Index

Auxiliary equation, 14, 306

Boundary condition, 44
Boundary value problem, 45, 252
Burgers' equation, 297

Canonical form, 87–92, 207
Cauchy conditions, 145, 228
Cauchy data, 145, 228
Cauchy problem, 45, 144–152, 227–229
Cauchy-Euler linear PDE, 353
Cauchy's method of characteristics, 152–174
Chain rules, 5
Characteristic curves, 105–202
Characteristic direction, 104
Characteristic equations, 88, 93, 157, 202
Characteristic strip, 155
Characteristics, 88, 93, 105–202
Charpit's auxiliary equations, 126
Charpit's method, 125
Churchill condition, 45
Clairaut's equation, 114
Compatible condition, 93
Complementary function, 16, 326
Complete solution, 37
Cone, 7
Curves, 7
  parametric equations, 10
  plane curves, 7
  space curves, 9
  tangent vectors to, 11

D' Alembert's solution, 275
Degree of PDE, 36
Dependent functions, 5
Differential equation, 13
Differential operators, 43
Direct integration method, 61–67
Direction cosines, 6
Direction field, 29
Direction ratios, 6
Directional derivatives, 4
Dirichlet condition, 45
Discriminant, 202

Elliptic PDE, 202, 230
Envelopes, 9
Euler linear PDE, 306
Exponential-type series solution, 320

First order PDE, 39, 87
  linear, 87
  quasilinear, 97
  semilinear, 93
Formation of PDE, 46–48
Fourier coefficients, 253
Fourier method, 257
Fourier series, 253

General solution, 37–144
Gradient, 4
Gravitational potential, 295–297

Half range Fourier series, 252–257
Homogeneous Functions, 3
Hopf-Cole transformation, 297
Hyperbolic PDE, 202, 230

Implicit functions, 6
Independent functions, 5
Initial conditions, 45, 145, 228
Initial data, 145, 228
Initial data curve, 145, 228
Initial strip, 160
Initial value problem, 45, 144, 227
Initial-boundary value problems, 45
Integral curves, 29
Integral surface, 39
Intermediate integral, 232
Inverse function theorem, 6
Invertible transformation, 6
Irreducible PDE, 315

Index
More Information

Jacobi's method, 178
Jacobian, 5

Lagrange's auxiliary equations, 97
Lagrange's method, 97–109
Laplace equation, 285–291, 295–297
Laplace transformation, 207
Legendre linear PDE, 357
Linear differential operators, 43
Linear PDE, 39–353
  homogeneous, 40, 305, 326
  nonhomogeneous, 40

Method of undetermined coefficients, 350–353
Monge cone, 153
Monge curves, 105, 154
Monge direction, 104, 155
Monge-Ampre type equations, 243–252
Monge's method, 231–243
Monge's subsidiary equations, 232

Neumann condition, 45
Nonlinear PDE, 40

One dimensional heat equation, 280–285
One dimensional wave equation, 273–280
Operators, 42
Order of PDE, 36
Ordinary differential equations (ODE), 13
  auxiliary equation, 14
  complementary function, 16
  complete solution, 14
  degree, 13
  general solution, 14
  linear, 13
    first order, 14
    homogeneous, 13
    nonhomogeneous, 13
    with constant coefficients, 14
  nonlinear, 13
  order, 13
  particular integral, 16
  particular solution, 14
  solution of, 13

Parabolic PDE, 202, 230
Partial Derivatives, 2
Partial integration, 62
Particular integral, 16, 37, 326
Particular solution, 37
Pfaffian differential equations, 17
Plane, 7
Poisson equation, 295–297
Potential equation, 285–291, 295
Principle of superposition, 44

Quasilinear PDE, 41

Reducible PDE, 314
Robin condition, 45

Second order PDE, 39, 191
  linear, 191–202
  quasilinear, 231
  semilinear, 202
Semilinear PDE, 40
Separable equations, 112–114
Separation of variables, 75–86
Simultaneous PDE, 174–178
  compatibility condition, 174
Simultaneous total differential equations, 23
Singular solution, 38–138
Solution of PDE, 37
Steady state, 285–291
Strip, 155
Strip condition, 155
Surfaces, 7
  family of, 8
  normal to, 8
  parametric equations, 12
  tangent plane to, 8

Telegraph Equations, 291
Total differential equations, 17
  condition for integrability, 18
  exact, 18
  homogeneous, 20
Total differentials, 5

Vector fields, 4
