.....  
Every effort has been made in preparing this book to provide accurate and up-to-date information that  
is in accord with accepted standards and practice at the time of publication. Although case histories  
are drawn from actual cases, every effort has been made to disguise the identities of the individuals  
involved. Nevertheless, the authors, editors, and publishers can make no warranties that the information  
contained herein is totally free from error, not least because clinical standards are constantly changing  
through research and regulation. The authors, editors, and publishers therefore disclaim all liability  
for direct or consequential damages resulting from the use of material contained in this book. Readers  
are strongly advised to pay careful attention to information provided by the manufacturer of any drugs  
or equipment that they plan to use.

This book is dedicated to all the courageous women and their families who have faced the challenges of epilepsy, often quietly and stoically, to come out defined not by their illness, but by their *courage, resilience and grace*. Someone once wrote “just because we carry it well, doesn’t mean it isn’t heavy”. Despite the weight of their diagnosis, women with epilepsy and their families are the true drivers of change in the work we do. I want to thank my husband Carlo, my children M & J who have supported me in the long hours of work to bring this book to fruition, my co-editor Dr. Emma Voinescu who worked in the trenches with me to refine and build a new edition, the authors of each chapter who generously contributed their expertise and time to update this book, Julianne Hazlewood and Brandy McFadden both determined visionaries who long recognized the value of our collective stories, and last but certainly not least, my dear friend Dr. Autumn Klein, who co-edited the first edition of this book and shared the vision that women’s health and priorities should be a fundamental and forefront part of epilepsy care.
