1 Skill-mix for primary and chronic care: definitions, conceptual framework and relevance for policy and practice	1
1.1 Introduction: why skill-mix?	1
1.2 Aims of this skill-mix volume	3
1.3 Policy relevance: why now?	4
1.4 Skill-mix and the health workforce: definitions	7
1.5 The diversity and skill-mix of health professions in Europe: a snapshot	10
1.6 Conceptual framework of the skill-mix study	16
1.7 Methods	18
1.8 Overview of this volume	20
2 Skill-mix changes: what evidence on patient outcomes and health systems?	39
2.1 Overview of the evidence: skill-mix interventions, professions, care sectors	39
2.2 Evidence on outcomes: what skill-mix interventions are promising?	47
2.3 Strength of the evidence and limitations	59
2.4 Transferability of the findings	61
2.5 Conclusions	62
	ix

x	<i>Contents</i>
3	Implementing skill-mix changes: lessons for policy and practice 70
3.1	Introduction 70
3.2	Overview of the evidence on implementation 71
3.3	Evidence synthesis: the role of education and health workforce planning and skill-mix 72
3.4	Evidence synthesis: the role of policy and financing in implementing skill-mix changes 75
3.5	Evidence synthesis: organizational strategies to implement skill-mix changes 77
3.6	Strength of the evidence and limitations 79
3.7	Policy lessons and recommendations 80
4	Keeping people healthy: skill-mix innovations for improved disease prevention and health promotion 83
4.1	Introduction 83
4.2	Research evidence on outcomes of skill-mix changes addressing prevention and health promotion 85
4.3	Skill-mix innovations and reforms: trends 107
4.4	Conclusions and outlook 111
5	Caring for people with acute conditions: transitional care, relocation of care and new division of work 117
5.1	Introduction 117
5.2	Evidence on outcomes based on an overview of reviews 118
5.3	Skill-mix strategies addressing acute conditions 119
5.4	Outcomes of skill-mix interventions 128
5.5	Strengths and limitations of the reviewed evidence 134
5.6	Conclusions on skill-mix intervention effectiveness in acute and transitional care 134
5.7	Acute and transitional care skill-mix innovations and reforms 135
5.8	Conclusions 144
6	Chronic conditions and multimorbidity: skill-mix innovations for enhanced quality and coordination of care 152
6.1	Introduction 152
6.2	Evidence on outcomes of skill-mix interventions for chronic conditions and multimorbidity 154

<i>Contents</i>	xi
6.3 Country developments and trends in skill-mix innovation for chronic care and multimorbidity across Europe	197
6.4 Conclusions	207
7 Long-term and palliative care at home: skill-mix innovations for enhanced responsiveness and satisfaction of patients and caregivers	221
7.1 Introduction	221
7.2 Evidence on outcomes	223
7.3 Skill-mix innovations and reforms: overview of trends across Europe	244
7.4 Conclusions	252
8 Addressing the particular challenges of patients living in rural and remote areas and for disadvantaged groups: skill-mix innovations to improve access and quality of care	262
8.1 Introduction	262
8.2 Skill-mix in relation to access to services and evidence on outcomes	264
8.3 Skill-mix innovations and reforms: country skill-mix examples for vulnerable and rural populations	279
8.4 Conclusions	288
9 Education and planning: anticipating and responding to skill gaps, changing skill needs and competencies	294
9.1 Introduction	294
9.2 Overview of the evidence on education, planning and skill-mix	297
9.3 Role of education and health workforce planning in the implementation of skill-mix innovations	297
9.4 Conclusions	313
10 Implementing skill-mix innovations: role of policy and financing	321
10.1 Introduction	321
10.2 Review of the evidence	322
10.3 Policy and implementation: trends and country examples	333
10.4 Conclusions	340
