Cambridge University Press has no responsibility for
the persistence or accuracy of URLs for external or
third-party internet websites referred to in this publication,
and does not guarantee that any content on such
websites is, or will remain, accurate or appropriate.

Every effort has been made in preparing this publication to provide accurate and up-to-date information which is
in accord with accepted standards and practice at the time of publication. Although case histories are drawn from
actual cases, every effort has been made to disguise the identities of the individuals involved. Nevertheless, the
authors, editors and publishers can make no warranties that the information contained herein is totally free from
error, not least because clinical standards are constantly changing through research and regulation. The authors,
editors and publishers therefore disclaim all liability for direct or consequential damages resulting from the use of
material contained in this publication. Readers are strongly advised to pay careful attention to information
provided by the manufacturer of any drugs or equipment that they plan to use.
