INDEX

Locators in italic refer to figures
Abbreviations used in subheadings:
NCDs = non-communicable diseases

A Life’s Work (Cusk), 147–8
abortion, girl fetuses, 112–13
adaptive responses,
    developmental, 134–7, 135
    factors influencing, 154–8
    and health inequalities, 121–2,
    130–4, 173
prediction of future
    environment, 121–2, 137–9
see also epigenetics; fetal
development
adolescence, 160–3
adoption, practices, 8
age
    control over our lives, ix
    timing of conception, 118
aggressive behaviour, 5
Ahlfeld, Johann Friedrich, 67–9
alcohol, effects on development,
    86
allergic reactions, 32, 33
amniotic fluid, 78–80
An Essay on the Principle of
    Population (Malthus), 122
anaemia, iron deficiency, 62
anoxia during birth, 51
Anthropocene, 87
Aristotle, 69, 95–7
artificial insemination, 113–17,
    114
asexual reproduction, 92–3
bacterial reproduction strategies, 92
Barcroft, Joseph, 68
Barrie, J.M, 36–7
birth, xiv
    assistants, 53, 53–5
    birthplans, 44–7
    birthweight, 64, 65
    caesarean sections, 52, 55–9, 57
    case example (Rachel), 40–1,
    45, 52,
    couvade, 44–5
    evolutionary perspectives, 56,
    54–5, 61
    fetal growth, 47
    historical perspectives, 38–9,
    39, 53, 55–9, 57
    hole in heart closure, 76–7
    human-specific difficulties of,
    50–2
    of Julius Caesar, 57
    man-midwives, 45, 46
    maternal constraints on fetal
growth, 59–64
birth (cont.)
mortality rates and complications, 38–9, 41–4
timing/triggers, 48–50
transition to air breathing, 74, 75
blood cells, development, 83
brain, development, 70
breastfeeding, 33, 36
breathing movements, fetal, 67–9, 72–5
breech births, 40–1
Brooke, Dawn, 118
Brown, Louise, 114
Building Superhumans event, 162, 163–4
Caesar, birth of, 57
caesarean sections, 52, 55–9, 57
cancer, 126
cardiovascular diseases, 126
care received in infancy, 9–11
change, adaptation to, 88–90
childbirth see birth
China
Great Leap Forward, 134
one-child policy, 112
chromosomes, 102, 97–8
coding, DNA, 97–8, 100–3
computers, use in infancy, 28–9
conception
age factors, 118
control of, 108–11
timing of, 117
constraint, maternal, 59–64
contraceptives, historical perspectives, 109
control over our health, ix–xi, 154–7
control over our lives, ix–xii
control over reproduction, 115
control systems, early development, 83
couvade, 44–5
COVID-19 pandemic, 125–6
childbirth, 61–2, 63
health policy, 149, 159–60
immune system development, 30
mortality rates in childbirth, 42
prevention of disease, 145, 146–7
public engagement, 164–5
Cusk, Rachel, 147–8
Darwin, Charles, 86, 94–5
deer, sex determination/selection, 105–6
developmental plasticity see plasticity
diet, maternal, 84–5, 103–4, 153
diet, paternal, 103
digestive system, microbiome, 34–5
digital devices, 28–9
disease, infectious, 124–6; see also COVID-19 pandemic;
non-communicable disease
DNA coding, 97–8, 100–3
Douglass, Frederick, 13, 14
dreaming, fetal, 71–2
drugs, effects on fetal development, 86
Dutch Hunger Winter, 130–8, 132
early development, xi–xii,
xii–xv; see also adaptive responses; fetal development;
inancy
economic development, Malthusian trap of, 123
Index

