

Index

- N*-way arrays, 46, 47
- Q*-learning, 425, 429, 430, 433, 434, 437
- k*-fold cross-validation, 161
- k*-means, 203
- k*-nearest neighbors (kNN), 204
- k*-fold cross-validation, 159–161
- k*-means, 178, 179, 181

- activation function, 214, 221, 225, 226
- actor–critic, 438
- actuator, 324, 325
- adjoint, 328, 370–373, 376, 377, 383
- agent, 419, 420, 423–425, 434, 439, 440, 442, 443
- Akaike information criterion (AIC), 163, 164, 189, 285
- alternating descent method, 144
- autoencoder, 233, 236–239, 244, 245, 303, 305, 440, 521, 523–525, 540

- backpropagation (backprop), 215, 217, 219, 221, 222
- balanced input–output model, 375
- Bayesian information criterion (BIC), 163, 164
- Bellman optimality, 423, 427, 445–447
- boosting, 203, 205

- classification, 29, 33, 78, 117–120, 203, 204, 208, 209, 212, 213, 215, 217, 221, 228, 270, 411
- classification trees, 198, 202
- closed-loop control, 312, 315, 316
- clustering, 27, 28, 40, 198, 203, 204
- coherent structure, 4, 98, 260, 270, 328, 361
- compressed sensing, 17, 101–105, 109, 111, 260
- compression, 10, 11, 65, 85, 87, 90, 97, 98, 101, 109, 269
- control, 7, 53, 63, 102, 169, 257, 270, 286, 296, 328, 329, 361, 362, 389
- control theory, 102, 260, 311, 357, 361, 393, 396
- controllability, 53, 322, 324–327, 363–365, 368, 373
- convex optimization, 105, 146, 278, 330, 402
- convolutional neural network (CNN), 203, 224
- cost function, 313, 330, 331, 333, 341, 356, 389, 399, 404, 412
- CP tensor decomposition, 47–49
- cross-validation, 115, 116, 157–159, 168, 177, 179, 186, 191, 217, 271, 297
- curve fitting, 133, 134, 140

- data arrays, 46
- data labels, 168, 174–176, 221, 227
- data matrix, 35, 40, 47, 50, 120, 181, 211, 262, 272, 394, 467
- deep convolutional neural network (DCNN), 224–226
- deep learning, 208, 209, 224
- deep reinforcement learning, 419, 421, 436, 437
- DeepONet, 529, 531, 533
- dendrogram, 182, 183
- dimensionality reduction, 4, 7, 190, 260, 262, 311, 394, 450, 454
- discrete cosine transform (DCT), 107
- discrete empirical interpolation method (DEIM), 485, 500
- discrete wavelet transform, 85, 86, 91
- DMD eigenvalue, 263, 264
- DMD mode (also *dynamic mode*), 260, 262, 269, 270
- dynamic mode decomposition (DMD), 259, 260, 269
- dynamic programming, 425–427, 431, 432, 439, 444
- dynamical system, 9, 53, 228, 253, 254, 256–260, 275, 280, 286, 311–313, 333, 361, 486

- eigensystem realization algorithm (ERA), 270, 300, 373, 375
- ensemble learning, 202, 203, 205
- environment, 419–421, 423–425, 430, 436
- expectation-maximization algorithm (EM), 186, 187, 203, 204
- extremum-seeking control (ESC), 408, 409, 413

- fast Fourier transform, 3, 53, 63, 65, 98, 452
- feature engineering, 168, 173, 225, 513
- feedback control, 301, 311, 312, 315, 360
- feedforward control, 312, 354
- Fourier transform, 15, 53, 60, 61, 295, 347, 461, 487, 506

- Gabor transform, 76, 77
- Galerkin projection, 275, 279, 360, 452, 456, 501
- gappy POD, 457, 485, 501
- gated recurrent unit (GRU), 235, 244
- Gaussian mixture models (GMM), 186–188
- generative adversarial network (GAN), 240, 246

