

INDEX

- Abi-Rached, Joelle, 86–88
 absolute rule, science and, 136–140
 acceleration, theories of, 29–31
 accommodationism, nature and,
 143–144
 AIDS research, 182–185
 Alter, Harvey J., 80–81
American Journal of Psychiatry,
 88–89
 Ancients, laws of science and,
 158–161
 Arabatzis, Theodore, 66–67
 asymmetry, physics and, 101–103
 Austen, Jane, 177–179
 autocracy, physics compared with,
 83
- Bacon, Francis, 85–86
 Bardeen, John, 151–152
 Barrotta, Pierluigi, 169–172
 Begeman, Louis, 76
 Beggs, James, 118–119
 behaviourism, concepts in, 24
 Berengarten, Richards, 127–128
 Bickle, John, 88
 Big Bang theory, 136–140
*Black-Body Theory and the
 Quantum Discontinuity*
 (Kuhn), 14–15
 Bloch Hamiltonian, 151–152
- Bollhagen, Andrew, 68–71
 Boyle-Charles law, 93–102
 Bravais lattice, 151–152
 bridge principles, in type-type
 reductions, 93
 Bridgman, P. W., 24
 Broca, Paul, 86–88
 Broglie, Louis de, 19
- cancer biology, concepts in, 22–23
 Case, Anne, 58–60
 chance set-ups, probability theory
 and, 40–47
 Chang, Hasok, 2–7, 104–106
 Charpentier, Emmanuelle, 80–81
 chemistry
 physics and, 103–107
 quantum chemistry, 105–106
 Clarke, Newton Samuel, 128–134
 clockwork universe perspective
 materialism and, 86–89
 Mechanical Philosophy and,
 122–126
 science and, 2–7, 83–86
 colligation, narrative and, 56–58
 component forces, 161–165
 concepts
 defined, 21–32
 experiments and, 71–72
 misuse of, 34–53

INDEX

- operationalism and, 24
 social processes and, 32–34
 stabilisation of, 32–34
 theory and, 20–53
 in type-type reductions, 93
 controlled experiments, 61–62
 Cooper, Leonard, 151–152
 Coyne, Jerry, 2–7
- dappled world model
 laws of physics and, 165–167
 nature and science and, 122–128
- Daston, Lorraine, 128–134
 Davidson, Donald, 99–100
 Deaton, Angus, 58–60, 173–175
 decision-making, uncertainty and, 40–47
 definitions
 concepts and, 21–32
 of science, 13–15
 democracy, concepts in, 23–24
 Descartes, Rene, 128–134
 deterministic view of science, 2–8
 illusions of, 140–144
 limitations of, 8–9
 philosophy and, 11
De viribus electricitatis in motu musculari, Commentarius (Galvani), 63–66
 diagrams, theory and, 58–60
Dialogues concerning Natural Religion (Hume), 140–144
 difference
 contemporary examples of, 134–136
 disappearance of, 128–134
- Dirac, P. A. M., 103, Schrödinger
 diversity, disappearance of, 128–134
 Doty, Robert, 86–88
 Doudna, Jennifer A., 80–81
Drawing Theories Apart (Kaiser), 58–60
- economics
 marginal utility theory in, 112–114
 Nobel Prizes in, 80–81
 physics and, 118–119, 144–156
 probability theory and, 37–39
 randomised controlled trials in, 172–175
 structural models in, 164–165
 uncertainty and decision-making in, 40–47
 utility in, 150–151
- Eddington, Arthur, 89–91, 94–95, 120–121
 effect size, social science and, 47–53
 Einstein, Albert, 2–4, 12–13, 108–110
 Gravity Probe-B experiments and theories of, 110–120
 electromagnetic theory, models in, 56
 electron theory
 concepts in, 71–72
 development of, 17–19
 measurements in, 74–79
 oil drop experiment, 20–21
 Zeeman effect, 66–67
Encyclopaedia Britannica, 28
Encyclopedia of Unified Science, 120–121