economic progress, adaptive mismatches, 140
education, non-communicable disease prevention, 147
Edwards, Robert, 114
EEG, movement in utero, 71
embryos, 85, 104, 114; see also fetal development
environmental factors
  adaptation, 88–90
  fetal development, 84–6, 85, 103–4, 119–20
  pollution, 86, 158
  sexual reproduction, 103–4
environmental mismatches, 139, 147, 157
epigenetics
  fetal development, 82, 85
  imprinting, 102
  infancy, 5
  musical score analogy, 134–7, 135
  see also adaptive responses
equality/equity, 9, 59–64; see also health inequalities
An Essay on the Principle of Population (Malthus), 122
eugenics movement, 7, 150
evolutionary perspectives
  birth, 61, 56, 54–5
  fitness, 107
  individual variations, 86
  sexual reproduction, 94–5
extinctions, 87
fast food, 140
fat cells, development, 82
father’s diet, and fetal development, 103
female genital mutilation, 43
fertilisation, 95–7, 96, 104; see also in vitro fertilisation
fetal development, xiv, 88
  adaptation, 88–90
  breathing movements, 67–9, 72–5
  environmental impacts, 85, 84–6, 103–4, 119–20
  epigenetics, 82, 85
  fat cells, 82
  growth, 47, 59–64
  gut, 82
  heart, 76–8, 80–1
  house investment analogy, 80–4
  individual variations, 86–8
  investment in future health, 90, 80–4
  kidneys, 78–81
  maternal diet, 84–5
  milestones of development, 66–9
  movement in the womb, 69, 70
  muscle tissue, 82–3
  organs/structures, 80–4
  photographic analogy, 90–1
  sleep, 71–2
  transition to air breathing, 74, 75
  ultrasound scanning, 70, 73, 111–12
financial crisis (2008), 63, 145–6
first two years; see infancy
first word, 14–15; see also language development
fish, reproductive strategies, 107
fitness, evolutionary perspectives, 107
Galton, Francis, 7
genetic inheritance, Nature versus Nurture debate, 3–8
gestational diabetes, 84, 138, 142
gift to the next generation, 171, 167–9
girl fetuses, abortion of, 112–13
governmental policy see health policy
graphic images, internet, 29
Great Leap Forward, China, 134
Gross Domestic Product (GDP), 146
growth, normal
birthweight, 64, 65
fetal, 47, 59–64
infancy, 35
gut bacteria, 34–5
gut, development, 82

handwashing, infection prevention, 125
health inequalities, xv
developmental effects, 121–2, 130–4, 135, 137–9
Dutch Hunger Winter, 132, 130–138
epigenetics, 134–7, 135
infectious disease, 124–6
intergenerational effects, 134, 137, 140–145, 150, 156–7
life expectancy, 127
lifestyle factors, 127–8
Lives on the Line, 126–8
low- to middle-income countries, 139–40, 141
malnutrition and starvation, 124, 130–4, 135
Millennium Development Goals, 129–30
population explosion, 122–3
poverty in high-income countries, 127–8, 143–4

prediction of future environment, 121–2, 137–9
Sustainable Development Goals, 129–30
see also non-communicable diseases (NCDs)
health policy for the best start in life, xv, 151
call to action, 166, 167–9
motivation for change, 151–4
personal is political slogan, 158–60
planning for pregnancy, 168–70
public engagement, 164–5
recommendations/pregnancy advice, 153
responsibility for next generation, 165–7
heart, development, 76–8, 80–1
Henry VIII, 111, 113
Hereditary Genius (Galton), 7
High Windows poem (Larkin), 142
historical perspectives
birth, 38–9, 39, 53, 55–9
contraceptives, 109
Dutch Hunger Winter, 132, 130–8
hole in heart, closure at birth, 76–7
Holvast, Henkie, 132
Homer Simpson, 152
house investment analogy, development, 80–4
HTT gene, 101–2
Human Genome Project, 3
human rights, 8
Hunger Winter, Dutch, 132, 130–8
Hunter, John, 113
Hunterdon’s disease, 101–2

