

Index

- adjoint function, 156, 162, 234
 almost-prime numbers, xv, 142, 147, 149, 255
 Ankeny–Onishi sieve limit, 144, 146, 228
 Ankeny–Onishi sieve method, xv, 20, 71, 74, 79, 191, 227
- Bateman–Horn conjecture, 12
 block of terms, 46
 Bombieri–Vinogradov Theorem, 97, 100, 101, 149, 152
 Bradley, D. M., xvi, 152, 233
 Brun, V., xv, 6, 13, 20, 27, 71, 122
 Brun–Hooley sieve method, 27
 Buchstab identity, xv, 20, 28, 33, 62, 71, 95
 Buchstab’s function, 161
- Chen’s Theorem, 101, 102
 combinatorial function, 27, 70
 complementary function, 19
- de Bruijn, N. G., 158
 DHR sieve method, 79
 Dickman’s function, 161, 184, 190, 191
 dimension of a sieve, xv, 8, 130
 divisor closed, 27, 70
- Ein(\cdot) function, 193, 241
 Elliott, P. D. T. A., 152
 Elliott–Halberstam conjecture, 152
 Eratosthenes–Legendre formula, 4, 13
- Fourier inversion, 181
 Franze, C., xvi
 Fundamental Lemma, 29, 35, 36, 42, 43, 62, 70, 74, 78, 81–83, 95, 104, 121
 Fundamental Sieve Identity, 19, 21, 26, 27
- g -tuple, *see* prime g -tuples conjecture
 Goldston, D. A., 12, 151, 152
 Graham, S., xvi
 Greaves, G., xvi
- Halberstam, H., xvi, 152
 Harrington, W. J., 95
 Hildebrand, A. J., xvi, 191
 Hua, L. K., 158
- independent events, 6
 iteration methods, 28, 71, 95
 Iwaniec inner product, 156, 158, 162, 178, 229, 234
 Iwaniec, H., xvi, 12, 27, 95, 151
- Jurkat, W. B., 66
 Jurkat–Richert sieve method, xv, 28, 71, 95, 122
- Landau, E., 40, 126
 Laplace transform, 157, 170, 177, 188, 242, 250
 LeVeque, W. J., 95
 linear sieve, 8
 Linnik’s dispersion method, 151
- Mathematica*[®] mathematical software system, xvi, 233, 239
 Mertens’ product formula, 6, 41, 44, 57, 63
 Mertens’ sum formula, 9, 40, 50, 51, 125, 126
 method of steepest descent, *see* saddle point method
 modifying factor, 13, 16, 23
 Moebius inversion formula, 15
- Newton’s method, 202, 246
 numerical integration, 148, 226, 240, 243

- prime g -tuples conjecture, 7, 12, 125, 151
- Prime Ideal Theorem, 126
- Prime Number Theorem, 6, 126
- probabilistic model, 6
- Pythagorean triples, 152

- quadrature, *see* numerical integration
- quasi-prime, 39, 42

- Rankin's method, 30, 35
- Rawsthorne, D. A., 66
- remainder terms, 4, 71, 95
- remainder terms, assumptions about, 5, 17, 136
- remainder terms, bounds on, 34, 35, 62, 101, 108
- Richert's Fundamental Identity, 28
- Richert, H.-E., v, xvi, 155
- Rosser, J. B., 95
- Rosser–Iwaniec inequalities, 163
- Rosser–Iwaniec sieve method, xv, 62, 67, 71, 74, 79, 82, 95

- saddle point method, 243
- Selberg optimal example, 81, 95
- Selberg sieve method, xv, 13, 17, 21, 28, 29, 43, 61, 71, 95
- Selberg weighted sieve, 150, 151
- Selberg, A., 228
- sieve, 3
- sieving limit, 79, 135, 144, 226, 228
- sift, 3
- sifting density, 8
- Soundararajan, K., 152

- Topping-Up Lemma, 44
- twin prime conjecture, 6, 97, 99, 101, 150, *see also* prime g tuples conjecture

- Vaughan, R. C., 102

- Weber, H., 128
- Wheeler, F. S., xvi, 152, 233