INDEX

- Everitt, Francis, 110, 117–118,
 149–150
 evidence-based policy (EBP)
 movement, 172–175
 evil, in nature, 140–144
 experiments
 centrality of, 17–19
 common images of, 12–17
 concepts in, 71–72
 construction of, 71–79
 exploratory experiments, 63–66
 falsifiability of, 60–62
 importance of, 62
 measurements and, 74–79
 models and, 72–74
 neglect in science of, 14–15
 phenomena creation in, 66–67
 reconstituted phenomena in,
 67–71
 science and, 2–4, 10–11
 theory and, 20–21, 60–62
 exploratory experimentation,
 63–66
 external and internal validity, in
 social science, 148–151
- Fairbank, William, 111–112, 117–118
 falsifiability, of experiments, 60–62,
 146–147, 152–156
 Fauci, Anthony, 182–185
 Feynman, Richard, 58–60
 Fischer, Florian, 156–165
 Fisher, Peter, 123–124
 Fitzgerald, George, 18–19
 Fleck, Ludwick, 32
 Fletcher, Harvey, 72–79
- Franklin, Allan, 14–15
 free will, science and, 2–7, 86–88
 Freud, Sigmund, 60–62
- Galileo, 15
 Galvani, Luigi, 63–66
 game theory, utility in, 150–151
 general theory of relativity, 108–110
 Stanford Gravity Probe and,
 110–120
 genetics, McClintock's research in,
 134–136, 186–188
 genotype, defined, 24–28
 Genzel, Reinhard, 80–81
 Ghez, Andrea, 80–81
 Glanville, Joseph, 85–86
 global positioning systems (GPS),
 109–110, 117–118
 graphs, theory and, 58–60
 gravity, laws of science and, 158–161
 Gravity Probe experiment, 72–74
 external validity and, 149–150
 general theory of relativity and,
 108–120, 145
 grounding, reductionist theory
 and, 101–103
The Guardian newspaper, 2–7
 gyroscopes, Gravity Probe-B
 experiments and, 115–119
- Haavelmo, Tyrgeve, 146
 Hacking, Ian, 40–41, 62, 66–67
 Haldane, J. B. S., 26–27
 Hall, Edwin, 67
 Hall effect, 67
 Harris, Mark, 107–108

INDEX

- Heaviside, Oliver, 18–19
 Heisenberg uncertainty principle,
 106–107, 109
 Hempel, Carl, 28, 176–177
 Hendry, David, 37–39
 Hendry, Robin, 105–106
 Henry, John, 83–86, 136–140
 Hesse, Mary, 53–54
 history, narratives and, 176–177
 Hitchcock, Christopher, 60–62
 Hopkins, Gerard Manley, 123–124,
 127–128
 Houghton, Michael, 80–81
 Hume, David, 140–144
- illustrations, theory and, 58–60
 images of science, 2–4
 challenges to, 12–17
 deterministic perspective in, 2–8
 overview, 2
 philosophical view of, 9–10
 physics as all science, 2–7
 science=theory + experiment
 paradigm, 2–4
 indifference, principle of, 45–47
In Search of Memory (Kandel), 86–88
 Insel, Thomas, 88–89
 intellectual humility, institutions
 and practices of, 179–181
 interactive variables, effect size
 and, 49–53
- Kaiser, David, 58–60
 Kandel, Eric, 86–88
 Kay, John, 40–47
 Keller, Evelyn Fox, 134–136
- Keller, Fox, 186–188
 Kepler, Johannes, 149–150
 kinesin molecule, 68–71
 King, Mervyn, 40–47
 knowledge
 centrality of, 17–19
 science and, 169–172
 Kuhn, Thomas, 14–15
- Larmor, Joseph, 18–19
 Latour, Bruno, 32–34
 laws of science, Ancients vs.
 Moderns and, 158–161
 Leibniz, Gottfried Wilhelm,
 128–134
 Levi, Jerry, 182–185
 Lewis, David, 158
 logical empiricism, 27–28
The Logic of Statistical Inference
 (Hacking), 40–41
- marginal utility theory, in
 economics, 112–114
 Marx, Karl, 60–62
 mass and energy, general theory of
 relativity and, 108–110
 materialism, 86–89
 Maxwell, James Clerk, 91–92, 96–98
 McClintock, Barbara, 134–136,
 177–179, 186–188
 measurements, experiments and,
 74–79
 Mechanical Philosophy, 83–86
 absolute rule and, 136–140
 nature and science and, 122–126,
 128–134, 157

