	<i>Preface</i>	<i>page xv</i>
1	Introduction to Enterprise Risk Management	1
1.1	Summary	1
1.2	Risk and Uncertainty	1
1.3	Insurance Risk Management	3
1.4	Financial Risk Management	4
1.5	Actuarial Risk Management	8
1.6	Asset-Liability Management	10
1.7	Quantitative Risk Management	11
1.8	Project Risk Management	13
1.9	Operational Risk Management	13
1.10	Crisis Management	14
1.11	Enterprise Risk Management (ERM)	14
1.12	The ERM Process	16
1.13	Risk Governance	27
1.14	Risk Budgeting	30
1.15	Notes and Further Reading	31
1.16	Exercises	34
2	Risk Taxonomy	39
2.1	Summary	39
2.2	Introduction	39
2.3	External Risks: Financial Markets	40
2.4	External Risks: Macroeconomic	46
2.5	External Risks: Political and Regulatory	47
2.6	External Risks: Environmental	48
2.7	Internal Risks: Operational	50

2.8	Internal Risks: Strategic	58
2.9	Reputational Risk	60
2.10	Risk Management Examples	61
2.11	Notes and Further Reading	66
2.12	Exercises	67
3	Risk Measures	71
3.1	Summary	71
3.2	Introduction	71
3.3	Risk Measures for Capital Requirements	73
3.4	Coherent Risk Measures	87
3.5	Estimating Risk Measures Using Monte Carlo Simulation	93
3.6	Quantifying Uncertainty in VaR and Expected Shortfall Estimates	96
3.7	Other Measures of Risk	100
3.8	Notes and Further Reading	101
3.9	Exercises	101
4	Frequency-Severity Analysis	106
4.1	Summary	106
4.2	Introduction	106
4.3	Modelling Loss Frequency	107
4.4	Loss Severity Distributions	111
4.5	The Aggregate Loss Distribution	113
4.6	Risk Measures for the Aggregate Loss Distribution	122
4.7	Notes and Further Reading	125
4.8	Exercises	126
	Appendix: R Code for FFT and Panjer Recursions	129
5	Extreme Value Theory	132
5.1	Summary	132
5.2	Introduction	132
5.3	Distributions of Block Maxima	133
5.4	Distribution of Excess Losses Over a Threshold	144
5.5	Example: US Hurricane Losses, 1940–2012	152
5.6	Notes and Further Reading	157
5.7	Exercises	157
6	Copulas	163
6.1	Summary	163
6.2	Introduction	163

Contents

ix

6.3	The Multivariate Normal Distribution	164
6.4	The Multivariate Student's t (MVT) Distribution	167
6.5	What Is a Copula?	169
6.6	Examples of Copulas	175
6.7	Survival Copulas	182
6.8	Copula Bounds	184
6.9	Measures of Dependency	184
6.10	Tail Dependence	191
6.11	Archimedean Copulas	193
6.12	Copula Estimation	194
6.13	Monte Carlo Simulation of Bivariate Copulas	195
6.14	Notes and Further Reading	197
6.15	Exercises	198
7	Stress Testing	202
7.1	Summary	202
7.2	Introduction	202
7.3	Stress and Scenario Testing	202
7.4	Purposes and Uses of Stress Testing	205
7.5	Developing Scenarios	208
7.6	Regulatory Stress Tests	214
7.7	Stress and Scenario Testing: Failures and Successes	218
7.8	Notes and Further Reading	224
7.9	Exercises	224
8	Market Risk Models	227
8.1	Summary	227
8.2	Introduction	227
8.3	Empirical Behaviour of Equity Prices	228
8.4	Geometric Brownian Motion (GBM)	233
8.5	The Independent Lognormal Model (ILN)	235
8.6	The GARCH Model	236
8.7	Regime-Switching Models	244
8.8	Fitting Models to Returns Data	250
8.9	Choosing a Model	255
8.10	Notes and Further Reading	258
8.11	Exercises	258
9	Short-Term Portfolio Risk	262
9.1	Summary	262
9.2	Introduction	262

