Contents

Preface *page* ix
Acknowledgments xi

1 Mass Conservation and the Continuity Equation 1
1.1 Conservation in Fluid Mechanics 1
1.2 Conservation of Mass in One Dimension 4
1.3 The Continuity Equation 8
1.4 Discussion of the Continuity Equation 16
Problems 30

2 The Material Derivative: The First Step to the Navier–Stokes Equations 32
2.1 Lagrangrian and Eulerian Descriptions 33
2.2 The Advection and Inviscid Burgers' Equation 40
2.3 The Material Derivative and the Continuity Equation 51
2.4 The Material Derivative in the Navier–Stokes Equations 55
2.5 Take Home Points 57
Problems 58

3 Force Balance, the Stress Tensor, and the Navier–Stokes Equations 60
3.1 Forces on a Fluid and the Stress Tensor 60
3.2 General Force Balance: Cauchy's First Law of Motion 69
3.3 The Form of the Stress Tensor 71
3.4 The Navier–Stokes Equations ... Finally 80
3.5 Incompressible Flow 94
Problems 100

978-1-009-23615-7 — A Student's Guide to the Navier-Stokes Equations
Justin W. Garvin
Table of Contents
More Information

4 The Navier–Stokes Equations: Another Approach 102
4.1 Eulerian Approach to the Navier–Stokes Equations 102
4.2 Take a Breath: Let's Review So Far 108
4.3 Incompressible Equations in 2D Cartesian Coordinates 112
4.4 Boundary Conditions 114
4.5 Examples 116
Problems 122

5 The Energy Equation and a Discussion on Diffusion and Advection 124
5.1 Conservation of Energy 124
5.2 A Very Common Form of the Energy Equation 140
5.3 Initial Discussion of the Energy Equation 147
5.4 Full Governing Equations of Fluid Motion 153
5.5 Diffusion 155
5.6 Convection–Diffusion Equation: Combined Advection and Diffusion 162
5.7 The Boundary Layer 165
5.8 Boundary Conditions for the Energy Equation 173
5.9 Examples 174
Problems 180

6 Nondimensionalization and Scaling 182
6.1 The Idea Behind Nondimensionalization 182
6.2 The Basics of Scaling Analysis 183
6.3 Couette Flow Revisited with Nondimensionalization 189
6.4 Pressure-driven Flow with Nondimensionalization 194
6.5 Scaling the Incompressible Governing Equations 199
6.6 Incompressible Flow with a Compressible Fluid 205
6.7 Scaling to Obtain the Boundary Layer Equations 208
6.8 A Final Note 216
Problems 218

Further Reading 220
Index 221
