# Contents

*Preface* xvii

**Chapter 1. Origin of Electronics** 1
  1.1 What is Electronics 1
  1.2 Evolution of Electronics 2
    1.2.1 Revisiting the History 2
    1.2.2 Trends of Development 4
  1.3 Widespread Applications 5
  1.4 Electrons, Electricity and Electronics 6
    1.4.1 Electric Current 7
    1.4.2 Drift Velocity, Mobility and Conductivity 8
    1.4.3 Electron Emission from Metal 10
  1.5 Circuits and Sources 11
    1.5.1 Types of Circuits 11
    1.5.2 Voltage and Current Sources 12
  1.6 Active and Passive Device 14
  Multiple Choice-Type Questions and Answers 15
  Reasoning-Type Questions and Answers 16
  Solved Numerical Problems 16
  Exercise 18

**Chapter 2. Semiconductor Fundamentals** 20
  2.1 Crystalline Solids 20
    2.1.1 Lattice, Basis and Unit Cell 21
    2.1.2 Bravais Lattice and Miller Indices 22
  2.2 Energy Band 24
  2.3 Semiconductors 26
    2.3.1 Electron and Hole 27
    2.3.2 Intrinsic Semiconductor 29
    2.3.3 Doping and Extrinsic Semiconductor 30
    2.3.4 Doping in Compound Semiconductor 32
  2.4 Direct and Indirect Band Gap 32
  2.5 Effective Mass 33
## Contents

2.6 Fermi Level, Energy Band and Semiconductors 35
  2.6.1 Energy Band of n-type Semiconductors 38
  2.6.2 Energy Band of p-type Semiconductors 39
2.7 Equilibrium Carrier Concentrations 40
2.8 Drift and Diffusion of Carriers 43
  2.8.1 Drift Current Density 44
  2.8.2 Diffusion Current Density 45
  2.8.3 Semiconductor Current Density 45
  2.8.4 Einstein Relation 46
  2.8.5 Continuity Equation 47
2.9 Hall Effect 48
2.10 Resistivity and Four-Probe Technique 49
Multiple Choice-Type Questions and Answers 50
Reasoning-Type Questions and Answers 53
Solved Numerical Problems 55
Exercise 57
Project Work on Chapter 2 60

### Chapter 3. p–n Junction Diodes 61

3.1 Fabrication of p–n Junction 61
3.2 Barrier Formation in p–n Junction 62
  3.2.1 Built-in Potential 64
  3.2.2 Fermi Level in p–n Junction 65
  3.2.3 Energy Band Diagram of p–n Junction 66
3.3 Forward and Reverse Bias 67
  3.3.1 Unbiased Diode 68
  3.3.2 Forward Biased Diode 69
  3.3.3 Reverse Biased Diode 69
3.4 Diode Current–voltage Characteristics 70
  3.4.1 Static and Dynamic Resistance 72
  3.4.2 Cut-in Voltage 74
3.5 Junction Capacitances 74
  3.5.1 Depletion Capacitance 74
  3.5.2 Diffusion Capacitance 75
3.6 Zener Diode 76
  3.6.1 Zener Breakdown 76
  3.6.2 Avalanche Breakdown 77
  3.6.3 Zener Diode Characteristics 79
  3.6.4 Zener Voltage Regulator 80
3.7 Light-Emitting Diode (LED) 82
# Table of Contents

## Chapter 3. Photodiode and Solar Cell
- 3.8 Photodiode and Solar Cell 84
- 3.9 Metal–Semiconductor Contacts 86
- Multiple Choice-Type Questions and Answers 87
- Reasoning-Type Questions and Answers 91
- Solved Numerical Problems 92
- Exercise 95
- Project Work on Chapter 3 99

