List of Figures *xi*
List of Tables *xvii*

1. Matrices and Vector Spaces **1**

1.1 Introduction 1
1.2 Creation of a Matrix 2
1.3 Nature of the Matrix 4
1.4 Matrix Operation 5
1.5 Vector Algebra 9
1.6 Applications 10
1.6.1 Coordinate conversion (Cartesian to cylindrical coordinate system) 10
1.6.2 Coordinate conversion (Cartesian to spherical coordinate system) 12
1.6.3 Orthogonal vectors 13
1.6.4 Centre of mass of a system 14
1.6.5 Electrical circuits (Mesh analysis) 15
1.6.6 Electrical circuits (Nodal analysis) 16
1.6.7 Force on a test charge 18
1.6.8 Principal axes of moment of inertia 19
1.6.9 Matrix representation of differential operator 21
1.6.10 Position–Momentum commutation 23
1.6.11 Matrix representation of the Laplace operator 25
1.6.12 Wave function for stationary states 28
1.7 Exercises 30

2. Plotting and Graphics Design **37**

2.1 Introduction 38
2.2 Formatting of the Coordinate Axes 39

Table of Contents
More Information

2.2.1 Font size 41
2.2.2 Font colour 42
2.2.3 Typeface 44
2.2.4 Axis position 46
2.2.5 Tick marks 47
2.2.6 Logarithmic axes 49
2.2.7 Polar plot 50
2.3 Formatting of the Line Styles 53
2.3.1 Thickness 53
2.3.2 Line style 54
2.3.3 Line colour 56
2.4 Formatting of the Markers 57
2.4.1 Marker style 57
2.4.2 Marker: Size and colour 58
2.4.3 Thickness and line mode 59
2.5 Formatting of the Title 60
2.6 Formatting of the Legend 61
2.7 Applications 64
2.7.1 Trajectory of a projectile 64
2.7.2 Superposition of collinear harmonic oscillations 65
2.7.3 Beats 67
2.7.4 R-C Circuit 70
2.7.5 R-L Circuit 71
2.7.6 Maximum power transfer theorem 73
2.7.7 Diode characteristics 75
2.7.8 Specific heat of solids 77
2.7.9 Spectral radiance of a blackbody radiation 79
2.7.10 Miller indices 80
2.7.11 Linear interpolation 83
2.7.12 Gradient of a scalar field 86
2.8 Exercises 88

3. Least Square Curve Fitting 95

3.1 Introduction 95
3.2 Fitting of Linear Data 96
3.3 Fitting of Non-Linear Data 99
3.4 Polynomial Fitting 105
3.5 Fitting with Built-in Scilab Function–'datafit' 111
3.6 Applications 112
3.6.1 Refractive index of water 113
3.6.2 Spring constant 115
3.6.3 Cauchy's constant of a prism 118
3.6.4 RC Time constant 120

Table of Contents
More Information

3.6.5 Coefficient of electronic heat capacity and Debye's temperature 123
3.6.6 Lennard–Jones potential 125
3.6.7 Spectral radiance of blackbody radiation 127
3.7 Exercises 130

4. Ordinary Differential Equation 135

4.1 Introduction 136
4.2 Euler's Method 136
4.2.1 First order differential equation 136
4.2.2 Second order differential equation 140
4.3 Modified Euler's Method 142
4.4 Second Order Runge–Kutta Method 144
4.5 Fourth Order Runge–Kutta Method 146
4.5.1 First order differential equation 146
4.5.2 Second order differential equation 149
4.6 Comparison of the Four Methods 152
4.7 Finite Difference Method 155
4.8 Applications 160
4.8.1 Radioactive decay 160
4.8.2 Orthogonal trajectory 166
4.8.3 Square wave ↔ Triangular wave 169
4.8.4 Sinusoidal wave 171
4.8.5 Freely falling object 176
4.8.6 Atwood's machine 179
4.8.7 Simple pendulum 184
4.8.8 Mass–spring system 187
4.8.9 Series L-C-R circuit 191
4.8.10 Schrödinger equation 196
4.8.11 Lagrangian dynamics 213
4.9 Exercises 222

5. Integration and Differentiation 229

5.1 Introduction 229
5.2 Built-in Scilab Functions for Integration 230
5.2.1 intg 230
5.2.2 integrate 231
5.3 Trapezoidal Rule 231
5.4 Simpson's 1/3 – Rule 233
5.5 Simpson's 3/8 – Rule 234
5.6 Differentiation 235
5.7 Applications 237
5.7.1 Integration in cylindrical coordinates 237
5.7.2 Total charge 242

Table of Contents
More Information

5.7.3 Electric flux density 242
5.7.4 Planck's law for blackbody radiation 244
5.7.5 Specific heat of solids 245
5.7.6 Dirac delta function (Shifting property) 247
5.7.7 Cornu's spiral and Fresnel's diffraction pattern 248
5.7.8 Arc length 252
5.7.9 Motion of an object 253
5.8 Exercises 255

