Every effort has been made in preparing this book to provide
accurate and up-to-date information which is in accord with
accepted standards and practice at the time of publication.
Although case histories are drawn from actual cases, every effort
has been made to disguise the identities of the individuals involved.
Nevertheless, the authors, editors, and publishers can make no
warranties that the information contained herein is totally free from
error, not least because clinical standards are constantly changing
through research and regulation. The authors, editors, and publishers
therefore disclaim all liability for direct or consequential damages
resulting from the use of material contained in this book. Readers are
strongly advised to pay careful attention to information provided by
the manufacturer of any drugs or equipment that they plan to use.
