

## Contents

<b>Preface</b>	<i>page xi</i>
<b>Overview</b>	1
<b>PART ONE BACKGROUND MATERIAL</b>	5
<b>1 Elements of Operator Theory</b>	7
1.1 Hilbert spaces, self-adjoint operators and the spectral theorem	8
1.2 Semibounded operators and forms, and the variational principle	29
1.3 Comments	64
<b>2 Elements of Sobolev Space Theory</b>	66
2.1 Weak derivatives	67
2.2 Sobolev spaces	85
2.3 Compact embeddings	96
2.4 Sobolev inequalities on the whole space	103
2.5 Friedrichs and Poincaré inequalities	112
2.6 Hardy inequalities	127
2.7 Homogeneous Sobolev spaces	142
2.8 The extension property	146
2.9 Comments	157
<b>PART TWO THE LAPLACE AND SCHRÖDINGER OPERATORS</b>	165
<b>3 The Laplacian on a Domain</b>	167
3.1 The Dirichlet and Neumann Laplacians	170
3.2 Weyl’s asymptotic formula for the Dirichlet Laplacian	179

viii	<i>Contents</i>		
	3.3	Weyl's asymptotic formula for the Neumann Laplacian	192
	3.4	Pólya's inequality for tiling domains	197
	3.5	Lower bounds for the eigenvalues of the Dirichlet Laplacian	199
	3.6	Upper bounds for the eigenvalues of the Neumann Laplacian	209
	3.7	Phase space interpretation	212
	3.8	Appendix: The Laplacian in spherical coordinates	219
	3.9	Comments	232
<b>4</b>		<b>The Schrödinger Operator</b>	<b>244</b>
	4.1	Definition of the Schrödinger operator	247
	4.2	Explicitly solvable examples	251
	4.3	Basic spectral properties of Schrödinger operators	265
	4.4	Weyl's asymptotic formula for Schrödinger operators	279
	4.5	The Cwikel–Lieb–Rozenblum inequality	282
	4.6	The Lieb–Thirring inequality	292
	4.7	Extending inequalities and asymptotics	298
	4.8	Reversed Lieb–Thirring inequality	303
	4.9	Comments	308
		<b>PART THREE SHARP CONSTANTS IN LIEB–THIRRING INEQUALITIES</b>	<b>319</b>
<b>5</b>		<b>Sharp Lieb–Thirring Inequalities</b>	<b>321</b>
	5.1	Basic facts about Lieb–Thirring constants	323
	5.2	Lieb–Thirring inequalities for special classes of potentials	335
	5.3	The sharp bound for $\gamma = \frac{1}{2}$ in one dimension	349
	5.4	The sharp bound for $\gamma = \frac{3}{2}$ in one dimension	353
	5.5	Trace formulas for one-dimensional Schrödinger operators	362
	5.6	Comments	380
<b>6</b>		<b>Sharp Lieb–Thirring Inequalities in Higher Dimensions</b>	<b>385</b>
	6.1	Schrödinger operators with matrix-valued potentials	388
	6.2	The Lieb–Thirring inequality with the semiclassical constant	395
	6.3	The sharp bound in the matrix-valued case for $\gamma = \frac{3}{2}$	400
	6.4	Trace formulas in the matrix case	411
	6.5	Comments	414
<b>7</b>		<b>More on Sharp Lieb–Thirring Inequalities</b>	<b>417</b>
	7.1	Monotonicity with respect to the semiclassical parameter	418
	7.2	Bounds for radial potentials	426

<i>Contents</i>		ix
7.3	More on the one-particle constants	434
7.4	The dual Lieb–Thirring inequality	436
7.5	Comments	448
<b>8</b>	<b>More on the Lieb–Thirring Constants</b>	<b>451</b>
8.1	More on Lieb–Thirring inequalities in the matrix-valued case	452
8.2	The sum of the square roots of the eigenvalues	456
8.3	The sum of the eigenvalues	457
8.4	Summary on constants in Lieb–Thirring inequalities	463
8.5	Comments	468
