

## SUBJECT INDEX

- Albert's Theorem, 103  
 Albert-Brauer-Hasse-Noether Theorem, 121  
 Algebra, 14  
   algebraic, 155  
   Artinian, 19  
   central simple, 89  
   finite-dimensional semi-simple, 51  
   graded, 181  
   locally finite, 162  
   radical of, 15  
 Algebraic algebra  
   of bounded degree, 155  
 Algebraic extension, 76  
 Annihilator  
   ideal, 174  
   left, 171  
   right, 171  
 Artinian algebra, 19  
 Artinian ring, 18  
   semi-simple, 25  
   simple, 48  
   torsion free, 30  
 Augmentation ideal, 58  
  
 Brauer group, 93  
 Burnside Problem, 62, 162, 167, 187, 193  
   Bounded, 62, 168  
   for matrix groups, 66  
 Burnside's theorem, 146  
  
 Cayley's theorem, 124  
 Cayley-Hamilton theorem, 65  
 Central division algebra, 91  
  
 Central simple algebra, 89  
   reverse of, 91  
 Centralizer, 94  
   double, 104  
 Centroid, 46  
 Character of representation, 125  
   irreducible, 138  
   orthogonality relation of, 134, 138  
   unit, 128  
 Class function, 126  
 Class sum, 129  
 Cohomology group, 117  
 Commuting ring, 5  
 Contragredient representation, 134  
 Crossed product, 108  
 Cyclotomic polynomial, 66  
  
 Degree  
   of division algebra, 119  
   of homogeneous element, 181  
   of irreducible representation, 127  
 Dense action, 40  
 Density theorem, 39, 41  
 Derivation, 100  
   inner, 100  
 Desargues' theorem, 69  
 Direct product, 52  
 Division algebra  
   central, 91  
   degree of, 119  
   index of ( $e_{\mathbb{F}}(D)$ ), 119  
   real, 102  
   splitting field of, 106

- Division ring  
   finite, 70, 102  
 Double Centralizer theorem, 104  
  
 Equivalent representations, 125  
 Essential left ideal, 171  
 Extension  
   algebraic, 76  
   inseparable, 76  
   separable, 76  
  
 Factor set, 108  
   condition, 108  
   equivalence of, 110  
   normalized, 110  
   product of, 11  
 Faithful module, 3  
 Filter, 179  
   ultra, 179  
 Frobenius' theorem, 146  
 Frobenius' theorem on real  
   division algebras, 102  
  
 Goldie Ring, 171  
 Goldie's theorem, 176  
 Golod-Shafarevitch theorem, 188  
 Graded algebra, 181  
 Group  
   locally finite, 62  
   torsion, 62  
 Group algebra, 26, 28, 51  
   of  $p$ -group, 58  
  
 $H^*(G, K')$ , 111  
 Homogeneous element, 181  
 Hurwitz's theorem, 144  
  
 Ideal  
   locally finite, 163  
   nil, 13  
   nilpotent, 13, 14  
   quasi-regular, 12  
   regular right, 10  
 Idempotent, 21  
  
 Identity  
   polynomial, 153  
   standard, 154  
 Index of nilpotence, 32  
 Inseparable extension, 76  
 Irreducible constituent, 126  
   multiplicity of, 126  
 Irreducible module, 5  
 Irreducible representation, 125  
   degree of, 127  
   character of, 135  
  
 Jacobson radical, 9  
 Jacobson's theorem, 73  
 Jacobson-Noether theorem, 78  
  
 Kaplansky's theorem, 157  
 Kothe conjecture, 21  
 Kronecker product, 135  
 Kurosh problem, 162, 167, 187,  
   192  
  
 Large left ideal, 171  
 Left  
   annihilator, 171  
   essential ideal, 171  
   large ideal, 171  
   order, 170  
   quotient ring, 170  
 Levitzki's theorem, 37  
 Linear representation, 131  
 Locally finite  
   algebra, 162  
   group, 62  
   ideal, 163  
   radical, 163  
  
 Maschke's theorem, 26  
 Module, 1  
   faithful, 3  
   irreducible, 5  
   of semi-simple Artinian ring,  
   97, 98

- representation, 124
  - unitary, 2
- Multiplication ring, 46
- Multiplicity of representation, 126
- Nil ideal, 13
- Nilpotent basis, 56
- Nilpotent ideal, 13, 14
- Nilpotence
  - of element, 13
  - of ideal, 13, 14
  - index of, 32
- Noetherian ring, 35, 171
- Noether-Skolem theorem, 99
- Order, 170
- Ore condition, 170
- Ore's theorem, 170
- Orthogonality relations, 134, 138
- Pappus' theorem, 69
- Peirce decomposition, 32
- Polynomial identity, 153
- Posner's theorem, 181, 184
- p-regular element, 131
- Prime ring, 44
- Primitive ring, 39
- Quasi-regular ideal, 12
- Quaternions, 93, 96
- Quotient ring, 170
- Radical, 9
  - algebra, 15
  - Jacobson, 9
  - locally finite, 163
- Regular
  - element, 170
  - p-regular, 131
  - quasi, 12
  - right ideal, 10
- Regular representation, 26, 127
- Representation
  - character of, 125
  - contragradiant, 134
  - equivalence of, 125
  - irreducible, 125
  - linear, 131
  - module, 124
  - right regular, 26, 127
  - unit, 128
- Right annihilator, 171
- Right-quasi-regular, 12
- Right-quasi-inverse, 12
- Ring
  - Artinian, 18
  - commuting, 5
  - of endomorphisms, 4
  - Goldie, 171
  - multiplication, 46
  - Noetherian, 35, 171
  - prime, 44
  - primitive, 39
  - semi-prime, 172
  - semi-simple, 16
  - semi-simple Artinian, 25
  - simple, 33
  - subdirectly irreducible, 52
  - torison free, 30
- Schur's lemma, 5
- Semi-prime ring, 172
- Semi-simple Artinian ring, 25
  - finite dimensional algebra, 51
- Semi-simple ring, 16, 54
  - commutative, 54
  - Wedderburn theorem, 34
- Separable extension, 76
- Simple algebra
  - central, 89
  - reverse of, 92
- Simple ring, 33
  - Wedderburn-Artin theorem, 48

Cambridge University Press

**198****SUBJECT INDEX**

Subdirectly irreducible ring, 52  
Subdirect sum of rings, 52  
Ultra products, 179  
Wedderburn theorems, 48

## NAME INDEX

- Albert, A. A., 89, 103, 121, 123  
 Amitsur, S. A., 15, 28, 37, 38, 89,  
 123, 150, 155, 168, 179  
 Artin, E., 38, 48, 87, 88, 89, 123  
 Auslander, M., 28, 38, 89, 123  
 Belluce, R., 87  
 Bergman, G., 40, 67  
 Brauer, R., 89, 93, 94, 107, 121,  
 123, 130, 149  
 Burnside, W., 56, 62, 63, 64, 65,  
 66, 145, 146, 162, 168, 187, 193  
 Chase, S., 89, 123  
 Chevalley, C., 41  
 Curtis, C., 149  
 Deuring, M., 123  
 Dickson, L. E., 89, 103  
 Eckmann, B., 141, 149  
 Faith, C. C., 87, 169  
 Goldie, A. W., 44, 169, 171, 172,  
 173, 175, 176, 177, 178, 183,  
 186  
 Goldman, O., 123  
 Golod, E. S., 63, 68, 187, 188, 194  
 Hall, M., 149
