Library of Congress Cataloging-in-Publication Data
Names: Scott, Rod, editor. | Mahoney, J. Matthew, editor.
Title: A complex systems approach to epilepsy : concept, practice and therapy / edited by Rodney C. Scott, J. Matthew Mahoney.
Description: Cambridge ; New York, NY : Cambridge University Press, 2022. | Includes bibliographical references and index.
Identifiers: LCCN 2022024925 (print) | LCCN 2022024926 (ebook) | ISBN 9781009258081 (hardback) | ISBN 9781108582285 (epub)
Subjects: MESH: Epilepsy | Systems Analysis | Systems Biology
Classification: LCC RC372 (print) | LCC RC372 (ebook) | NLM WL 385 | DDC 616.85/3–dc23/eng/20220615
LC record available at https://lccn.loc.gov/2022024925
LC ebook record available at https://lccn.loc.gov/2022024926

ISBN 978-1-009-25808-1 Hardback

Cambridge University Press & Assessment has no responsibility for the persistence or accuracy of URLs for external or third-party internet websites referred to in this publication and does not guarantee that any content on such websites is, or will remain, accurate or appropriate.

Every effort has been made in preparing this book to provide accurate and up-to-date information that is in accord with accepted standards and practice at the time of publication. Although case histories are drawn from actual cases, every effort has been made to disguise the identities of the individuals involved. Nevertheless, the authors, editors, and publishers can make no warranties that the information contained herein is totally free from error, not least because clinical standards are constantly changing through research and regulation. The authors, editors, and publishers therefore disclaim all liability for direct or consequential damages resulting from the use of material contained in this book. Readers are strongly advised to pay careful attention to information provided by the manufacturer of any drugs or equipment that they plan to use.

More Information

Contents

List of Contributors vi

1 **Introduction** 1
Rod C. Scott and J. Matthew Mahoney

2 **Systems Biology Approaches to the Genetic Complexity of Epilepsy** 5
Jeffrey L. Brabec, Montana Kay Lara, Anna L. Tyler, and J. Matthew Mahoney

3 **Transcriptomic and Epigenomic Approaches for Epilepsy** 19
Anika Bongaarts, Jagoda Glowacka, Konrad Wojdan, Angelika Mühlebner, Eleonora Aronica, and James D. Mills

4 **Phenomenological Mesoscopic Models for Seizure Activity** 41
Maria Luisa Saggio and Viktor K. Jirsa

5 **Personalized Network Modeling in Epilepsy** 61
Yujiang Wang, Gabrielle Marie Schroeder, Nishant Sinha, and Peter Neal Taylor

6 **The Baseline and Epileptiform EEG: A Complex Systems Approach** 72
Giridhar P. Kalamangalam and Mircea I. Chelaru

7 **Neuronal Approaches to Epilepsy** 86
Aswin Chari, Rod C. Scott, and J. Matthew Mahoney

8 **Mapping Epileptic Networks with Scalp and Invasive EEG: Applications to Epileptogenic Zone Localization and Seizure Prediction** 99
Manel Vila-Vidal and Adrià Tauste Campo

9 **A Neuroimaging Network-Level Approach to Drug-Resistant Epilepsy** 127
Niels Alexander Foit, Fatemeh Fadaie, Andrea Bernasconi, and Neda Bernasconi

10 **Epilepsy as a Complex Network Disorder: Insights from Functional MRI** 135
David Carmichael, Rory J. Piper, and Fraser Aitken

Index 153