## Chapter 4. Diode Applications
- 4.1 Piecewise Linear Model 101
- 4.2 Load Line and Q-Point 102
- 4.3 Rectifiers 104
  - 4.3.1 Half-Wave Rectifier 105
  - 4.3.2 Full-Wave Rectifier 111
  - 4.3.3 Bridge Rectifier 114
- 4.4 Filters 117
  - 4.4.1 Capacitor Filter 117
  - 4.4.2 Inductor Filter 119
- 4.5 Clippers 120
  - 4.5.1 Shunt Clipper 120
  - 4.5.2 Series Clipper 120
- 4.6 Clamper 123
- 4.7 Voltage Multiplier 125
- Multiple Choice-Type Questions and Answers 127
- Reasoning-Type Questions and Answers 131
- Solved Numerical Problems 132
- Exercise 134
- Project Work on Chapter 4 138

## Chapter 5. Bipolar Junction Transistor (BJT)
- 5.1 Transistors: n–p–n and p–n–p 141
- 5.2 Transistor Operating Principle 142
- 5.3 Common-Emitter Configuration 143
  - 5.3.1 Current Amplification in Transistor 144
  - 5.3.2 Transistor Current Components 145
  - 5.3.3 Common-Emitter Output Characteristics 148
  - 5.3.4 Early Effect 150
  - 5.3.5 CE Input Characteristics 150
  - 5.3.6 CE Transfer Characteristics 150
- 5.4 Common-Base Characteristics 151
- 5.5 Common-Collector Configuration 153
Contents

Chapter 6. Transistor Biasing and Amplification 163
  6.1 Load Line and Q-Point 163
  6.2 Transistor Biasing and Stability 165
  6.3 Base Bias 167
  6.4 Emitter–Feedback Bias 169
  6.5 Collector–Feedback Bias 171
  6.6 Voltage-Divider Bias 172
  6.7 Load: DC and AC 175
  6.8 BJT Small Signal Voltage Amplifiers 177
    6.8.1 Common-Emitter (CE) Amplifier 178
    6.8.2 Common-Collector (CC) Amplifier 182
    6.8.3 Common-Base (CB) Amplifier 184
Multiple Choice-type Questions and Answers 186
Reasoning-Type Questions and Answers 188
Solved Numerical Problems 189
Exercise 194
Project Work on Chapter 6 197

Chapter 7. Network Theorems and Transistor 200
  7.1 Thevenin’s Theorem 200
  7.2 Norton’s Theorem 202
  7.3 Other Useful Theorems 203
  7.3.1 Superposition Theorem 203
  7.3.2 Maximum Power Transfer Theorem 204
  7.4 Two-Port Model and Hybrid Parameters 205
  7.4.1 Transistor as Two-port Network 207
  7.4.2 Significance of h Parameters 209
  7.5 Transistor Amplifier with h Parameters 211
  7.6 Simplified Hybrid Model 214
  7.7 r_s-Model and h-Model 215
  7.8 Transistor: Thevenin and Norton Equivalents 216
  7.9 Frequency Dependence of Gain 219
  7.10 Hybrid-II Model 221
  7.11 Transistor Gain at High Frequency 224
  7.12 Gain and Decibel 227
Chapter 8. Transistor Power and Multistage Amplifiers

8.1 Need for Power Amplification
8.2 Conditions for Power Amplification
8.3 Distortions due to Nonlinearity
  8.3.1 Amplitude Distortion
  8.3.2 Harmonic Distortion
  8.3.3 Intermodulation Distortion
8.4 Amplifier Classes
8.5 Class A Amplifier
  8.5.1 Bias for Voltage Amplifier
  8.5.2 Resistive Load Power Amplifier
  8.5.3 Transformer Coupled Amplifier
8.6 Class B Amplifier
8.7 Push–Pull Amplifier
  8.7.1 Class A Push–Pull Amplifier
  8.7.2 Class B Push–Pull Amplifier
  8.7.3 Crossover Distortion
  8.7.4 Class AB Amplifier
  8.7.5 Complementary Symmetry Amplifier
8.8 Class C Amplifier
8.9 Multistage Amplifiers
  Multiple Choice-Type Questions and Answers
  Reasoning-Type Questions and Answers
  Solved Numerical Problems
Exercise