6. Special Functions 259

6.1 Introduction 259
6.2 Bessel Function of the First Kind 260
6.3 Legendre Polynomial 265
6.4 Laguerre Polynomial 270
6.5 Hermite Polynomial 273
6.6 Improper Integrals – Quadrature Methods 277
6.6.1 Gauss–Legendre quadrature 277
6.6.2 Gauss–Laguerre quadrature 279
6.6.3 Gauss–Hermite quadrature 280
6.7 Applications 281
6.7.1 Simple pendulum 281
6.8 Exercises 282

7. Fourier Analysis 285

7.1 Introduction 285
7.2 Periodic Functions 286
7.3 Fourier Series 290
7.4 Harmonics 292
7.5 Fourier Series Expansion of Periodic Functions 294
7.5.1 Fourier series expansion of (x^2) 294
7.5.2 Fourier series expansion of saw-tooth wave 297
7.5.3 Fourier series expansion of a square wave 299
7.5.4 Fourier series expansion of a triangular wave 301
7.5.5 Fourier series expansion of output of half wave rectifier 303
7.6 Fast Fourier Transform 305
7.6.1 FFT of a sine wave 305
7.6.2 FFT of the sum of two cosine wave signals 305
7.6.3 FFT of a noisy signal 307
7.6.4 FFT of a square wave 308
7.6.5 FFT of a Gaussian curve 309
7.7 Summary 311
7.8 Exercises 311

Table of Contents
More Information

8. Algebraic and Transcendental Equations 315

8.1 Introduction 315
8.2 Equation Solver in Scilab 317
8.2.1 Division operator 317
8.2.2 Built-in Scilab function – 'linsolve' 318
8.2.3 Built-in Scilab function – 'fsolve' 319
8.3 Gauss–Seidel Method 321
8.4 Gaussian Elimination Method 324
8.5 'pivoting' Gaussian Elimination Method 327
8.6 Bracketing Method: Bisection Method 329
8.7 Bracketing Method: Regula Falsi Method 331
8.8 Open Method: Secant Method 333
8.9 Open Method: Newton–Raphson Method 334
8.10 Applications 335
8.10.1 Trajectory of a particle 335
8.10.2 Matrix inverse 336
8.10.3 Determinant of a matrix 338
8.10.4 Fraunhofer diffraction pattern 339
8.10.5 Bound state of proton and neutron 341
8.10.6 Central angle of an elliptical orbit 343
8.10.7 Bearing angle of a boat 344
8.11 Exercises 345

Appendix 349

1 Matrices and Vector Spaces (vectors.sci) 349
1.1 Distance between two points 349
1.2 Coordinate conversion 349
2 Plotting and Graphics Design (plot.sci) 350
2.1 Formatting of coordinate axes 350
2.2 Formatting of the line styles 350
2.3 Formatting of the markers 350
2.4 Formatting of the legend 351
3 Least Square Curve Fitting 351
3.1 Exponential Fitting 351
3.2 Polynomial Fitting 352
4 Ordinary Differential Equation (differentiation.sci) 352
4.1 Euler's Method (for first order differential equation) 352
4.2 Euler's Method (for second order differential equation) 353
4.3 Modified Euler's Method 353
4.4 Second order Runge–Kutta Method (for first order differential equation) 353

More Information

4.5 Fourth Order Runge–Kutta Method (for first order differential equation) 354
4.6 Fourth Order Runge–Kutta Method (for second order differential equation) 354
4.7 Finite Difference Method 355

5 Integration and Differentiation (integrate.sci) 356

5.1 Trapezoidal Rule 356
5.2 Simpson's 1/3 – Rule 356
5.3 Simpson's 3/8 – Rule 356
5.4 Line Integral in Cylindrical Coordinates 356
5.5 Surface Integral in Cylindrical Coordinates 357
5.6 Volume Integral in Cylindrical Coordinates 357

6 Special Functions (special_func.sci) 358

6.1 Legendre Polynomials 358
6.2 Laguerre Polynomials 359
6.3 Hermite Polynomials 359
6.4 Gauss–Legendre Quadrature 360
6.5 Gauss–Laguerre Quadrature 361
6.6 Gauss–Hermite Quadrature 361

7 Fourier analysis (fourier.sci) 361

7.1 Periodic Functions 361
7.2 Fourier Series 362

8 Algebraic and Transcendental Equations (numerical_techniques.sci) 363

8.1 Gauss–Seidel Method 363
8.2 Gaussian Elimination Method 364
8.3 'pivoting' Gaussian Elimination Method 365
8.4 Inverse of a Matrix 366
8.5 Determinant of a Matrix 367
8.6 Bisection Method 367
8.7 Regula Falsi Method 368
8.8 Secant Method 368
8.9 Newton–Raphson Method 369
