<i>Preface to the First Edition</i>	<i>page</i> vii
<i>Preface to the Second Edition</i>	xi
<i>Acknowledgments</i>	xiii
<b>1 Introduction</b>	1
1.1 The solar corona	4
1.2 Solar magnetism and the corona	7
1.3 Coronae of stars	13
<b>2 Brief history of coronal studies</b>	21
2.1 Early history	21
2.2 The rise and fall of coronium*	35
2.3 Early solar photography	38
2.4 Spectroscopic observations*	41
<b>3 The coronal spectrum</b>	47
3.1 Observations	48
3.2 Basic principles of spectroscopy	51
3.3 Radiation from hot plasmas*	64
<b>4 The solar cycle</b>	86
4.1 The corona in the solar cycle	86
4.2 Coronal structure	93
4.3 Magnetic field generation	104
<b>5 Ground-based observations</b>	116
5.1 Eclipse observations	116
5.2 Observatories and coronagraphs	135
5.3 Radio wavelength observations	141
5.4 Plasma properties*	144
5.5 The solar corona at radio wavelengths	153

vi	<i>Contents</i>	
<b>6</b>	<b>Observations from space: I. The first four decades</b>	165
6.1	Introduction	165
6.2	The early days	166
6.3	The <i>Skylab</i> mission	173
6.4	Active-Sun missions	185
<b>7</b>	<b>Activity of the inner corona</b>	197
7.1	Observations of structure and variability	198
7.2	The MHD approximation	215
7.3	Loop model atmospheres	229
7.4	Mechanisms of coronal heating	235
<b>8</b>	<b>Observations from space: II. Recent missions</b>	246
8.1	International cooperation	246
8.2	The Transition Region and Coronal Explorer	252
8.3	Techniques for soft x-ray imaging*	255
8.4	The <i>Hinode</i> mission	266
8.5	The <i>Solar Dynamics Observatory</i>	271
<b>9</b>	<b>The solar wind</b>	274
9.1	Coronal holes and the solar wind	274
9.2	How the corona affects the Earth	293
<b>10</b>	<b>Solar flares and coronal mass ejections</b>	297
10.1	Solar flares	298
10.2	The standard model	302
10.3	Flare observations	310
10.4	Stellar flares*	326
10.5	Coronal mass ejections	331
	<i>Notes</i>	346
	<i>References</i>	353
	<i>Further reading</i>	380
	<i>Index</i>	381
