978-0-521-89619-1 - Algebraic and Geometric Methods in Statistics

Edited by Paolo Gibilisco, Eva Riccomagno, Maria Piera Rogantin and Henry P. Wynn

Table of Contents

[More information](#)

Contents

<i>List of contributors</i>	page ix
<i>Preface</i>	xiii
<i>Frequently used notations and symbols</i>	xvi
1 Algebraic and geometric methods in statistics <i>The editors</i>	1
Part I Contingency tables	25
2 Maximum likelihood estimation in latent class models for contingency table data <i>S. E. Fienberg, P. Hersh, A. Rinaldo and Y. Zhou</i>	27
3 Algebraic geometry of 2×2 contingency tables <i>A. B. Slavković and S. E. Fienberg</i>	63
4 Model selection for contingency tables with algebraic statistics <i>A. Krampe and S. Kuhnt</i>	83
5 Markov chains, quotient ideals and connectivity with positive margins <i>Y. Chen, I. Dinwoodie and R. Yoshida</i>	99
6 Algebraic modelling of category distinguishability <i>E. Carlini and F. Rapallo</i>	111
7 The algebraic complexity of maximum likelihood estimation for bivariate missing data <i>S. Hoşten and S. Sullivant</i>	123
8 The generalised shuttle algorithm <i>A. Dobra and S. E. Fienberg</i>	135
Part II Designed experiments	157
9 Generalised design: interpolation and statistical modelling over varieties <i>H. Maruri-Aguilar and H. P. Wynn</i>	159
10 Design of experiments and biochemical network inference <i>R. Laubenbacher and B. Stigler</i>	175
11 Replicated measurements and algebraic statistics <i>R. Notari and E. Riccomagno</i>	187

viii	<i>Contents</i>	
12	Indicator function and sudoku designs <i>R. Fontana and M. P. Rogantin</i>	203
13	Markov basis for design of experiments with three-level factors <i>S. Aoki and A. Takemura</i>	225
	Part III Information geometry	239
14	Introduction to non-parametric estimation <i>R. F. Streater</i>	241
15	The Banach manifold of quantum states <i>R. F. Streater</i>	257
16	On quantum information manifolds <i>A. Jenčová</i>	265
17	Axiomatic geometries for text documents <i>G. Lebanon</i>	277
18	Exponential manifold by reproducing kernel Hilbert spaces <i>K. Fukumizu</i>	291
19	Geometry of extended exponential models <i>D. Imparato and B. Trivellato</i>	307
20	Quantum statistics and measures of quantum information <i>F. Hansen</i>	327
	Part IV Information geometry and algebraic statistics	339
21	Algebraic varieties vs. differentiable manifolds in statistical models <i>G. Pistone</i>	341
	Part V On-line supplements (available for download from www.cambridge.org/9780521896191)	367
	<i>Coloured figures for Chapter 2</i>	369
22	Maximum likelihood estimation in latent class models for contingency table data <i>Y. Zhou</i>	373
23	The generalised shuttle algorithm <i>A. Dobra and S. E. Fienberg</i>	395
24	Indicator function and sudoku designs <i>R. Fontana and M. P. Rogantin</i>	408
25	Replicated measurements and algebraic statistics <i>R. Notari and E. Riccomagno</i>	424
26	Geometry of extended exponential models <i>D. Imparato and B. Trivellato</i>	427
