## Technology and Psychological Well-being

In the modern world we are surrounded by technology. Gadgets such as cell phones, portable computers, and electronic diaries accompany us throughout the day. But is this a good thing? Are we being served by these technological wonders, or have we become enslaved by them? Does constant availability via technology make us more efficient or more stressed? Is our ability to connect with others all over the world, day or night, making us more sociable or turning us into recluses in a virtual world? This book considers the impact of technology on the different spheres of our life – work, home, family, and leisure – and assesses ways in which to build better communication between technology developers and society to ensure that technology enhances our lives and psychological well-being, rather than damaging them.

YAIR AMICHAH-HAMBURGER is the Director of the Research Center for Internet Psychology at the Sammy Ofer School of Communications at the Interdisciplinary Center (IDC), Herzliya, Israel.

Without the help of a number of people this book could not have come into being. My grateful thanks to the authors for their hard work and excellent contributions. My gratitude to those whose comments and encouragement were invaluable: Albert Auster, Susan B. Barnes, Kent Campbell, Joanne Cohoon, Randall Collins, Lori Foster Thompson, Shaul Fox, Efrat Gil, David Haken, Tsahi Hayat, Matthew Kalman, Tal Katz-Navon, Meni Koslowski, Moshe Krausz, Ann Lane, Gerhard E. Lenski, Ingvor Pettersson, Rivka Ribak, Jason T. Siegel, Louise Sylvester, Keith Weber, Patrice L. (Tamar) Weiss, and Mina Westman.

My thanks go to Andrew Peart and Carrie Cheek at Cambridge University Press, who helped me materialize my ideas into a book. And a special thank-you to my beloved wife Debbie, without whose ideas and support this book would never have seen the light of day.