Chapter 9. Field-Effect Transistor (FET)

9.1 'Field-Effect' and 'Transistor'
9.2 Junction Field-Effect Transistor (JFET)
  9.2.1 JFET Current–Voltage Characteristics
  9.2.2 JFET Transfer Characteristics
9.3 FET Parameters
9.4 FET versus BJT
9.5 MOSFET
  9.5.1 n-Channel Depletion-Type MOSFET
  9.5.2 n-Channel Enhancement-Type MOSFET
Table of Contents

9.6 FET Model 293
9.7 FET Biasing 294
  9.7.1 Self-Bias 294
  9.7.2 Drain-Feedback Bias 296
  9.7.3 Gate Bias 297
  9.7.4 Voltage-Divider Bias 298
9.8 FET Amplifiers 300
  9.8.1 Common-Source (CS) Amplifier 300
  9.8.2 Common-Drain (CD) Amplifier 301
  9.8.3 Common-Gate (CG) Amplifier 302
Multiple Choice-Type Questions and Answers 304
Reasoning-Type Questions and Answers 306
Solved Numerical Problems 307
Exercise 308
Project Work on Chapter 9 310

Chapter 10. Feedback Amplifiers and Oscillators 313
10.1 Concept of Feedback 313
10.2 Types of Feedback 316
  10.2.1 Voltage-series Feedback 317
  10.2.2 Voltage-shunt Feedback 318
  10.2.3 Current-series Feedback 319
  10.2.4 Current-shunt Feedback 320
10.3 Advantages of Negative Feedback 321
  10.3.1 Stability Improvement 322
  10.3.2 Impedance Improvement 322
  10.3.3 Bandwidth Enhancement 324
  10.3.4 Noise Reduction 326
  10.3.5 Reduction of Nonlinear Distortion 326
10.4 Oscillators 327
  10.4.1 Positive Feedback and Oscillation 328
  10.4.2 Resonant Circuit Oscillators 329
  10.4.3 Colpitts Oscillator 331
  10.4.4 Hartley Oscillator 332
  10.4.5 Wien Bridge Oscillator 333
  10.4.6 Phase-Shift Oscillator 338
  10.4.7 Crystal Oscillator 341
10.5 Multivibrators 345
  10.5.1 Astable Multivibrator 345
  10.5.2 Monostable Multivibrator 348
Table of Contents

Multiple Choice-Type Questions and Answers 350
Reasoning-Type Questions and Answers 352
Solved Numerical Problems 353
Exercise 357
Project Work on Chapter 10 359

Chapter 11. Operational Amplifier 362
  11.1 A Review on Amplifiers 362
  11.2 Features of Op-Amp 363
  11.3 Differential Amplifier 365
  11.4 Common Mode Rejection Ratio 368
  11.5 Diff-Amp to Op-Amp 369
  11.6 Offset Parameters 370
  11.7 Slew Rate 373
  11.8 Linear Op-Amp Circuits 374
    11.8.1 Inverting Amplifier 375
    11.8.2 Noninverting Amplifier 377
    11.8.3 Virtual Short and Virtual Ground 382
    11.8.4 Voltage Follower 383
    11.8.5 Op-Amp Adder (Inverting) 384
    11.8.6 Op-Amp Adder (Noninverting) 385
    11.8.7 Differential Amplifier 386
    11.8.8 Instrumentation Amplifier 388
    11.8.9 Passive and Active Filters 389
    11.8.10 Active Low-Pass Filter 392
    11.8.11 Active High-Pass Filter 394
    11.8.12 Active Band-Pass and Band-Stop Filters 395
  11.9 Nonlinear Op-Amp Circuits 396
    11.9.1 Integrator 396
    11.9.2 Differentiator 398
    11.9.3 Comparator 400
    11.9.4 Schmitt Trigger 401
    11.9.5 Logarithmic Amplifier 402
    11.9.6 Solving Algebraic Equation 403
    11.9.7 Solving Differential Equation 404
    11.9.8 Precision Rectifier 405
  11.10 Op-Amp Waveform Generators 406
    11.10.1 Square Wave Generator 406
    11.10.2 Triangular Wave Generator 407
    11.10.3 Sine Wave Generator 409
## Contents