immune system
development, 29–33, 33
pre-eclampsia, 104–5
imprinting, 102; see also epigenetics
individual variation
coding, 97–8
fetal development, 86–8, 156
sexual reproduction, 93–5, 100–3
inequality, 9, 59–65; see also health inequalities
infancy, xiv, 37
breastfeeding, 33, 36
care received, 9–11
digital devices/screen use, 28–9
early memories, 1–3
epigenetics, 5
equality and equity, 9
eugenics movement, 7
exploration/interaction with environment, 23
growth, 35
gut bacteria, 34–5
immune system, 29–33, 33
language development, 13–15
learning how to behave/
neuronal tuning, 15–20
Nature versus Nurture debate, 3–8
plasticity, 11–13
prediction/learning cause and effect, 23–4
Romanian orphanages, 10–11, 12
self-control, 25–7
senses, 22–3
sex differences in behaviour, 6

socialisation, 19–20
theory of mind, 24–5
visual processing system, 20–2
infectious disease, 124–6; see also COVID-19 pandemic
infertility, 112–13
intergenerational effects
health policy, 150
NCDs, 134, 137–9, 140–5, 156–7
planning for pregnancy, 170–1
see also epigenetics
internet, graphic images, 29
investment in future health, fetal development, 90, 80–4
in vitro fertilisation (IVF), 113–17, 114
Ireland, adoption practices, 8
iron deficiency anaemia, 62

Jefferson, Thomas, 8
Julius Caesar, birth of, 57
The Jungle Book (Kipling), 9–10

kidneys, development, 78–81
King Henry VIII, 69
Kipling, Rudyard, 9–10

language development, 13–15
Larkin, Philip, 142
Life and Opinions of Tristram Shandy, Gentleman (Sterne), 99–100
life expectancy, London, 126–8
life history strategies, 106–8
LifeLab initiative, Southampton, 161–3
A Life’s Work (Cusk), 147–8
lifestyle factors, health inequalities, 127–8
London Underground, Lives on the Line, 126–8
low- to middle-income countries
health inequalities, 139–40
infectious disease, 124–5, 142
NCDs, 126, 124–5, 139–40, 142
risks of childbirth, 63, 143
lung disease, 126
malaria, 62
malnutrition
adaptive responses of the unborn baby, 156–7
epigenetics, 135
health inequalities, 124, 130–4
Malthus, Thomas, 122–3
Malthusian trap of economic development, 123
man-midwives, 45, 46
maternal constraint, fetal growth, 59–64
maternal diet, 84–5, 103–4, 153;
see also malnutrition
maternal mortality rates, 38–9
medicines, effects on fetal development, 86
memories, early, 1–3
Mendelian inheritance/Mendel, Gregor, 4–5
mice, reproductive strategies, 106–7
microbiome, 34–5
milestones of development, 66–9
Millennium Development Goals, 129–30
mismatches, environmental, 139, 140, 147, 157
MMR vaccination (mumps, measles, rubella), 31
mortality rates, maternal and neonatal, 38–9
motherhood, prevention of non-communicable diseases (NCDs), 148
mother’s diet, 153, 84–5, 103–4
motivation for health policy changes, 151–4
movement in the womb, 69, 70;
see also breathing movements
Mukwege, Dennis, 43
muscle tissue, development, 82–3
musical score analogy, epigenetics, 134–7, 135
nanny state, 151
Nature versus Nurture debate, development, 60, 3–8
neonatal mortality rates, 41–4;
see also birth
Netherlands, birthweight study, 64, 65; see also Dutch Hunger Winter
neuronal pruning and tuning, 16–18
Nigerian civil war, 134
Nobel Peace Prize (2018), 43
Non-communicable diseases (NCDs), 126–7
adaptive responses of fetus, 155, 133–4
intergenerational effects, 134, 137–8, 140–5, 156–7
lifestyle factors, 127–8
low- to middle-income countries, 139–40
poverty in high-income countries, 126, 127–8
preventive measures, 144–8
nose shape, 99–100
Index

