Introduction	1
---------------------	----------

PART 1 PLANNING FOR SCIENCE **3**

1 Why do we teach science in primary school?	5
Introduction	6
Section 1: What is my worldview and why is that important?	6
Section 2: What is science and what is its role in the world today?	11
Section 3: What is primary science education and why is it important?	17
Section 4: What is the role of the Australian Curriculum in primary science education?	22
Conclusion	25
Bringing it Together	25
Further resources	25
References	26
2 What does the primary science curriculum include?	29
Introduction	30
Section 1: What are the overarching 'big ideas' in primary science education?	30
Section 2: What does the Australian Curriculum: Science recommend?	35
Section 3: What are the key science concepts and what is their developmental progression?	40
Section 4: What are students' typical alternative conceptions in science and how can these be addressed?	52
Conclusion	66
Bringing it Together	66
Further resources	67
References	67
3 How can students demonstrate their learning in science?	69
Introduction	70
Section 1: What is the role of the Australian Curriculum: Science in relation to assessment?	70
Section 2: When should student learning be monitored?	72
Section 3: How do I identify what students know in science and which assessment strategies should be used in which situations?	79
Conclusion	93
Bringing it Together	93

Further resources	94
References	94
4 How do I plan effective learning sequences in primary science?	96
Introduction	97
Section 1: What is considered to be 'best practice' when sequencing learning experiences in science?	97
Section 2: How do I plan science lessons?	105
Section 3: How do I plan science-focused units of work and lesson sequences?	112
Conclusion	113
Bringing it Together	114
Further resources	114
References	114
5 What is my role when teaching primary science?	116
Introduction	117
Section 1: Metaphorically speaking, what type of teacher am I?	117
Section 2: What do I want students to learn in science?	119
Section 3: What is my science teaching efficacy?	121
Section 4: What are some effective teaching strategies for different primary science concepts?	124
Conclusion	133
Bringing it Together	134
Further resources	134
References	135
PART 2 PRIMARY SCIENCE IN THE CLASSROOM	137
6 What are some examples of successful units of work for different years?	139
Introduction	140
Section 1: Early primary years	141
Section 2: Middle primary years	150
Section 3: Late primary years (City Country Alliance of Schools)	164
Conclusion	180
Acknowledgements	181
Bringing it Together	181
Further resources	181
References	182
7 How can I use technologies to support learning in primary science?	183
Introduction	184

Section 1: What is involved in Design and Technologies, Digital Technologies and Digital Literacy?	184
Section 2: How can Design and Technologies enrich my science teaching program?	189
Section 3: How can Digital Technologies enrich my science teaching program?	196
Conclusion	202
Bringing it Together	202
Further resources	202
References	203
8 How can I use other learning areas to support learning in primary science?	205
Introduction	206
Section 1: How can English support science learning?	207
Section 2: How can Mathematics support science learning?	212
Section 3: How can the Humanities and Social Sciences support science learning?	217
Section 4: How can the Arts support science learning?	220
Section 5: How can Health and Physical Education support science learning?	230
Conclusion	235
Bringing it Together	236
Further resources	236
Appendix: How can the General Capabilities be used to enhance science learning?	236
References	238
9 Which cross-curriculum priorities ‘fit’ with which science topics?	241
Introduction	242
Section 1: Aboriginal and Torres Strait Islander Histories and Cultures	242
Section 2: Asia and Australia’s Engagement with Asia	251
Section 3: Sustainability	261
Conclusion	268
Bringing it Together	269
Further resources	269
References	270
10 How can STEM education enable students’ understanding of science concepts?	273
Introduction	274
Section 1: What is STEM education and why is it considered to be a high priority for schools?	274
Section 2: Which aspects of primary science education work well with STEM units?	284
Section 3: What are some examples of effective STEM units with a science focus?	289
Conclusion	292
Bringing it Together	293
Further resources	293
References	294

11	What else do I need to know when teaching primary science?	297
	Introduction	298
	Section 1: Which resources do I <i>really need</i> for my classroom when teaching science?	298
	Section 2: How do I continue to build my pedagogical content knowledge in science?	306
	Section 3: How can I prepare my students for an unknown future using science education?	316
	Conclusion	321
	Bringing it Together	322
	Further resources	323
	References	323