**Multiple Choice-Type Questions and Answers** 409
**Reasoning-Type Questions and Answers** 414
**Solved Numerical Problems** 415
**Exercise** 422
**Projects on Chapter 11** 428

### Chapter 12. IC Technology and Instrumentation 432

12.1 Integrated Circuit (IC) 432
12.2 IC Classification 433
12.3 IC Fabrication 436
12.4 IC Components: Active and Passive 437
12.5 Regulated Power Supply 439
12.6 Cathode Ray Oscilloscope (CRO) 442
  12.6.1 Construction of CRO 444
  12.6.2 Working Principle 445
  12.6.3 Electrostatic Focusing 446
  12.6.4 Electrostatic Deflection 447
  12.6.5 Waveform Display 449
  12.6.6 Applications of CRO 451
12.7 Digital Storage Oscilloscope 454
**Multiple Choice-Type Questions and Answers** 456
**Reasoning-Type Questions and Answers** 457
**Solved Numerical/Analytic Problems** 458
**Exercise** 459

### Chapter 13. Digital Principles and Boolean Algebra 460

13.1 The Digital System 460
  13.1.1 Analog and Digital 460
  13.1.2 Pros and Cons of Digital System 461
13.2 Number Systems and Conversions 462
  13.2.1 Binary Numbers 463
  13.2.2 Binary to Decimal Conversion 464
  13.2.3 Decimal to Binary Conversion 464
  13.2.4 Octal Numbers 467
  13.2.5 Hexadecimal Numbers 469
13.3 Digital Codes 470
13.4 Binary Arithmetic 472
  13.4.1 1’s Complement and 2’s Complement 473
  13.4.2 Radix Complements 477
  13.4.3 Signed Binary Numbers 478
Chapter 13. Boolean Algebra

13.5 Boolean Algebra
  13.5.1 OR Operation
  13.5.2 AND Operation
  13.5.3 NOT Operation
  13.5.4 De Morgan’s Theorems

13.6 Boolean Simplification

13.7 Sum-of-Products and Product-of-Sums
  13.7.1 Sum-of-Products (SOP)
  13.7.2 Product-of-Sums (POS)

13.8 Karnaugh Map
  13.8.1 Don’t Care Conditions
  13.8.2 Simplification is not Unique
  13.8.3 SOP and POS are Equivalent

Multiple Choice-Type Questions and Answers
Reasoning-Type Questions and Answers
Solved Numerical and Logical Problems
Exercise
Projects on Chapter 13

Chapter 14. Combinational Logic Circuits

14.1 Boolean Algebra and Digital Electronics
  14.1.1 Combinational and Sequential Logic
  14.1.2 Positive and Negative Logic

14.2 Logic Gates
  14.2.1 OR Gate
  14.2.2 AND Gate
  14.2.3 NOT Gate
  14.2.4 NOR Gate (Universal Gate)
  14.2.5 NAND Gate (Universal Gate)
  14.2.6 Bubbled Gates
  14.2.7 Exclusive-OR (XOR) Gate
  14.2.8 Timing Diagram

14.3 Logic Families
  14.3.1 Transistor–Transistor Logic (TTL)
  14.3.2 MOS Logic

14.4 Arithmetic and Logic Circuits
  14.4.1 Half Adder
  14.4.2 Full Adder
  14.4.3 Half and Full Subtractors
  14.4.4 Adder–Subtractor
  14.4.5 Digital Comparators
Contents

14.5 Data Processing Circuits 533
  14.5.1 Multiplexer 533
  14.5.2 Demultiplexer 536
  14.5.3 Decoders 536
  14.5.4 Seven-Segment Display 537
  14.5.5 Encoders 540
  14.5.6 Parity Checker and Generator 541
Multiple Choice-Type Questions and Answers 542
Reasoning-Type Questions and Answers 546
Solved Logical Problems 547
Exercise 552
Project Work on Chapter 14 555

