Index

A
arc length, 252
Atwood’s machine, 179

B
bearing angle, 344
beats, 67
Bessel function, 260
  first kind, 260
  orthogonality, 263
  recurrence relation, 264
bisection method, 329
blackbody radiation, 79, 127, 244
bound state, 341

C
Cauchy’s constant, 118
centre of mass of a system, 14
central angle, 343
coordinate conversion, 10
Cornu’s spiral, 248

D
determinant of a matrix, 338
diode characteristics, 75
Dirac delta function, 247

E
electrical circuits
  maximum power transfer theorem, 73
mesh analysis, 15
nodal analysis, 16
R-C circuit, 70
R-L circuit, 71
Euler’s method
  first order, 136
  second order, 140

F
Fast Fourier transform, 305
finite difference method, 155
Fitting
  Datafit, 111
  linear data, 96
  non-linear data, 99
  polynomial, 105
force on a test charge, 18
Fourier series, 290
  half wave rectifier, 303
  saw-tooth wave, 297
  square wave, 299
  triangular wave, 301
Fraunhofer diffraction, 339
freely falling object, 176

G
Gaussian elimination method, 324
  Pivoting, 327
Gauss–Seidel method, 321
gradient of a scalar field, 86
graphs
  axis position, 46
  font color, 42
  font size, 41
  legend, 61
  line colour, 56
  line style, 54
  linestyle-thickness, 53
logarithmic axes, 49
marker - size and colour, 58
marker style, 57
polar plot, 50
tick marks, 47
title, 60
typeface, 44

H
harmonic oscillations, 65
harmonics, 292
Hermite polynomial, 273

I
integral
  line, 237
  surface, 239
  volume, 241

L
Lagrangian dynamics, 213
Laguerre polynomial, 270
  Recursion, 270
Legendre polynomial, 265
  Orthogonality, 266
  Recursion, 267
Lennard–Jones potential, 125
linear interpolation, 83

M
mass-spring system, 187
matrix
  creation, 2
  operation, 5
matrix inverse, 336
matrix representation
  differential operator, 21
  Laplace operator, 25
Miller indices, 80
modified Euler’s method, 142
moment of inertia, 19

N
Newton–Raphson method, 334

O
orthogonal trajectory, 166

P
periodic functions, 286
position-momentum commutation, 23

Q
quadrature methods
  Gauss–Hermite, 280
  Gauss–Laguerre, 279
  Gauss–Legendre, 277

R
radioactive decay, 160
RC time constant, 120
refractive index of water, 113
regula falsi method, 331
Runge–Kutta method
  fourth order, 146
  second order, 144
Index

S

Schrödinger equation, 196
  Coulomb potential, 203
  harmonic oscillator, 206
  infinite potential well, 198
secant method, 333
series L-C-R circuit, 191
simple pendulum, 184, 281
Simpson’s 1/3 – rule, 233
Simpson’s 3/8 – rule, 234
specific heat of solids, 77, 245
spring constant, 115
square wave ↔ triangular wave, 169

T

trajectory of a projectile, 64
trapezoidal rule, 231

V

vectors
  orthogonal, 13

W

wave function
  stationary states, 28
