	<i>Preface</i>	<i>page xi</i>
	<i>Acknowledgements</i>	xv
1	Elementary methods for linear OΔEs	1
	1.1 Basic definitions and notation	1
	1.2 The simplest OΔEs: solution by summation	4
	1.2.1 Summation methods	5
	1.2.2 The summation operator	8
	1.3 First-order linear OΔEs	9
	1.4 Reduction of order	12
	1.5 OΔEs with constant coefficients	15
	1.6 Factorization	18
	1.7 Transformation to a known linear OΔE	24
	Notes and further reading	30
	Exercises	31
2	Simple symmetry methods for OΔEs	35
	2.1 Nonlinear OΔEs: some basics	35
	2.2 What is a symmetry?	37
	2.2.1 Symmetries of geometrical objects	37
	2.2.2 Lie symmetries of differential and difference equations	40
	2.2.3 Not all symmetries change solutions	42
	2.2.4 Characteristics and canonical coordinates	43
	2.3 Lie symmetries solve first-order OΔEs	45
	2.4 How to find Lie symmetries of a given OΔE	48
	2.4.1 First-order OΔEs	48
	2.4.2 Second- and higher-order OΔEs	52
	2.5 Reduction of order for nonlinear OΔEs	58

viii

Contents

2.6	First integrals: the basics	62
2.7	Direct methods for finding first integrals	65
2.8	Indirect methods for constructing first integrals	67
	Notes and further reading	70
	Exercises	71
3	Extensions of basic symmetry methods	76
3.1	Geometrical aspects of Lie point transformations	76
3.2	Lie point symmetries of systems of OΔEs	80
3.3	Dynamical symmetries	82
3.4	The commutator	86
3.5	Multiple reductions of order	91
3.6	Partitioned OΔEs	93
3.7	Variational OΔEs	95
3.8	Variational symmetries and first integrals	99
	Notes and further reading	102
	Exercises	102
4	Lattice transformations	108
4.1	Transformations of the total space	108
4.1.1	Lattice maps	110
4.1.2	Fibre-preserving transformations	113
4.1.3	Lattice transformations of a PΔE	113
4.2	What are the orders of a given PΔE?	114
4.3	Minimization of order	118
4.4	Initial-value problems for scalar PΔEs	121
4.5	Solutions that fill the plane	123
4.6	Symmetries from valid lattice maps	129
4.6.1	Trivial symmetries	129
4.6.2	Lattice symmetries	131
	Notes and further reading	133
	Exercises	134
5	Solution methods for PΔEs	138
5.1	Notation for PΔEs	138
5.2	Factorizable PΔEs	139
5.3	Separation of variables	143
5.4	Wavelike solutions of PΔEs	145
5.5	How to find Lie symmetries of a given PΔE	148
5.6	Some simple uses of symmetries	157
5.6.1	Invariant solutions	157
5.6.2	Linearization by a point transformation	159

<i>Contents</i>		ix
	Notes and further reading	160
	Exercises	161
6	Conservation laws	165
	6.1 Introduction to conservation laws	165
	6.2 Conservation laws for linear PΔEs	167
	6.3 The direct method	169
	6.4 When are two conservation laws equivalent?	174
	6.5 Variational PΔEs	181
	6.6 Noether's Theorem for PΔEs	183
	6.7 Noether's Second Theorem	186
	6.8 Constrained variational symmetries	188
	Notes and further reading	190
	Exercises	192
	<i>References</i>	198
	<i>Index</i>	202
