Foreword viii
Preface xi
Acknowledgments xii
How to Read This Book xiii

Part I Introduction

1 **EEG Basics** 1
 2 **Indications** 17
 3 **Real-Time Bedside EEG Reading** 24
 4 **Recognizing Artifacts and Medication Effects** 41
 5 **Epileptiform Discharges, Seizures, and Status Epilepticus** 71
 6 **Rhythmic and Periodic Patterns (RPPs) and the Ictal-Interictal Continuum (IIC)** 83
 7 **Post-Cardiac Arrest EEG** 99
 8 **Quantitative EEG (EEG Trend Analysis)** 109

Part II Case-Based Approach to Specific Conditions

9 **Nonconvulsive Status Epilepticus (NCSE)** 123
 10 **Management of the Ictal-Interictal Continuum (IIC)** 144
 11 **Seizures and Epileptiform Discharges** 160
 12 **Seizure Mimics** 169
 13 **Focal Lesions** 182
 14 **Encephalopathy** 191
 15 **Coma** 204

Appendix: Understanding EEG Reports 211
Index 222
