	Introduction	1
	Part I The Long Period: Some Milestones	
1	A Brief History of Long-Run Economic Analysis	9
	1.1 Malthus	10
	1.1.1 The Principle of Population	11
	1.1.2 An Oscillatory Dynamic	12
	1.2 Marx	13
	1.2.1 Malthus and the Misleading Abstraction	13
	1.2.2 Historical Materialism	14
	1.3 Marshall	16
	1.3.1 Period Analysis	17
	1.3.2 The Fiction of the Stationary Equilibrium	18
	1.4 Kondratiev	19
	1.4.1 Quantitative and Qualitative Changes	20
	1.4.2 Reversible and Irreversible Processes	20
	1.4.3 Long-Run Cycles	21
	1.5 Rostow	22
	1.5.1 From the Traditional Society to the Economic Take-off	23
	1.5.2 Economic Growth as a Succession of Take-offs	25
	1.6 Solow and the Modern Theory of Growth	26
	1.6.1 Initial Conditions, the Production Function and the “Race” between Factors	27
	1.6.2 Beyond the Stationary State: Endogenous Growth Theory	28
	1.7 Towards a Genealogy of Unified Growth Theory?	30
2	Empirical Elements	32
	2.1 Production	33
	2.1.1 The Global Trend	34
	2.1.2 International Comparisons	36

2.2	Population	37
2.2.1	The Global Trend	37
2.2.2	International Comparisons	39
2.3	Output per Capita	40
2.3.1	The Global Trend	40
2.3.2	International Comparisons	42
2.4	A Major Qualitative Change	43
2.5	Towards the Concept of Economic Regime	45
2.5.1	North's (1981) Observation	45
2.5.2	Modelling History with Economic Regimes	47
2.6	Conclusion: The Empirical Bases of Unified Growth Theory	47
	Appendix 1: Further Reading	48

Part II Unified Growth Theory: Foundations

3	The Stagnation Regime	51
3.1	Modelling Production	54
3.1.1	Labour	55
3.1.2	Land	55
3.1.3	Knowledge	56
3.1.4	The Production Function	57
3.2	The Conditions for Growth	59
3.2.1	Growth of Total Output	59
3.2.2	Growth of Output per Capita	60
3.3	A Reformulation of the Principle of Population	61
3.4	Long-Run Fluctuations	64
3.5	International Comparisons during the Pre-industrial Era	69
3.6	Criticisms of the Malthusian Stagnation Model	71
3.6.1	Accumulation of Humans versus Accumulation of Ideas	72
3.6.2	Absolute Overpopulation versus Relative Overpopulation	72
3.6.3	Population Growth as the Driving Force of Economic Growth	73
3.7	Conclusions	74
	Appendix 3A.1: Further Reading	76
	Appendix 3A.2: Exercises	77
4	The Economic Take-Off	79
4.1	Technical Progress and Population	80
4.1.1	Scale Effects	80
4.1.2	Smith (1776) and the Division of Labour	81
4.1.3	Weyland (1816) and the Force of Necessity	83
4.1.4	Knowledge and Population Size: From Engels (1844) to Kremer (1993)	83
4.1.5	Revisiting the Accumulation of Knowledge	84

	4.2 A Modified Model	85
	4.2.1 The Conditions for Growth	85
	4.2.2 Four Cases	87
	4.3 The Regime Shift	87
	4.4 Comparison with the Chapter 3 Stagnation Model	90
	4.5 International Comparisons: The Timing of Take-off	92
	4.5.1 Initial Conditions: Land	92
	4.5.2 Initial Conditions: Population Size	94
	4.5.3 Initial Conditions: Stock of Knowledge	94
	4.6 The Industrial Revolution	96
	4.7 Conclusion	98
	Appendix 4A.1: Further Reading	99
	Appendix 4A.2: Exercises	100
5	Institutions and Distribution	102
	5.1 Institutions and Innovations	104
	5.1.1 The Failure and Success of Nations: Acemoglu and Robinson (2013)	104
	5.1.2 Modelling the Quality of Institutions	106
	5.1.3 Accumulation of Knowledge and Institutions	107
	5.2 A First Institutional Variant of the Model	108
	5.2.1 Hypotheses	108
	5.2.2 The Conditions for Growth	110
	5.2.3 Dynamics over the Long Period	110
	5.3 The Early British Take-off (1): The Glorious Revolution (1688)	113
	5.4 The Early British Take-off (2): A Commercial Empire	116
	5.5 Inequality and Institutional Progress	117
	5.5.1 Discontinuities in Institutional Dynamics	117
	5.5.2 Institutional Changes and Inequality	118
	5.6 A Second Institutional Variant of the Model	122
	5.6.1 From Institutions to Inequality	122
	5.6.2 Revisiting the Dynamics over the Long Period	123
	5.7 Conclusion	126
	Appendix 5A.1: Further Reading	127
	Appendix 5A.2: Exercises	128
6	The Natural Environment	130
	6.1 Finite Land and Congestion	132
	6.1.1 Land Congestion as a Limit to Population Growth: Marshall	132
	6.1.2 Congestion and Labour Productivity	134
	6.2 Revisiting the Dynamics over the Long Period	136
	6.3 Pollution and Environmental Damage	137
	6.3.1 Beyond Congestion: Pollution	137
	6.3.2 Modelling Pollution	139