- gradient descent, 133, 139–141, 195, 211, 214, 220
 Gramian, 327, 363, 364, 366, 368
- Hankel matrix, 300, 371, 372, 376
 Hilbert space, 53, 286, 287, 289, 299
 hindsight experience replay, 439
- imitation learning, 434
 incoherent measurements, 110, 111
 information theory, 162
 inner product, 39, 46, 54, 109, 110, 289, 295, 360,
 364, 457, 458, 465, 486, 488
- Johnson–Lindenstrauss (JL), 111
- Kalman filter, 332–334, 342, 378, 380, 416
 kernel methods, 196, 271, 297
 Koopman eigenfunction, 298, 299
 Koopman operator, 289–291, 296
- Laplace transform, 63, 81–84, 347, 349, 351
 LASSO, 114, 115, 153, 159, 211, 219
 least-squares fit, 113, 134, 135, 158
 linear discriminant, 189, 190
 linear system, 16, 106, 138, 211, 257, 271, 281, 330,
 348, 354, 454
 linear–quadratic regulator (LQR), 328–330, 396, 404
 long short-term memory (LSTM), 235, 244, 248, 477,
 479
 low rank, 9, 121, 122, 168, 169, 360, 362, 456, 459,
 460, 465, 471, 485, 486
- machine learning, 22, 27, 87, 135, 157, 170, 172, 179,
 193, 196, 198, 203, 208, 221, 375
 Markov decision process (MDP), 421–423, 426, 429,
 434, 435, 444
 Markov parameters, 379
 max pooling, 226
 mixture models, 186–188, 203
 model predictive control (MPC), 393, 395, 396
 model reduction, 327, 360, 361, 502–504
 model selection, 133, 135, 153, 158, 162
 Moore’s law, 102
 multi-resolution analysis (MRA), 85
 multi-scale, 64, 271, 311
- naive Bayes, 203, 204
 neural networks, 140, 203, 208, 209, 222, 303
 neural operator, 529, 531, 533, 539
 noise, 105
- observability, 53, 286, 322, 324, 328, 340, 363–365,
 368, 373
 observable function, 286, 287, 296
 off-policy reinforcement learning, 426, 433, 434, 438
 on-policy reinforcement learning, 426, 433
 open loop, 402
 optimization
- gradient descent, 141
 steepest descent, 141
 outliers, 22, 113, 120, 136, 153
 over-determined system, 4, 17, 115, 133, 148, 276
- pagerank, 203, 205
 Pareto front, 155–157
 Perron–Frobenius operator, 259, 296
 physics-informed neural network (PINN), 533, 534
 policy function, 425, 426, 428–430, 435, 436, 438
 policy iteration, 425–429, 434
 polynomial basis functions, 195, 197
 principal component, 25, 28
 principal component analysis (PCA), 3, 7, 23, 41, 111,
 120, 208, 373
 principal components, 23, 25, 120
 proper orthogonal decomposition (POD), 3, 111, 260,
 273, 360, 362, 449, 455, 501
 pseudo-inverse, 4, 16, 18, 20, 106, 158, 159, 211, 213,
 214, 261, 262, 380
- quality function, 426, 429–431, 435–440
- radial basis function (RBF), 197, 244
 random forest, 198, 202
 randomized algorithms, 41, 43
 randomized SVD, 41, 42
 rank truncation, 169, 293
 recurrent neural network (RNN), 224, 233, 244, 477
 reduced-order model (ROM), 270, 470, 500
 reference tracking, 313, 316, 353, 404
 regression, 16, 19, 113, 133–135, 137, 175, 177, 178,
 219, 270, 274, 276, 277, 280, 375, 482
 reinforcement learning (RL), 168, 175, 389, 392, 400,
 419–421, 423, 425–427, 429, 433, 436, 438, 440,
 444
 restricted isometry property (RIP), 104, 111
 reward, 419, 421–425, 428, 430–433, 435, 439,
 440, 442
 reward shaping, 439
 ridge regression, 153
 robust control, 335, 340, 346, 347, 355
 robust fit, 153
 robust principal component analysis (rPCA), 120
 robust statistics, 153
- sampling rate, 104, 107
 SARSA, 433, 434
 sensor, 271, 301, 338, 340, 341, 343, 357, 375, 376,
 399, 408, 409, 414
 singular value decomposition (SVD), 3, 40, 43, 111,
 170, 260–262, 295, 361, 370, 456, 460,
 502, 504
 snapshot, 46, 261, 281, 328, 370–373, 394, 456, 460,
 465, 501, 504
 sparse identification of nonlinear dynamics (SINDy),
 275
 sparse regression, 113, 275–277, 280, 285, 482

- sparse representation, 97, 101, 117, 270
- sparsity, 105
- spectrogram, 76–78
- state space, 299, 360, 374
- stochastic gradient descent (SGD), 215, 217, 222
- supervised learning, 174, 175
- support vector machine (SVM), 193, 204
- system identification (system ID), 260, 270, 280, 300, 360, 361, 363, 375, 392, 393, 399
- temporal difference (TD) learning, 424, 425, 431–433, 440
- temporal difference error, 438
- temporal difference target, 437
- tensors, 46
- test data, 179, 181, 204
- training data, 189, 191, 193, 225, 227
- uncertainty principle, 80
- under-determined system, 4, 17, 102, 105, 106, 117, 133, 150, 209, 210
- unitary matrix, 15
- unsupervised learning, 168, 174, 175, 203
- value function, 422, 423, 425–433, 435, 436, 438–440, 445, 447
- value iteration, 425–429, 434
- wavelet, 85, 111
- windowed FFT (Gabor transform), 76
- withhold data, 189