Chapter 15. Sequential Logic Circuits 557
  15.1 Clock and Timer 557
    15.1.1 Clock Parameters 558
    15.1.2 Working Principles of IC 555 559
    15.1.3 Astable Multivibrator with IC 555 560
    15.1.4 Monostable Multivibrator with IC 555 562
  15.2 Latch and Flip-Flop 563
    15.2.1 Bistable Multivibrator 564
    15.2.2 RS Flip-Flop with NOR Gates 565
    15.2.3 RS Flip-Flop with NAND Gates 567
    15.2.4 Clocked RS Flip-Flop 569
    15.2.5 D Flip-Flop 570
    15.2.6 JK Flip-Flop 571
    15.2.7 Racing and Propagation Delay 572
    15.2.8 Edge- and Pulse-Triggering 573
    15.2.9 JK Master–Slave Flip-Flop 575
    15.2.10 T Flip-Flop 577
  15.3 Flip-Flop Characterization 578
    15.3.1 Characteristic Equation 579
    15.3.2 State Diagram 579
    15.3.3 Preset and Clear 580
  15.4 Register 581
    15.4.1 Register with Series and Parallel Shifting 583
    15.4.2 Ring Counter 586
    15.4.3 Johnson Counter 587
    15.4.4 Register Applications 588
  15.5 Counters 588
    15.5.1 Asynchronous Counter 589
    15.5.2 Synchronous Counter 591
# Contents

15.6 Changing Counter Modulus 592
  15.6.1 Mod-3 Counter 593
  15.6.2 Mod-6 Counter 593
  15.6.3 Mod-5 Counter 594
  15.6.4 Decade (Mod-10) Counter 595
  15.6.5 Decade Counter using Preset-Clear 596
  15.6.6 Applications of the Counter 598

Multiple Choice-Type Questions and Answers 598
Reasoning-Type Questions and Answers 600
Solved Numerical Problems 602
Exercise 604

Chapter 16. Analog–Digital Conversion and Memory 609
16.1 Why D/A and A/D Conversions 609
16.2 Binary Equivalent Weight 610
16.3 Digital-to-Analog (D/A) Conversion 611
  16.3.1 Weighted Resistor D/A Converter 611
  16.3.2 R-2R ladder D/A Converter 614
  16.3.3 D/A Converter Performance 617
16.4 Analog-to-Digital (A/D) Conversion 618
  16.4.1 Flash A/D Converter 618
  16.4.2 Counter-Type A/D Converter 620
  16.4.3 Successive-Approximation A/D Converter 622
16.5 Memory 622
  16.5.1 Read-Only Memory (ROM) 625
  16.5.2 Random Access Memory (RAM) 627
  16.5.3 Memory Addressing 629
  16.5.4 Memory Read/Write 630

Reasoning-Type Questions and Answers 633
Solved Numerical Problems 633
Exercise 634
Project Work on Chapter 16 635

Chapter 17. Microcomputer and Microprocessor 637
17.1 Evolution of Computer 637
  17.1.1 Historical Background 637
  17.1.2 Modern Computer 639
17.2 Computer, Microprocessor and Microcontroller 641
  17.2.1 Computer Organization 641
  17.2.2 Use of Microprocessor 643
  17.2.3 Use of Microcontroller 644
Contents

17.3 Hardware and Software 646
  17.3.1 Operating System 646
  17.3.2 Computer Languages 648
17.4 Microprocessor 8085 650
  17.4.1 Pin Configuration 652
  17.4.2 Operational Code (Opcode) 653
17.5 8085 Programming 654
  17.6 Types of 8085 Instructions 655
17.6 Use of Subroutine 657
17.7 Arduino Programming 669
  17.8 Arduino Board 670
    17.8.1 Arduino IDE 670
    17.8.2 Pin Configuration 672
