<i>Preface</i>	<i>page xi</i>
<b>Part I General strategies for effective teaching</b>	<b>1</b>
<b>Introduction</b>	<b>3</b>
<b>1 Main objectives for the meeting on innovation in teaching/learning astronomy</b> Jay M. Pasachoff and Rosa M. Ros	11
<b>2 Learning astronomy by doing astronomy</b> John R. Percy	13
<b>3 Hands-On Universe – Europe (EU-HOU)</b> Roger Ferlet	23
<b>4 Life on Earth in the atmosphere of the Sun: a multimedia manual</b> E. V. Kononovich, T. V. Matvejchuk, O. B. Smirnova, G. V. Jakunina, and S. A. Krasotkin	27
<b>5 A model of teaching astronomy to pre-service teachers</b> Bill MacIntyre	32
<b>6 How to teach, learn about, and enjoy astronomy</b> Rosa M. Ros	39
<b>7 Clickers: a new teaching tool of exceptional promise</b> Douglas Duncan	48
<b>8 Educational opportunities in pro-am collaboration</b> Richard Tresch Fienberg and Robert Stencel	55
<b>9 Teaching history of astronomy to second-year engineering students at the University of Chile</b> José Maza	58

vi *Contents*

<b>10</b>	<b>Teaching the evolution of stellar and Milky Way concepts through the ages: a tool for the construction of a scientific culture using astrophysics</b>	
	G. Theureau and L. Klein	62
<b>11</b>	<b>International Astronomical Union – education programs</b>	
	Jay M. Pasachoff	70
<b>12</b>	<b>Astronomy in culture</b>	
	Magda Stavinschi	75
<b>13</b>	<b>Light pollution: a tool for astronomy education</b>	
	Margarita Metaxa	85
<b>14</b>	<b>Worldwide distance-learning university astronomy</b>	
	Stewart Eyres, Barbara Hassall, and Ian Butchart	91
<b>15</b>	<b>Edible astronomy demonstrations</b>	
	Donald Lubowich	98
<b>16</b>	<b>Amateur astronomers as public outreach partners</b>	
	Michael A. Bennett	106
<b>17</b>	<b>Does the Sun rotate around Earth or does Earth rotate around the Sun? An important aspect of science education</b>	
	Syuzo Isobe	110
<b>18</b>	<b>Using sounds and sonifications for astronomy outreach</b>	
	Fernando J. Ballesteros and Bartolo Luque	113
<b>19</b>	<b>Teaching astronomy and the crisis in science education</b>	
	Nick Lomb and Toner Stevenson	116
<b>20</b>	<b>Astronomy for all as part of a general education</b>	
	J. E. F. Baruch, D. G. Hedges, J. Machell, K. Norris, and C. J. Tallon	122
<b>21</b>	<b>Cosmic deuterium and social networking software</b>	
	Jay M. Pasachoff, Terry-Ann K. Suer, Donald A. Lubowich, and Tom Glaisyer	128
	<b>Poster highlights</b>	132
	<b>Astronomy in the laboratory</b>	
	Bunji Suzuki	132

**Contents**

vii

<b>Crayon-colored planets: using children's drawings as guides for improving astronomy teaching</b>	viii
Ana Beatriz de Mello, D. N. Epitácio Pereira, E. A. M. Gonzalez, R. V. Nader, and B. C. G. Lima	134
<b>Challenges of astronomy: classification of eclipses</b>	135
S. Vidovic and S. Segan	
<b>Malargüe light pollution: a study carried out by measuring real cases</b>	135
B. García, A. Risi, M. Santander, A. Cicero, A. Pattini, M. A. Cantón, L. Córica, C. Martínez, M. Endrizzi, and L. Ferrón	
<b>Simple, joyful, instructive: ignite the joy for astronomy</b>	138
Yasuhiro Hanaoka and Shinpei Shibata	
<b>Successive innovative methods in introducing astronomy courses</b>	139
Tapan K. Chatterjee	
<b>The 2005 annular eclipse: a classroom activity at EPLA</b>	139
Herminia Filgaira-Alcalá	
<b>The Armagh Observatory Human Orrery</b>	140
M. E. Bailey, D. J. Asher, and A. A. Christou	
<b>What mathematics is hidden behind the astronomical clock of Prague?</b>	142
Michal Krizek, Alena Solcová, and Lawrence Somer	
<b>Solar System – Practical Exercises and Astronomy – Practical Works for secondary scholars</b>	143
Aleksandar S. Tomic	
<b>Astronomy in the training of teachers and the role of practical rationality in sky observation</b>	143
Paulo S. Bretones and M. Compiani	
<b>Part II Connecting astronomy with the public</b>	145
<b>Introduction</b>	147
<b>22 The IAU Working Group on communicating astronomy with the public: status report</b>	
Dennis R. Crabtree, Lars Lindberg Christensen, and Ian Robson	151
<b>23 Astronomy outreach: informal education</b>	156
Julieta Fierro	
<b>24 Integrating audio and video podcasting into existing E/PO programs</b>	
Aaron Price	160
<b>25 The IAU's communication strategy, hands-on science communication, and the communication of the planet definition discussion</b>	
Lars Lindberg Christensen	163

