Allowed harmonics 92
Ampere law
  complex 115
  for B 14, 26
  for H 26
Amperian currents 24
Analytic function 109, 288
Area of current block 126
Associated Legendre functions
    58, 283

B H curve 28
B H product 215, 217
Bar magnet 211
Bedstead coil 106
Bent solenoid 190
Bessel functions 56, 279
Bilinear interpolation 249
Bilinear transformation 142
Biot-Savart law 6, 25
Boundary conditions
  current sheet 17
  regions with different μ 33
  scalar potential 51
  vector potential 44, 75
Boundary value problems 59
Boundary value problem examples
  conductor near iron sheet 251, 266
  cos(mθ) sheet in iron cavity (A) 85
  cos(mθ) sheet in iron cavity (V_m) 87
  line current in iron cavity 77
  permeable sphere in field 63
  rectangular conductor in slot 59

Cauchy integral formula 290
Cauchy-Riemann equations 288
Circular current loop 10, 165
Coercivity 30, 31, 162, 217
Complex conjugate coordinates 111, 287
Complex field 109
  image 132
Complex field examples
  annular block (on-axis) 131, 135
  block conductor 124
  circular arc 117
  cos(ϕ) sheet 120
  current sheet 116
  cylindrical block 126
  doublet 139
  line current 114
  magnetized body 139
  multipole 151
  rectangular block 129
  triangular block 140
Complex force 140
Complex multipoles 135
Complex potential 108
Complex potential examples
  current sheet 115
  dipole 151
  line current 113
  line current near iron corner 146
  multipole 150
  quadrupole 152
  straight sheet 115
Complex rotation 109
Conformal mapping 141, 159, 163, 291
  line current in iron cavity 142
  line current near iron corner 144
Constitutive relations 241
Continuity equation 2
Coulomb gauge 41
Coupling constants 260
Curie law 28
Curl operator 276
Current 2
Current sheet 3
Curvilinear coordinates 190

De Moivre formula 287
Derivatives (numerical) 246
Diamagnetism 27

More Information

Diffusion equation 236
Dirac delta function 13, 199
Dipole magnets
  C-dipole 158
  excitation 154
  H-dipole 157, 237
  symmetries 90, 263
  window frame 154
Dirichlet problem 59, 248
Displacement current 241
Divergence operator 275
Divergence theorem 276
Domains 28
Doublet 138

Easy axis 217
Eddy currents 235
Effective length 159
Electric field intensity (E) 230
Electric flux density (D) 240
Electric scalar potential 231
Electromotance 230
Elliptic integrals 293
End fields 105
Energy stored in magnetic field 20, 215, 232

Faraday's law 229
Ferromagnetism 28
Finite difference method 245
Finite element method 254
Finite element (triangular) 255
Flux linkage 19
Force
  between current loops 4
  between two parallel wires 8
  between solenoid and loop 189
  complex 140
  in terms of inductance 20
  magnetized body 50
  on charged particle 5
  on conductor 155
  on localized current 49
Frenet-Serret coordinates 191

Gauss' law for magnetism 11
Gradient field 161
Gradient operator 275
Green's function 68
Green's theorem 67
  complex 124

Harmonic functions 41
Helical wiggler fields 208
Helix 197
  relation to solenoid 204
Helmholtz coils 178
Helmholtz theorem 276
Hysteresis 30
  energy loss 235

Images method
  circular boundary 37, 79, 115, 144
  plane boundary 34, 133
Inductance
  coaxial solenoids 20
  ideal solenoid 19
  mutual 19, 170, 188
  self 19, 232
Integral equation method 68, 258
Integrated potentials 147
Intrinsic coercivity 30, 217
Inverse Helmholtz coils 180
Inverse problem 206, 267
Iron enhancement 36, 79, 86, 134

Langevin equation 28
Laplace equation 41, 53
  cylindrical coordinates 55
  polar coordinates 71
  rectangular coordinates 54
  spherical coordinates 57
Laplacian operator 247, 275
Laurent series 289
Legendre functions 283
Legendre polynomials 177, 284
Lenz's law 229
Linear materials 27
Lines of induction 3, 63, 66

Magnetic charges 53, 213
Magnetic circuit 31
  C-shaped electromagnet 32
  with permanent magnets 214
Magnetic field
  block 93, 124
  circulation 13, 26
  complex 109
  current sheet 80, 116
  divergence 11
  flux density (B) 3
  harmonic expansion 72
  intensity (H) 26
  radial expansion 170
Magnetic field from conductors
  annular sector 97, 131
  circular loop 10, 168
  circular arc sheet 118
  cos(ϕ) sheet 121
  cylindrical block 14, 126
  dipole 33, 154, 158
  finite plane sheet 115
  helix 202
  Helmholtz coils 178
  ideal multipole sheet 84
  infinite plane sheet 8
  line current 7, 114

Maxwell tricoil 181
overlapping circular 95
pair of loops 178
parallel current sheets 82
quadrupole 90, 161
rectangular block 97, 129
solenoid 15, 182, 189
toroid 31, 194
Magnetic field from image currents
annular sector in iron cavity 135
block in circular iron 135
cos(ϕ) sheet in iron cavity 134
line current 132
line current in plane boundary 35, 133
sheet in circular boundary 134
Magnetic field from magnetized bodies
bar magnet 212
dipole moment 47
doublet 139
magnetized block 25, 104, 139, 264
permeable sphere 66
rare earth materials 218, 221, 224
triangular block 140
Magnetic flux 3, 40
Magnetic measurements 241
Magnetic moment 6, 47
Magnetic needle 213
Magnetic units 274
Magnetization 23
Maxwell's equations 241
complex 112
Meissner effect 104
Modified Bessel functions 202, 208, 281
Multipole field components
annular sector 99, 137
approximations 90, 153
complex 137
dependence on current distribution 88
dimensionless coefficients 75, 271
errors 91, 93, 106, 138
inside magnet aperture 74
normal 89
rare earth materials 221
rotating coil 243
skew 89
symmetries 89, 93
trapezoidal block 226

Neumann problem 59, 248
Non-allowed harmonics 93

Ohm's law 236
Optimization
matching solenoid channels 268
minimizing higher multipoles 270
Orthogonal equipotentials 111

Paramagnetism 28
Periodic axial fields 209
Permanent magnet
assemblies 224
circuit excitation 214
materials 216
rare earth model 217
Permeability 4, 27, 29, 31, 162
Permittivity 240
Persistent currents 105
Perturbations 153
Planar wiggler fields 204
Poisson equation 41, 255
energy functional 255
POISSON program
algorithm 265
conductor near iron shield 266
permanent magnet 216
quadrupole 161
sample input file 267
solenoid 190
window frame dipole 156
Poles (complex) 288, 291
Potential
complex 108
scalar 51
vector 39

Quadrupole magnets
circular 161
excitation 160
hyperbolic 152
multipole 152
permanent magnet assembly 227

Racetrack coil 106
Radial axial field expansion 170
Refraction at current sheet 18
Reluctance 31, 215
Reluctivity 218
Remanence 30, 217
Residual 250
Residue 290
Residue theorem 291
Resistivity 30, 161
Rotating coil measurements 242
Rowland ring 32

Saddle coil 106
Saturation
cause 29
effects 31, 86, 155, 157, 162, 237
modelling 251, 258, 263
Scalar potential 51
Scalar potential examples
cos(mθ) sheet in circular cavity 87
dipole 151
