| | |
|--|------|
| <i>Preface</i> | xi |
| <i>Introduction</i> | xiii |
| 1 The 1953 Great Flood | 1 |
| 1.1 The Night of January 31, 1953 | 1 |
| 1.2 The Delta Works | 4 |
| 1.3 Inside the Delta Plan | 7 |
| 1.4 Lessons Learned | 11 |
| 2 The Space Shuttle Challenger Disaster | 13 |
| 2.1 The Morning of January 28, 1986 | 13 |
| 2.2 The Rogers Commission | 14 |
| 2.3 A Statistical Analysis of O-Ring Failure Data | 17 |
| 2.4 The Aftermath | 21 |
| 2.5 Lessons Learned | 23 |
| 3 The 2007–2008 Financial Crisis | 24 |
| 3.1 Introduction | 24 |
| 3.2 A Timeline of the Crisis | 25 |
| 3.3 How Did we Get There? | 29 |
| 3.4 The House of Cards Comes Tumbling Down | 33 |
| 3.5 Blame the Mathematicians | 37 |
| 3.6 Early Warnings | 39 |
| 3.7 Lessons Learned | 42 |
| 4 Earthquakes and Tsunamis | 43 |
| 4.1 Measuring the Magnitude of an Earthquake | 43 |
| 4.2 The 2004 Boxing Day Tsunami | 45 |
| 4.3 The 2011 Tōhoku Earthquake and Tsunami | 49 |
| 4.4 The Hunga Tonga – Hunga Ha’apai Volcanic Eruption | 53 |
| 4.5 Lessons Learned | 55 |
| 5 The L’Aquila Trial and the Public Communication of Risk | 57 |
| 5.1 The L’Aquila Earthquake | 57 |
| 5.2 Some International Reactions | 60 |
| 5.3 Galileo’s Dialogue | 61 |
| 5.4 Science Communication | 63 |

| | | |
|----------|---|------------|
| viii | <i>Contents</i> | |
| 5.5 | Epilogue | 65 |
| 5.6 | Lessons Learned | 66 |
| 6 | The Coronavirus Pandemic | 67 |
| 6.1 | The Early Days | 67 |
| 6.2 | Other Pandemics | 70 |
| 6.3 | Exponential Growth | 71 |
| 6.4 | The Precautionary Principle | 74 |
| 6.5 | Early Warnings | 76 |
| 6.6 | Large Numbers and Units of Measurement | 78 |
| 6.7 | Lessons Learned | 80 |
| 7 | Mathematical Wonderland | 82 |
| 7.1 | From Pythagoras and Fermat to Wiles | 82 |
| 7.2 | Probability Becomes a Mathematical Discipline | 86 |
| 7.3 | God Does Not Throw Dice | 90 |
| 7.4 | The Language of Nature | 91 |
| 7.5 | Epilogue: The Most Beautiful Equation of Mathematics | 92 |
| 8 | Stochastic Modeling | 94 |
| 8.1 | From Randomness to Probability Spaces | 95 |
| 8.1.1 | Chevalier de Méré Paradox | 98 |
| 8.1.2 | Mathematical Correctness versus Intuition | 100 |
| 8.1.3 | The Problem of Points | 103 |
| 8.1.4 | Conditional Probabilities | 105 |
| 8.1.5 | Statistical Literacy | 117 |
| 8.2 | From Probability Spaces to Random Variables | 118 |
| 8.3 | From Random Variables to Distribution Functions | 121 |
| 8.3.1 | The Concept and Its Properties | 121 |
| 8.3.2 | From Distribution Functions to Probability Mass Functions and Densities | 131 |
| 8.3.3 | From Distribution Functions to Conditional Distribution Functions | 159 |
| 8.4 | From Distribution Functions to Summary Statistics | 163 |
| 8.4.1 | Mean and Variance | 163 |
| 8.4.2 | An Example from Financial Regulation: Value-at-Risk | 167 |
| 8.4.3 | The Concept of Quantile Functions | 169 |
| 8.4.4 | Quantile–Quantile Plots | 177 |
| 8.4.5 | From Value-at-Risk to Expected Shortfall | 181 |
| 8.5 | From Quantile Functions to Sampling | 184 |
| 8.6 | From Sampling to Limit Theorems and Beyond | 194 |
| 8.6.1 | The Strong Law of Large Numbers | 195 |
| 8.6.2 | The Central Limit Theorem | 199 |
| 8.6.3 | Confidence Intervals | 205 |
| 8.7 | Lessons Learned | 217 |
| 9 | The Modeling of Extreme Events | 219 |
| 9.1 | Heraclitus of Ephesus | 219 |
| 9.2 | Some Early History | 221 |
| 9.3 | A Stochastic Theory of Extremes | 224 |