nutrition see malnutrition; maternal diet

obesity
adaptive responses, developmental, 138
mismatch of epigenetic effects, 140
stigma of, 153
one-child policy, China, 112
Operation Market Garden, 130–1
The Origin of Species by Means of Natural Selection (Darwin), 94–5

pain relief, childbirth, 44
paternal diet, and fetal development, 103
'personal is political' slogan, 158–60
personality development, infancy, 18
Peter Pan (Barrie), 36–7
photographic analogy, fetal development, 90–1
placental function, pre-eclampsia, 104–5
plasticity, developmental, 11–13
environmental impacts, 84–6, 85, 103–4, 119–20
epigenetics, 135, 137
language development, 13–15
neuronal tuning, 17–18
policy see health policy
pollutants, environmental, 86, 158
population explosion, 122–3
poverty, in high-income countries, 127–8, 143–4
COVID-19 death rates, 125–6
NCDs, 126, 127–8
see also low- to middle-income countries

preconception period, 117–20
prediction of future environment, 121–2, 137–9; see also epigenetics; mismatches
pre-eclampsia, 104–5
pregnancy planning, 168–71
pruning, neuronal, 16–17
public engagement, health policy, 164–5
quickening, fetal, 69
rats, reproductive strategies, 106–7
rearing of humans, by animals, 9–10
religions, origins, 108
reproduction, bacteria, 92; see also sexual reproduction
reproductive strategies, 106–8
responsibility for next generation, health policy, 165–7
risk-taking behaviour, adolescence, 160–3
rock art, 38–9, 39
Romanian orphanages, 10–11, 12
Romeo and Juliet (Shakespeare), 109, 110
same-sex parenting, 116
sanitation, low- to middle-income countries, 140
science, role in health policy, 159–60
Scilly Isles, Tresco Abbey Gardens, 93
screen time, infants, 28–9
self-control, development of, 25–7
sensory development, infancy, 22–3
visual processing system, 20–2

© in this web service Cambridge University Press & Assessment www.cambridge.org
sex determination/selection, 105–6, 111, 112–13
sex differences in behaviour, 6
sexual reproduction, xiv, 92, 93
abortion of girl fetuses, 112–13
age factors, 118
Aristotle, 95–7
artificial insemination and IVF, 113–17, 114
control of conception, 108–11
DNA and chromosomes, 97–8
evolutionary perspectives, 94–5
fertilisation, 104, 95–7, 96
Huntingdon’s disease, 101–2
individual variations, 93–5, 100–3
infertility, 112–13
The Life and Opinions of Tristram Shandy, Gentleman, 99–100
placental function and pre-eclampsia, 104–5
preconception period, 117–20
reproductive strategies, 106–8
Romeo and Juliet, 109, 110
sex determination/selection, 111, 105–6
timing of conception, 117
Shakespeare, William, 109, 110
sheep, fetal movements, 68, 71
The Simpsons, 152
slavery, abolition, 13, 14
sleep, fetal, 71–2
smoking, effects on fetal development, 62, 86
socialisation, infancy, 19–20
socio-economic inequality, 9, 59–64; see also health inequalities; poverty
starvation see malnutrition
Steptoe, Patrick, 114
Sterne, Lawrence, 99–100
stick insects, asexual reproduction, 92–3
stigma, obesity, 153
superstitions, origins, 108
Sustainable Development Goals, 129–30
test-tube baby, Louise Brown, 114
thalidomide, 86, 151
timing of conception, 169
toilet training, 25
Tolstoy, Leo, 150
transgenerational effects see intergenerational effects
transition to air breathing, at birth, 74, 75
Tresco Abbey Gardens, Scilly Isles, 93
ultrasound scanning, fetal, 70, 71–73, 73
variation see individual variations
visual processing system, sensory development, 20–2
Water and Peace (Tolstoy), 150
water purification, low- to middle-income countries, 140
white rhino, extinction, 87
women
health policy to support, 149–51
prevention of NCDs, 144–8
yawning, fetal, 73