INDEX

- Menger, Carl, 112–114
 Michelson-Morley experiment,
 15
 Milgrom, Paul R., 80–81
 Mill, John Stuart, 154–156, 158
 Millikan, Robert Andrews, 20–21,
 25–26, 56, 72–79
 ‘Mill-Ramsey-Lewis account,’
 158
 Milward, Peter, 127–128
 models
 experiments and, 72–74
 theory and, 53–58
Models and Analogies in Science
 (Hesse), 53–54
Models as Mediators (Morgan &
 Morrison), 54–55
 moderator variables, effect size
 and, 49–53
 Moderns, laws of science and,
 158–161
 molecular biology, experiments in,
 68–71
 molecular chaos hypothesis,
 91–92
 Montuschi, Eleonora, 169–172
 moral and social order, evolution
 of, 128–134
 Morgan, Mary, 54–58
 Morrison, Margaret, 54–55
 multi-realizability theory, 93–97
 Mumford, Stephen, 156–165
 Munro, Eileen, 52–53
Munro Review of Child Protection
 (Munro), 52–53
- Nagel, Ernest, 93–102
 narratives
 colligation and, 56–58
 history and, 176–177
 theory and, 53–58
 National Institute of Allergy and
 Infectious Diseases (NIAID),
 182–185
 nature
 absolute rule in, 136–140
 diversity in, 128–134
 religion and, 140–144
 science and, 122–126, 157
The Nature of the Physical World
 (Eddington), 89–91
 Navarro, Jaume, 16–17
 Neurath, Otto, 34, 121, 146–147,
 152–156
Neuro (Rose & Abi-Rached),
 86–88
 neuroscience, materialism and,
 86–88
 news media, science coverage in,
 2–7
 Newton, Sir Isaac, 128–134, 149–150,
 158–161
 Nobel Prize winners in science,
 80–81
- observation, centrality of, 17–19
 Ohm’s law, 163–164
 oil drop experiment, 20–21, 56,
 74–79
 operationalism, concepts and,
 24–28

INDEX

- pain research, multi-realism theory in, 93–97
- parallel track, in AIDS research, 182–185
- Park, Katharine, 128–134
- Parkinson, Bradford, 117–118
- particle physics, concepts in, 22–23
- Penrose, Roger, 80–81
- persuasion, scientific concepts and, 32–34
- phenomena
 creation of, 66–67
 reconstitution in experiments of, 67–71
- phenotype, defined, 24–28
- philosophy
 mechanical philosophy, 83–86
 science and, 9–10, 168–169
- physicalism doctrine, 86–89
- physics
 absolute rules and, 136–140, 151–152
 applicability in world of, 152–156
 chemistry and, 103–107
 concepts in, 22
 determinist view of, 2–8
 grounding and, 101–103
 multiple theories of, 107–120
 philosophical view of, 11
 political economy and, 154–156
 precision in, 165–167
 principles as tools in, 161–165
 reductionist perspective on, 81–82
 science as, 2–7
 successful applications of, 144–156
 supervenience and, 101–103
 tendency laws in, 156–165
 token-token reduction, 93–97
 type-type reduction in, 93–102
 universal rule doctrine of, 86–89
 Weber on, 147–148
 ‘Pied Beauty’ (Hopkins), 123–124
 planetary system, model of, 55, 144–156
- Plato, 83–86, 112–114
- political economy, physics and, 154–156
- Popper, Karl, 60–62, 146–147, 152–156
- Porter, Ted, 62
- powers interpretation of laws, 158–161
- precision
 in physics, 165–167
 probability theory and, 34–53
- Pride and Prejudice* (Austen), 177–179
- principles as tools, 161–165
- probability theory
 application of, 175–177
 misuse of concepts in, 34–53
- public opinion, scientific theory and, 32
- pyramid of the sciences, 2–7
 unity of science hypothesis and, 120–121
- quantum chemistry, 105–106
 quantum gravity theory, 109–110