viii *Contents*

<b>26 Getting a word in edgeways: the survival of discourse in audiovisual astronomy</b> T. J. Mahoney	177
<b>27 A critical evaluation of the new Hall of Astronomy of the University of Mexico Science Museum</b> Silvia Torres-Peimbert and Consuelo Doddoli	183
<b>28 Revitalizing astronomy teaching through research on student understanding</b> Timothy F. Slater	189
<b>29 The TENPLA project (1): popularization of astronomy under cooperation between students and educators in Japan</b> M. Hiramatsu, K. Kamegai, N. Takanashi, and K. Tsukada	198
<b>30 The TENPLA project (2): activities for the popularization of astronomy</b> K. Kamegai, M. Hiramatsu, N. Takanashi, and K. Tsukada	199
<b>Poster highlights</b>	203
<b>An astronomer in the classroom: Observatoire de Paris's partnership between teachers and astronomers</b> Alain Doressoundiram and Caroline Barban	203
<b>Astronomy and space sciences in Portugal: communication and education</b> Pedro Russo and Mariana Barrosa	204
<b>Gemini Observatory outreach</b> Maria Antonieta Garcia	204
<b>Part III Effective use of instruction and information technology</b>	207
<b>Introduction</b>	209
<b>31 ESO's astronomy education program</b> Douglas Pierce-Price, Claus Madsen, Henri Boffin, and Gonzalo Argandoña	212
<b>32 US student astronomy research and remote observing projects</b> Mary Ann Kadooka, James Bedient, Sophia Hu, Rosa Hemphill, and Karen J. Meech	218
<b>33 A global network of autonomous observatories dedicated to student research</b> Richard Gelderman	226

**Contents** ix

<b>34 Remote telescopes in education: report of an Australian study</b> David H. McKinnon and Lena Danaia	233
<b>35 Visualizing large astronomical data holdings</b> C. Christian, A. Conti, and N. Gaffney	243
<b>Poster highlights</b>	245
<b>An educational CD-Rom based on the making of the Second Guide Star Catalogue</b> R. L. Smart, G. Bernardi, and A. Vecchiato	245
<b>Astronomia.pl portal as a partner for projects aimed at students or the public</b> Krzysztof Czart and Jan Pomierny	245
<b>Development of a remote cooperative observation system for telescopes with P2P agent network by using location information</b> Takuya Okamoto, Seiichi X. Kato, Yuji Konishi, and Masato Soga	247
<b>Image processing for educators in Global Hands-On Universe</b> James P. Miller, C. R. Pennypacker, and G. L. White	248
<b>The Pomona College undergraduate 1-meter telescope, astronomy laboratory, and remote observing program</b> B. E. Penprase	250
<b>Part IV Practical issues connected with the implementation of the 2003 IAU resolution on the Value of Astronomy Education, passed by the IAU General Assembly, 2003</b>	251
<b>Introduction</b>	253
<b>36 Stellar evolution for students of Moscow University</b> E. V. Kononovich and I. V. Mironova	258
<b>37 Astronomy for everybody: an approach from the CASAO/NAUH view</b> María Cristina Pineda de Carías	262
<b>38 Toward a new program in astronomy education in secondary schools in Turkey</b> Z. Aslan and Z. Tunca	272
<b>39 Universe awareness for young children: some educational aspects and a pilot project</b> Cecilia Scorza, George Miley, Carolina Ödman, and Claus Madsen	276
<b>40 Education in Egypt and Egyptian response to eclipses</b> Ahmed A. Hady	281

x *Contents*

<b>41</b>	<b>Astronomy in the cultural heritage of African societies</b>	
	Paul Baki	288
<b>42</b>	<b>Education at the Pierre Auger Observatory: movies as a tool in science education</b>	
	Beatriz García and Cristina Raschia	293
<b>43</b>	<b>Freshman seminars: interdisciplinary engagements in astronomy</b>	
	Mary Kay Hemenway	300
<b>44</b>	<b>Astronomy for teachers</b>	
	Julieta Fierro	306
<b>45</b>	<b>Daytime utilization of a university observatory for laboratory instruction</b>	
	John R. Mattox	310
	<b>Poster highlights</b>	315
	<i>Astronomy education in the Republic of Macedonia</i>	
	O. Galbova and G. Apostolovska	315
	<i>L'Aula del Cel: communicating astronomy at school level</i>	
	A. T. Gallego, A. Ortiz-Gil, and M. Gómez Collado	315
	<i>Gemini Observatory's innovative education and outreach for 2006 and beyond</i>	
	Janice Harvey	316
	<i>A history of astronomy teaching in Serbian schools</i>	
	S. Vidojevic and S. Segan	317
	<i>News from the Cosmos: daily astronomical news web page in Spanish</i>	
	Amelia Ortiz-Gil	317
	<i>Reproduction of William Herschel's metallic mirror telescope</i>	
	N. Okamura, S. Hirabayashi, A. Ishida, A. Komori, and M. Nishitani	318
	<i>History of Ukrainian culture and science in astronomical toponymy</i>	
	Iryna B. Vavilova	321
	<i>The Universe: helping to promote astronomy</i>	
	Rosa M. Ros and Javier Moldón Vara	321
	<i>Astronomy education in Ukraine, the school curriculum, and a lecture course at Kyiv Planetarium</i>	
	N. S. Kovalenko, K. I. Churyumov, and E. V. Dirdovskaya	323
	<b>Conclusions</b>	324
	<i>Author index</i>	325
	<i>Index</i>	329
