<b>Preface</b>	<b>xi</b>
<b>Acknowledgements</b>	<b>xiii</b>
<b>List of Symbols</b>	<b>xv</b>
<b>1 Relevant Pre-requisites and Terminologies</b>	<b>1</b>
1.1 Partial Derivatives and Allied Topics	1
1.2 Curves and Surfaces	6
1.3 Ordinary Differential Equations	13
1.4 Total Differential Equations	17
1.5 Simultaneous Total Differential Equations	23
<b>2 Solution, Classification, and Formation of Partial Differential Equations</b>	<b>35</b>
2.1 Order and Degree of a PDE	36
2.2 Solution of a PDE	37
2.3 PDEs Involving Two Independent Variables	38
2.4 Classification of PDEs	39
2.5 Further Classification of PDEs	40
2.6 Linear Differential Operators	42
2.7 Auxiliary Conditions	44
2.8 Formation of Partial Differential Equations by Elimination of Arbitrary Constants	46
2.9 Formation of PDEs by Elimination of Arbitrary Functions	49
2.9.1 Formation of First-Order Quasilinear PDEs	49
2.9.2 Formation of Second-Order Linear PDEs	51
2.9.3 Formation of Second-Order Quasilinear PDEs	54
2.9.4 Formation of Second-Order Non-linear PDEs	56
<b>3 Easily Solvable Partial Differential Equations</b>	<b>61</b>
3.1 Direct Integration Method	61
3.2 Linear Equations of Order One Containing Single Derivative	68
3.3 Linear PDEs Solvable as ODEs	70
3.4 Method of Separation of Variables	75
<b>4 First-Order Partial Differential Equations</b>	<b>87</b>
4.1 Linear PDEs: Reduction to Canonical Form	87
4.2 Semilinear PDEs: Geometry of Solutions	93
4.3 Quasilinear PDEs: Lagrange's Method	97
4.3.1 Geometric Interpretation of Lagrange's Method	104
4.3.2 An Application to Determine Surfaces Orthogonal to a Given Family of Surfaces	106
4.3.3 Quasilinear Equations in $n$ Independent Variables	108

4.4	Certain Standard Forms of First-Order PDEs	109
4.4.1	Standard Form I: Equations Containing Partial Derivatives Only	109
4.4.2	Standard Form II: Equations Containing None of the Independent Variables Explicitly	110
4.4.3	Standard Form III: Separable Equations	112
4.4.4	Standard Form IV: Clairaut's Equation	114
4.4.5	Equations Reducible to Standard Forms	115
4.5	Charpit's Method: A General Method of Finding the Complete Solution	125
4.6	Singular Solution of a Non-linear PDE	132
4.7	General Solution of a Non-linear PDE	138
4.8	Cauchy Problem and Particular Solution: Integral Surface through a Given Curve	144
4.8.1	Cauchy Problems Solvable by Lagrange's Method: Particular Solution from General Solution	145
4.8.2	Cauchy Problems Solvable by Charpit's Method: Particular Solution from Complete Solution	148
4.9	Cauchy's Method of Characteristics: A General Method for Solving Cauchy Problems	152
4.9.1	Solution of a Cauchy Problem for Non-linear PDE	160
4.9.2	Standard Strategy for Quasilinear PDE	171
4.10	Simultaneous PDEs	174
4.11	PDEs in More Than Two Independent Variables: Jacobi's Method	178
<b>5</b>	<b>Second-Order Partial Differential Equations</b>	<b>191</b>
5.1	Linear PDEs: Standard Forms	191
5.2	Semilinear PDEs: Reduction to Canonical Forms	202
5.2.1	Laplace Transformation and Canonical Forms	207
5.2.2	General Solution	222
5.2.3	Cauchy Problem	227
5.2.4	Semilinear Equations in $n$ Independent Variables	230
5.3	Quasilinear PDEs: Monge's Method	231
5.4	Certain Class of Non-linear Partial Differential Equations: Monge–Ampère–Type Equations	243
5.5	Boundary Value Problems in Homogeneous Linear PDEs: Fourier Method	252
5.5.1	Half Range Fourier Series	252
5.5.2	Fourier Method	257
5.6	Applications of Second-Order PDEs	273
5.6.1	Vibrations of a Stretched String: One-Dimensional Wave Equation	273
5.6.2	Conduction of Heat in a Rod: One-Dimensional Heat Equation	280
5.6.3	Steady State Temperature Distribution: Laplace Equation in 2D	285
5.6.4	Transmission Line: Telegraph Equations	291
5.6.5	Gravitational Potential: Poisson and Laplace Equations in 3D	295
5.6.6	Burgers' Equation	297
<b>6</b>	<b>Higher Order Linear Partial Differential Equations</b>	<b>305</b>
6.1	Homogeneous Linear PDEs with Constant Coefficients	305
6.1.1	Euler Linear PDEs	306

6.1.2	Reducible Linear PDEs	314
6.1.3	Exponential-Type Series Solution	320
6.1.4	Irreducible Homogeneous Linear PDEs	323
6.2	Non-homogeneous Linear PDEs with Constant Coefficients	325
6.2.1	Special Methods for Finding PIs	326
6.2.2	A Short Method for Finding PIs of a Certain Class of Euler Linear Equations	337
6.2.3	A General Method for Finding PIs of Reducible Linear Equations	345
6.2.4	Method of Undetermined Coefficients	350
6.3	Cauchy–Euler Linear PDEs	353
6.4	Legendre Linear PDEs	357
6.5	Equations Reducible in Linear Canonical Forms with Constant Coefficients	359
	<b>Bibliography</b>	<b>371</b>
	<b>Index</b>	<b>373</b>
