anisotropic ion temperatures, 64, 66, 124
- anisotropic pressure tensor, 124, 220, 459
- anomalous electron temperatures, 418
- anomalous resistivity, 196
- Appleton anomaly, 30, 371
- arc length of magnetic field, 338
- Archimedes’ spiral, 17, 217
- Arecibo incoherent scatter radar, 538, 543
- Arhenius equation, 238
- associative detachment, 246
- astronomical unit (AU), 19
- Atmosphere Explorer satellites (AE), 259, 373, 522, 525
- atmospheric gravity waves (AGW), 295, 381
- atmospheric models:
  - empirical terrestrial (MSIS), 318, **594**
  - empirical Titan, 319
  - empirical Venus (VIRA), 319, **594**
- atmospheric sputtering, 324
- atomic oxygen red line, 233, 249, 364
- attachment reaction, 245
- AU index, 346
- auroral blobs, **432**
- auroral electrons (see particle precipitation)
- auroral oval, 25, 400, 420, 421
- average drift velocity, 53
- average speed, 53, 579
- axial-centered dipole, 341
- azimuthal electric field, 339
- $\beta$ (of a plasma), 20, 215
- B field divergence, 133, 338, 458
- ballerina skirt model, 17
- beam spreading, 270
- Bennett ion mass spectrometer, 525
- Bessel function, 559
- bi-Maxwellian velocity distribution, 66, 219, 459
- bimolecular reaction, 232, 236, 242
- Birkeland current, 401, 424
- Boltzmann collision integral, 52, 85, **567**

convection:
anisotropic temperatures, 63, 124, 458
electromagnetic drift, 29, 138, 217, 339, 371, 399, 410
frictional heating, 121, 124, 414
heat source for the thermosphere, 447
increased chemical reaction rate, 416
momentum source for the thermosphere, 413, 414, 445
convection channels, 438
convection electric field, 29, 122, 138, 139, 399
convection models, 405
convection patterns:
- four-cell, 408
- three-cell, 408
- two-cell, 29, 402, 406, 407, 408, 409
- multi-cell, 410, 414

convective derivative, 57, 209, 361, 369
convective zone, 11
cooling rates, 276, 361
core, 11
Coriolis acceleration (force), 28, 125, 291
corona, 12
coronal holes, 13
coronal loops, 12
coronal mass ejection (CME), 15, 445
coronal streamer, 12
co-rotation speed, 502
co-rotational electric field, 339, 402, 404
Coulomb collisions (see also collision frequency), 76, 83, 98, 360
Coulomb logarithm, 84
Cowling conductivity, 345
critical frequency, 346, 533
critical level, 321
cross B field plasma transport: 137–139
diamagnetic drift, 138, 402
electromagnetic drift, 138, 339
gravitational drift, 138, 376
cross section (see absorption and ionization cross sections)
cross sectional area, 338, 458
current continuity, 213, 426
current density, 68, 142, 210, 519
current sheet, 17, 25
current systems: 423
electrojet, 345, 445, 448
lunar, 344
solar-quiet, 344
currents:
- Birkeland, 401, 423
cusp, 425
- NBZ, 424
- Region 1, 423
- Region 2, 423
cusp neutral fountain, 434
cut-off frequency, 160, 179, 182, 185
cyclotron frequency, 45, 121, 174, 202, 377, 560

D region, 30, 245, 353
Debye length, 45, 84, 129, 171, 560
Debye shielding, 83
Debye sphere, 45, 84
declination, 343, 376
derivative of vectors in a rotating frame, 290
descending layers, 379
detached plumes, 374
detachment, 245, 354
diamagnetic cavity, 43
diamagnetic current, 215
diamagnetic drift, 138, 402
differential scattering cross section, 81, 570
diffuse auroral patches, 420
diffuse auroral precipitation, 420
diffusion coefficients:
- ambipolar diffusion, 127, 152
classical, 115, 121, 305
major ion, 127
minor ion, 130
perpendicular to B, 139
thermal, 151, 582
diffusion equations:
- ambipolar, 127, 131, 152, 350
classical, 115, 370
magnetic, 216
major ion, 127
minor ion, 130
diffusion in velocity space, 571
diffusion thermal coefficient, 150, 581
diffusion thermal heat flow, 150
diffusion velocity, 207
diffusive equilibrium:
- ambipolar, 306, 351
- classical, 306, 351
major ion, 306, 351
minor ion, 132
dip angle, 338, 344
dipolar coordinates, 340
dipole magnetic field, 337
dipole moment, 23, 337
disappearing ionosphere, 489
discrete auroral arcs, 420
dispersion relations, 162, 170, 172–186, 201, 223
displacement current, 185
dissociative excitation, 247
dissociative recombination, 232, 243–245, 314, 353, 483, 484, 497
distribution function, 51, 53, 59, 65, 273, 521
disturbance dynamo, 373
disturbance electric fields, 373
diurnal tide, 300, 344
divergence of electrodynamic drift, 405
divergence theorem, 57, 227, 554
DMSP satellites, 374, 409, 421, 523
Doppler residual, 534
Doppler shift, 534
double adiabatic energy equations, 219
double dot product, 58, 61, 571, 603
double layers, 196
drift energy, 199
Index

drift meter, 525

drift motion, 265
drift velocity, 53, 57, 207, 410, 455, 524
drifting Maxwellian, 59, 92, 418, 459, 576

pressure tensor, 57, 62
self-similar, 136
stress tensor, 63, 122, 125, 144, 148, 292
thermal conduction, 118, 146, 150, 151, 152, 293, 362, 581
transport properties:
ambipolar diffusion, 127, 131, 151, 350
diffusion, 115, 126, 130, 131, 151, 216, 350, 370
diffusion-thermal heat flow, 150, 581
electrical conduction, 141, 142, 345
thermal conduction, 118, 144–147, 152, 293, 317, 362, 489, 491, 581
thermal diffusion, 150, 151, 582
thermoelectric effect, 101, 145, 150
viscosity, 116, 145, 292, 294
transverse mode, 160
traveling ionospheric disturbance (TID), 385, 390, 445
Triton, 42, 508
tropopause, 27
troposphere, 27, 381
turbopause, 306
two-stream approximation (see photoelectron calculations)
two-stream instability, 188, 196, 418

_Ulysses_, 21
unit dyadic, 55, 88, 119, 219, 225, 578, 603
upper hybrid oscillations, 172, 201
Uranus, 38, 501

Van Allen radiation belt, 26
velocity-dependent correction factors, 98
velocity moments:
density, 53
drift velocity, 53
heat flow for || energy, 64
heat flow for ⊥ energy, 64
heat flow tensor, 54
heat flow vector, 54
higher-order pressure tensor, 54
parallel temperature, 64
perpendicular temperature, 64
pressure tensor, 54

stress tensor, 55
temperature, 54
velocity space, 51, 56, 556
Venus, 33, 482
vertical column density, 257
vibrational excitation, 247, 279–282, 496
_Viking_, 356, 492–495
VIRA (Venus international reference atmosphere), 319, 595, 596
virtual height, 533
viscosity, 117, 145, 292–294
Vlasov equation, 52
_voyagers_, 21, 38, 496–498, 501, 503, 508

water cluster ions, 30, 354
wave modes, 201
wave number-4 pattern, 383
wave–particle interactions, 365, 418, 464, 467
weak shocks, 195, 507
weakly ionized plasma, 30, 113, 120, 154
westward traveling surge, 448
whistler waves, 202
wind filtering, 384
winter helium bulge, 457

zenith angle, 256