9.3	VaR and Expected Shortfall for Portfolios	263
9.4	VaR and Expected Shortfall for Portfolios of Assets and Derivatives	268
9.5	Empirical VaR and Expected Shortfall	279
9.6	Backtesting	283
9.7	Notes and Further Reading	288
9.8	Exercises	288
10	Economic Scenario Generators	291
10.1	Summary	291
10.2	Introduction	291
10.3	Considerations for the ESG	292
10.4	Economic Scenario Generator Design	295
10.5	Model Fitting and Robustness	298
10.6	A Pension Example	302
10.7	Notes and Further Reading	304
10.8	Exercises	304
11	Interest Rate Risk	307
11.1	Summary	307
11.2	The Term Structure of Interest Rates	307
11.3	Interest Rate Sensitive Securities	310
11.4	Duration and Convexity	313
11.5	Hedging Interest Rate Sensitive Portfolios	321
11.6	Behaviour of the Interest Rate Term Structure	326
11.7	Notes and Further Reading	332
11.8	Exercises	333
12	Credit Risk	336
12.1	Summary	336
12.2	Types of Credit Risk	336
12.3	Basic Credit Model Components	343
12.4	Modelling Individual Default Behaviour	347
12.5	Portfolio Credit Risk Models	356
12.6	Notes and Further Reading	363
12.7	Exercises	364
13	Liquidity Risk	368
13.1	Summary	368
13.2	Introduction	368
13.3	Liquidity Metrics	372

<i>Contents</i>		xi
13.4	Liquidity Risk Management	374
13.5	Liquidity Stress Testing	376
13.6	Liquidity-Adjusted Risk Measures	382
13.7	Emergency Contingency Funding Plan	385
13.8	Notes and Further Reading	386
13.9	Exercises	387
14	Model Risk and Governance	391
14.1	Summary	391
14.2	Introduction	391
14.3	Model Risk	392
14.4	The Lifecycle of a Model	396
14.5	Model and Parameter Risk	402
14.6	Model Governance	412
14.7	Risk Treatment for Model Risk	414
14.8	Notes and Further Reading	415
14.9	Exercises	416
15	Risk Mitigation Using Options and Derivatives	421
15.1	Summary	421
15.2	Introduction	421
15.3	Market Risk	421
15.4	Hedging Market Risk with Option Combinations	430
15.5	Interest Rate Derivatives	433
15.6	Credit Risk	435
15.7	Exchange Rate Risk	436
15.8	Commodity Price Hedging	437
15.9	Notes and Further Reading	438
15.10	Exercises	438
16	Risk Transfer	442
16.1	Summary	442
16.2	Introduction	443
16.3	Risk Transfer through Traditional Insurance	443
16.4	Captive Insurance	452
16.5	Securitization of Insurance Risk	456
16.6	Catastrophe Bonds	458
16.7	Other Forms of Securitized P&C Insurance	468
16.8	Longevity and Mortality Risk Securitization	470
16.9	Notes and Further Reading	477
16.10	Exercises	477

17	Regulation of Financial Institutions	482
17.1	Summary	482
17.2	Introduction	482
17.3	Basel II and III	483
17.4	Solvency II	499
17.5	Notes and Further Reading	507
17.6	Exercises	509
18	Risk-Adjusted Measures of Profit and Capital Allocation	511
18.1	Summary	511
18.2	Risk-Adjusted Performance Measures	511
18.3	Economic Capital Allocation: Objectives	516
18.4	Capital Allocation: Methods	523
18.5	Euler Allocation Methods	538
18.6	Capital Allocation Based on Default Cost	542
18.7	Using RAROC and Capital Allocation	550
18.8	Further Reading	551
18.9	Exercises	552
19	Behavioural Risk Management	556
19.1	Summary	556
19.2	Introduction	556
19.3	Bias and Decision-Making	557
19.4	Overcoming Bias	578
19.5	Cumulative Prospect Theory	581
19.6	Notes and Further Reading	590
19.7	Exercises	591
20	Crisis Management	594
20.1	Summary	594
20.2	Introduction	594
20.3	Examples of Crises and Responses	596
20.4	Crisis Preparation	602
20.5	Crisis Response	610
20.6	Post Crisis	616
20.7	Ethics, Governance, and Crisis Management	617
20.8	Further Reading	620
20.9	Exercises	620

<i>Appendix</i>	Probability and Statistics Review	622
A.1	Summary	622
A.2	Introduction	622
A.3	Random Variables	622
A.4	Moments and Quantiles	625
A.5	Important Distributions	632
A.6	Maximum Likelihood Estimation	635
A.7	Bayesian Statistics	638
A.8	Monte Carlo Simulation	640
A.9	Multivariate Distributions	648
	<i>Bibliography</i>	650
	<i>Index</i>	658
