## Index

- class of semiexponential distributions, 216
- compound Poisson process, xiv
- compound renewal process (CRP), xii
  - homogeneous, xii
  - inhomogeneous, xii
  - with stationary increments, 6
- Cramér transform, 278, 287
- deviation function, 97, 238
- distribution
  - subexponential, 342
- first boundary crossing problem, 198
- function
  - subexponential, 342
- fundamental function, 113
- governing sequence for CRP, xii, 1
- Harris chain, 49
- level line, 199
- locally constant function, 276
- long-tailed function, 276
- main domain of analyticity, 115
- Markov additive process (MAP), 51, 52
- mixing condition, 49
- partial triangular array scheme, 84
- renewal measure, 93
- renewal process, xi
  - simple, xi, xiv
- second boundary crossing problem, 198
- second deviation function, 96, 97
- trajectory
  - most probable, 208
  - shortest, 208
- uniformly integrable random variable, 84
- upper power function, 276