Contents

ix

| | | |
|-----------|--|------------|
| 9.3.1 | The Block Maxima Theorem | 224 |
| 9.3.2 | The Block Maxima Method | 235 |
| 9.4 | Analyzing Extremes through Exceedances | 239 |
| 9.4.1 | The Peaks over Threshold Method and the Corresponding Theorem | 239 |
| 9.4.2 | The Peaks over Threshold Tail and Quantile Estimators | 242 |
| 9.4.3 | Threshold Choice | 244 |
| 9.4.4 | BMM versus POTM | 246 |
| 9.4.5 | An Historical Comment on Value-at-Risk (VaR) | 247 |
| 9.5 | EVT at Work | 248 |
| 9.5.1 | On Data | 248 |
| 9.5.2 | Dutch Sea-Level Data | 250 |
| 9.5.3 | On the Interpretation of Return Periods and Related Communication | 262 |
| 9.5.4 | Netflix Data | 265 |
| 9.6 | A Basic Model for Earthquakes | 271 |
| 9.6.1 | Typical Features of Earthquake Shock Data | 273 |
| 9.6.2 | About the Data | 274 |
| 9.6.3 | The ETAS Model | 277 |
| 9.7 | Records | 282 |
| 9.8 | The Sinking of the MV Derbyshire | 287 |
| 9.9 | Lessons Learned | 291 |
| 10 | On Climate Change and Related Risk | 292 |
| 10.1 | From IPCC to COP26 | 292 |
| 10.2 | Mean Temperature Anomaly | 295 |
| 10.2.1 | About the Data | 296 |
| 10.2.2 | Fitting an AR(1) Process | 298 |
| 10.2.3 | Prediction | 299 |
| 10.3 | Alpine Glaciers | 300 |
| 10.3.1 | About the Data | 301 |
| 10.3.2 | Annual Mean Temperature and Glacier Length | 302 |
| 10.4 | Measuring Wine Barrels and Harvesting Grapes | 305 |
| 10.4.1 | Johannes Kepler and the Volume of a Wine Barrel | 305 |
| 10.4.2 | Harvesting Time and Risks to Viticulture | 310 |
| 10.4.3 | About the Data | 311 |
| 10.4.4 | Climate Change and the Quality of Wine | 312 |
| 10.5 | Lessons Learned | 315 |
| 11 | Further Examples from the World of Extremes | 316 |
| 11.1 | Longevity | 316 |
| 11.2 | From Katrina to Ida | 322 |
| 11.3 | Lessons Learned | 325 |
| 12 | Networks | 326 |
| 12.1 | A Small World | 326 |
| 12.2 | A Walk Through Königsberg | 329 |
| 12.3 | On Email, WWW and Social Networks | 331 |
| 12.4 | Coincidences | 334 |
| 12.5 | Lessons Learned | 335 |

| | | |
|-----------|---|-----|
| 13 | The Black Tulip and February 3, 1637 | 337 |
| 13.1 | On Alexandre Dumas and Johan de Witt | 337 |
| 13.2 | Lessons Learned | 343 |
| | <i>A Note About the References</i> | 345 |
| | <i>References</i> | 346 |
| | <i>Index</i> | 357 |