INDEX

- quantum Hamiltonian, 151–152
 quantum mechanics, 105–106
 physics and, 108–110
- Radical Uncertainty: Decision-making for an Unknowable Future* (Kay & King), 39–40
- radioactive decay, principles of, 2–8
- Ramsey, Frank Plumpton, 158
- randomised controlled trials (RCTs), use and misuse of, 172–175
- randomista economic theory, 172–175
- rational agents, gamer theory and, 150–151
- reductionism
 chemistry and, 103–107
 grounding and, 101–103
 in neuroscience, 86–88
 in physics, 81–82, 107–108
 retreat from, 89–103
 supervenience and, 101–103
 token-token reduction, 93–97
 type-type reduction, 93–102
- Research Domain Criteria (RDoC) project, 88–89
- Rice, Charles M., 80–81
- Ricoeur, Paul, 176–177
- Rose, Nikolas, 86–88
- Rutherford, Ernest, 2–7
- Schiff, Leonard, 117–118
- Scholastic science, 158–161
- Schrieffer, J. R., 151–152
- Schrödinger, Irwin, 19
- Schrödinger's equation, 105–106
 quantum Hamiltonian and, 151–152
- science
 definitions of, 13–15
 falsifiability in, 60–62, 146–147
 intellectual humility in, 179–181
 Nobel Prize winners in, 80–81
 philosophy and, 9–10, 168–169
 supervenience in, 101–103
 unity hypothesis of, 81–82, 120–121
- Science, Evolution, and Creationism* (US Academy of Sciences), 13–15
- science=theory + experiment paradigm, 2–4
 limitations of, 10–11
- Scientific Revolution, 83–86
 laws of science and, 158–161
- The Scientific Revolution and the Origins of Modern Science* (Henry), 83–86
- secondary sciences
 reductionist perspective on, 93–97
 supervenience and, 101–103
- Semeza, Carlo, 169–172
- Shakespeare, William, 14–15, 177–179
- Shomar, Towfic, 156–165
- Skinner, B. F., 24
- Sober, Elliott, 60–62
- social processes, concepts and, 32–34

INDEX

- social sciences
 concepts in, 23–24
 diagrams, illustrations and
 graphs in, 58–60
 effect size in, 47–53
 external and internal validity in,
 148–151
 misuse of concepts in, 34–53
 physics and, 118–119, 144–156
 probability in, 175–177
 Weber on, 147–148
- spacetime curvature, 108–110
- Specter, Michael, 182–185
- Spencer, John, 128–134
- spin ice theory, 107–108
- SQUID magnetometer, Gravity
 Probe-B experiments and,
 115–119
- Stanford Encyclopedia of
 Philosophy*, 28, 100–103
- Stark effect, 66–67
- statistical analysis, effect size and,
 49–53
- statistical mechanics, reductionism
 and, 93–102
- Suarez, Mauricio, 156–165
- superconductivity, BCS model of,
 151–152
- supervenience, 101–103
- supply and demand model, 55–58
 mechanisms in, 164–165
- systems approach to science, 169–172
- tendency laws
 physics and, 154–156
 properties of, 156–165
- terminology, concepts and, 22
- theory
 centrality of, 17–19
 concepts and, 20–53
 diagrams, illustrations and
 graphs in, 58–60
 dominance in science of, 12–17
 experiment and, 20–21, 60–62
 exploratory experimentation vs.,
 65–66
 misuse of concepts and, 34–53
 models and narratives and,
 53–58
 science and, 2–4, 10–11
 unintended/nonstandard
 interpretations of, 29–31
*The Theory of Decision under
 Uncertainty*, 43–44
- Thompson, J. J., 18–19
- token-token reduction, 93–97
- tool-box view of laws, 156–165
 principles as tools in, 161–165
- total force, 161–165
- total order doctrine, nature and,
 136–140
- two tables problem (Eddington),
 89–91, 94–95, 120–121
- type-type reduction, 93–102
- UK Science Council, 13–15
