

Index

References such as “178–79” indicate (not necessarily continuous) discussion of a topic across a range of pages. Wherever possible in the case of topics with many references, these have either been divided into subtopics or only the most significant discussions of the topic are listed. Because the entire work is about “politics” and “Russia,” the use of these terms (and certain others that occur throughout the book) as entry points has been restricted. Information will be found under the corresponding detailed topics.