6.3.3	Non-reproduction of the Natural Environment	140
6.3.4	Environmental Damage and the Reproduction of Humans	142
6.4	Environmental Damage and the Dynamics over the Long Period	143
6.4.1	Economic Dynamics over the Long Period	143
6.4.2	Regime Cycles	146
6.5	Conclusion	152
6.6	First Lessons: Relativism of Economic Laws and Latent Dynamics	152
	Appendix 6A.1: Further Reading	154
	Appendix 6A.2: Exercises	155
Part III Unified Growth Theory: Microeconomics of Regime Shift		
7	Economic Growth and Education	159
7.1	The Marginalist Revolution and the Study of Individual Decisions	161
7.1.1	Cournot	163
7.1.2	Jevons	163
7.2	Production and Knowledge Accumulation	165
7.3	Microeconomic Foundations: Objectives and Constraints	166
7.3.1	Modelling Individual Objectives	167
7.3.2	Modelling Constraints	167
7.3.3	The Problem of the Representative Individual	168
7.4	The Choice of the Education Investment	169
7.4.1	The First-Order Condition	169
7.4.2	The Second-Order Condition	170
7.4.3	The Existence of an Interior Solution	170
7.4.4	Determinants of the Optimal Education Level	172
7.4.5	Summary	172
7.5	The Dynamics over the Long Period	174
7.6	International Comparisons	177
7.6.1	Differences in Initial Conditions	177
7.6.2	Differences in Structural Parameters (1): Preferences	178
7.6.3	Differences in Structural Parameters (2): Investment and Knowledge	180
7.7	Revisiting the Timing of Economic Take-offs	180
7.8	Conclusion	182
	Appendix 7A.1: Further Reading	183
	Appendix 7A.2: Exercises	183
8	The Birth of Institutions	185
8.1	Individuals and Institutions	188
8.1.1	Sources of Institutional Changes	188
8.1.2	Modelling Citizen Participation	189
8.1.3	The Problem of the Citizen	190
8.1.4	Conditions for a Positive Citizen Participation	190

	8.2 The Dynamics over the Long Period	192
	8.2.1 Hypotheses	192
	8.2.2 Economic and Institutional Dynamics	193
	8.3 International Comparisons: Small Gaps, Large Effects	197
	8.4 Back to the Industrial Revolution	199
	8.5 Criticisms and Potential Extensions	201
	8.6 Conclusion	201
	Appendix 8A.1: Further Reading	202
	Appendix 8A.2: Exercises	202
9	Lifestyles and the Natural Environment	204
	9.1 Pollution and Lifestyles	206
	9.1.1 Modelling Pollution: Behavioural Aspects	206
	9.1.2 Environmental Efforts and Pollution	207
	9.2 Individuals and Pollution	208
	9.2.1 Modelling the Choice of Environmental Efforts	208
	9.2.2 The First-Order Condition	209
	9.2.3 The Second-Order Condition	209
	9.2.4 Conditions for a Positive Environmental Effort	210
	9.2.5 Summary	211
	9.3 The Dynamics over the Long Period	212
	9.3.1 Hypotheses	212
	9.3.2 Revisiting the Dynamics over the Long Period	214
	9.3.3 Regime Cycles Revisited	216
	9.4 Criticisms	219
	9.5 Conclusion	221
	Appendix 9A.1: Further Reading	221
	Appendix 9A.2: Exercises	222
	Conclusion: Continuity and Discontinuity in History	224
