
Index

- Abelian type theorem, 9
- arithmetic distribution, 44, 302
- boundary stopping time, 349
- condition
 - Cramér's, xx, 234, 303, 371, 398
 - Lindeberg's, 502
- conjugate distribution, 301, 382
- convolution, 14
 - of sequences, 44
- Cramér
 - approximation, 235, 251–253, 298, 433
 - condition, xx, 234, 303, 371, 398
 - deviation zone, 252
 - transform, 301, 382, 393
- density, subexponential, 46
- deviation function, 305, 321, 392, 555
- deviations,
 - moderately large, 309
 - normal, 309
 - super-large, 308
- distribution
 - arithmetic, 302
 - classes, *see below*
 - conjugate, 301, 382
 - exponentially tilted, 301
 - function of, 335
 - locally subexponential, 46, 47, 358
 - regularly varying exponentially decaying, 307
 - semiexponential, 29, 233
 - stable, 61
 - strongly subexponential, 237, 250, 274, 546
 - subexponential, 14
 - tail, 11, 14, 57
- domain of attraction, 62
- Esscher transform, 301
- exponentially tilted distribution, 301
- extreme deviation zone, 252
- function
 - of distribution, 335
 - deviation, 305, 321, 392, 555
 - generalized inverse, 58, 83, 508
 - locally constant (l.c.), 16, 348, 358–360
 - regularly varying (r.v.f.), 1
 - slowly varying (s.v.f.), 1
 - upper-power, 28, 224, 307, 362, 358
 - ψ -locally constant (ψ -l.c.), 18, 224
- generalized
 - inverse function, 58, 83, 508
 - renewal process, 543
- inequality, Kolmogorov–Doob type, 82
- integral representation theorem, 2
- intermediate deviation zone, 252
- invariance principle, 76, 395
- iterated logarithm, law of the, 79
- Kolmogorov–Doob type inequality, 82
- large deviation rate function, 305, 321, 392
- law of the iterated logarithm, 79
- level lines, 320
- Lindeberg condition, 502
- locally constant function, 16, 348, 358–360
- locally subexponential distribution, 46, 47, 358
- Markov time, 345, 428
- martingale, 506
- moderately large deviations, 309
- normal deviations, 309
- partial factorization, 548, 554
- process
 - generalized renewal, 543
 - renewal, 543
 - stable, 78, 469
 - Wiener, 75, 76, 472
- random walk, 14
 - defined on a Markov chain, 508
- regularly varying exponentially decaying distribution, 307
- regularly varying function (r.v.f.), 1

- renewal process, 543
- semixponential distribution, 29, 233
- sequence
 subexponential, 44
 convolution of, 44
- Skorokhod metric, 75
- slowly varying function (s.v.f.), 1
- stable
 distribution, 61
 process, 78, 469
- stopping time, 345, 428
 boundary, 349
- strongly subexponential distribution, 237, 250, 274, 546
- subexponential
 density, 46
 distribution, 14
 sequence, 44
- super-large deviations, 308
- tail, two-sided, 57
- Tauberian theorem, 10
- theorem
 Abelian type, 9
 integral representation, 2
 Tauberian, 10
 uniform convergence, 2
 Wiener–Levy, 55
- time, stopping, 345, 428
- transform
 Cramér, 301, 382, 393
 Esscher, 301
 Laplace, 9
- transient phenomena, 439, 471, 503
- uniform convergence theorem, 2
- upper-power function, 28, 224, 307, 358, 362
- Wiener process, 75, 76, 472, 502, 503
- Wiener–Levy theorem, 55
- ψ -(asymptotically) locally constant (ψ -l.c.)
 function, 18, 224
- Boundary classes**
- $\mathcal{G}_{x,K}$, 586
 $\mathcal{G}_{x,n}$, 155, 455
 $\mathcal{G}_{x,T,\varepsilon}$, 526
 $\mathcal{G}_{x,T}$, 526
- Conditions and properties**
- $[\langle, \rangle]$, 551
 $[\cdot, \langle] ([\cdot, \rangle], [\cdot, =])$, 81, 234
 $[\langle, \cdot] ([\rangle, \cdot], [=, \cdot])$, 81
 $[\langle, \langle] ([\rangle, \langle], [\langle, \rangle], [=, =])$, 81
 $[\cdot, \leq]$, 104
 $[\cdot, \langle]_{\mathbb{U}}$, 483, 514
 $[\cdot, =]_{\mathbb{U}}$, 514
- $[\langle, \langle]_{\mathbb{U}} ([\langle, =]_{\mathbb{U}})$, 509
 $[\cdot, \langle]_{\mathbb{UR}}$, 492
 $[\mathbf{A}]$, 414
 $[\mathbf{A}_{0+}]$, 418
 $[\mathbf{A}_{0,n}]$, 323
 $[\mathbf{A}_0]$, 322, 418
 $[\mathbf{A}_1]$, 418
 $[\mathbf{A}_2]$, 419
 $[\mathbf{A}_m]$, 323
 $[\mathbf{A}_n]$, 322
 $[\mathbf{B}]$, 382
 $[\mathbf{C}]$, 303
 $[\mathbf{C}_0]$, 392
 $[\mathbf{C}_a]$, 391
 $[\mathbf{CA}]$, 252
 $[\overline{\mathbf{CA}}]$, 253
 $[\mathbf{CA}^*]$, 288
 $[\mathbf{D}]$, 167, 218, 250
 $[\mathbf{D}_1]$, 223, 294
 $[\mathbf{D}_A]$, 172
 $[\mathbf{D}_{(1, O(q))}]$, 144
 $[\mathbf{D}_{(1,q)}]$, 144, 167, 197, 217, 362, 363
 $[\mathbf{D}_{(2,q)}]$, 198
 $[\mathbf{D}_{h,q}]$, 143
 $[\mathbf{D}_{(k,q)}]$, 199
 $[\mathbf{D}_{\Omega}]$, 403, 406
 $[\mathbf{D}_{\Omega}^*]$, 407
 $[\mathbf{H}]$, 458, 498
 $[\mathbf{H}_{\Delta}]$, 462, 501
 $[\mathbf{H}_{\Delta}^D]$, 502
 $[\mathbf{HUR}]$, 469
 $[\mathbf{N}]$, 444, 485
 $[\mathbf{Q}]$, 138, 454, 512
 $[\mathbf{Q}_T]$, 551
 $[\mathbf{Q}^*]$, 423
 $[\mathbf{R}_{\alpha,\rho}]$, 57
 $[\mathbf{S}]$, 466
 $[\mathbf{U}]$, 137, 442, 483
 $[\mathbf{U}_1]$, $[\mathbf{U}_2]$, 442, 483
 $[\mathbf{U}^{\infty}]$, 443, 483
 $[\mathbf{UR}]$, 464, 492
 $[\Phi_T]$, 551
- Distribution classes**
- \mathcal{C} , 371
 \mathcal{ER} , 307
 \mathcal{ESe} , 308
 \mathcal{L} , 16
 \mathcal{M}_s , 391
 \mathcal{R} , 11, 15, 371
 $\mathcal{R}(\alpha)$, 11
 \mathcal{S} , 13, 14
 $\mathcal{S}(\alpha)$, 38
 \mathcal{S}_+ , 14
 \mathcal{S}_{loc} , 47
 \mathcal{Se} , 371
 $\mathcal{Se}(\alpha)$, 29
 \mathcal{S}^* , 347, 358
