1 Introduction to mobile telecommunications  
1.1 Architecture of a mobile telecommunication system  
1.2 Communication networks  
1.3 Digital wireless communications  
1.4 History of mobile telecommunication systems  
References  

2 Introduction to UMTS  
2.1 The 3rd Generation Partnership Project  
2.2 System architecture  
2.3 Interfaces and protocols  
2.4 UMTS data streams  
2.5 Frequency allocation  

3 Radio transmission and reception  
3.1 Radio transmission and reception in release 99  
3.2 High speed packet access  
3.3 Performance of UMTS  
References  

4 Operational procedures  
4.1 Management of signalling connections  
4.2 Power-on procedures  
4.3 Security procedures  
4.4 Procedures in idle mode and common channel states  
4.5 Procedures in CELL_DCH state  
4.6 Power-off procedures

## Table of Contents

5 Services and their implementation 165  
5.1 Service classification 165  
5.2 Quality of service 166  
5.3 Voice calls 170  
5.4 GPRS 179  
5.5 Other user and bearer services 187  
5.6 Toolkits 193  
5.7 Charging and billing 200  

6 Future developments 203  
6.1 The IP multimedia subsystem 203  
6.2 Long Term Evolution 211  
6.3 Towards 4G 216  

Bibliography 219  
List of abbreviations 221  
Index 231
