

GOVERNING MISINFORMATION IN EVERYDAY KNOWLEDGE COMMONS

Governing Misinformation in Everyday Knowledge Commons delves into the complex issue of misinformation in our daily lives. The book synthesizes three scholarly traditions – everyday life, misinformation, and governing knowledge commons – to present ten case studies of online and offline communities tackling diverse dilemmas regarding truth and information quality. The book highlights how communities manage issues of credibility, trust, and information quality continuously, to mitigate the impact of misinformation when possible. It also explores how social norms and intentional governance evolve to distinguish between problematic disinformation and little white lies. Through a coproduction of governance and (mis-)information, the book raises a set of ethical, economic, political, social, and technological questions that require systematic study and careful deliberation. This title is also available as Open Access on Cambridge Core.

Madelyn Rose Sanfilippo studies sociotechnical governance, broadly exploring privacy, inequality, and the political consequences of information technology. She has coedited *Governing Privacy in Knowledge Commons* (2021) and *Governing Smart Cities as Knowledge Commons* (2023), and coauthored three previous books: *Online Trolling and Its Perpetrators: Under the Cyberbridge* (2016), *Social Informatics Evolving* (2015), and *Multiculturalism and Information and Communication Technology* (2013).

Melissa G. Ocepek studies everyday information behavior, critical theory, copyright, and food studies. She has coauthored *Food in the Internet Age* (2013) and *Formal and Informal Approaches to Food Policy* (2014), and coedited *Deciding Where to Live: Information Studies on Where to Live in America* (2020).

CAMBRIDGE STUDIES ON GOVERNING KNOWLEDGE COMMONS

The mission of the series is to provide an authoritative space for high quality scholarship on the governance of knowledge commons. Following the path pioneered by Elinor Ostrom, recipient of the Nobel Prize in Economics for her work on institutional analysis of commons regimes in the natural environment, and the editors' work in *Governing Knowledge Commons*, this series uses a similar framework to systematically study knowledge commons in various sectors. Readers seeking more information on knowledge commons and this series can visit <http://knowledge-commons.net>, a repository for scholarship produced by an international, interdisciplinary group of knowledge commons researchers.

Acknowledgments

We are grateful to the Governing Knowledge Commons (GKC) Workshop and the Governing Knowledge Commons Research Coordination Network (NSF 2017495) for their support. We also thank the publishing team at Cambridge University Press – including Matt Gallaway and Jadyn Fauconier-Herry – for making this book possible, along with the thoughtful contributors to this book: Aparajita Bhandari, Jacquelyn Burkell, Gary Burnett, Brett M. Frischmann, Alexandria Johnson, Dominique Kelly, Kyung-Sun Kim, William Marks, Kate McDowell, Smita Katherine Nair, David Nemer, Rebecca Noone, Britt Paris, Irene Pasquetto, Joanna Sin Sei-Ching, Elizabeth Wickes, and Shannon Williams.

Melissa would like to personally thank all the amazing students and colleagues who have discussed this work with her and encouraged her throughout this process, especially Julia Burns Petrella and Yibo Wang. This has been one of the most meaningful, challenging, and personal projects I have worked on, and unfortunately it collided with a difficult time in my life. You would not be reading this without the support I received from my colleagues Karen Wickett, Elizabeth Wickes, Matt Turk, and Sara Benson. I want to thank the friends and family who have always been by my side: Tina “Shorty” Henderson, Nathan Ingersoll, and Adam Vandenbrink; my coparent Ava Briley, and my muse Sydney Lynn Briley. To my coeditor, friend, and fellow foodie, the always thoughtful, brilliant, and oh-so-stylish Madelyn Rose Sanfilippo, thank you for embarking on this project with me and keeping me afloat.

Madelyn would like to personally thank the many thoughtful people who gave feedback on this project, including: Jack Brighton, Pnina Fichman, Tomer Kenneth, Christopher Leug, Yafit Lev-Aretz, Michael Madison, Jodi Schneider, and Katherine J. Strandburg. Their commentary and participation in

workshopping chapters helped build our everyday misinformation knowledge commons. I also want to thank my family for their support and patience during this project, especially Joseph and Rose Sanfilippo. Finally, to my wonderful coeditor, Melissa G. Ocepek, thank you for being a considerate and creative collaborator as we brought this project to life. So many brilliant people helped to make this book possible.
