<i>Acknowledgments</i>	<i>xxv</i>
<b>1 Introduction to the Cognitive Neuroscience of Aging</b>	<b>1</b>
Learning Objectives	1
1.1 Introduction	1
1.2 Theories of Cognitive Aging	2
1.3 Cognitive Neuroscience of Aging Theories	4
1.3.1 Increased Activity and Compensation with Age	4
1.3.2 Changing Neural Responses to Task Demands	6
1.3.3 Reduced Specificity of Neural Responses with Age	8
1.4 Cognitive Neuroscience Methods	9
1.4.1 Measures of Structural Integrity of the Brain	9
1.4.2 Measures of Brain Function	10
1.5 Variations and Combinations of Approaches	13
1.5.1 Structure–Behavior Relationships	14
1.5.2 Structure–Function Relationships	15
1.5.3 Resting-State fMRI (rs-fMRI)	16
1.6 Recent Methodological Advances	17
1.6.1 Multivariate Analysis Methods	17
1.6.2 Beta-Amyloid (Aβ) and Tau	17
1.6.3 Neurotransmitters	18
1.6.4 Optical Brain Imaging	18
1.6.5 Future Directions	19
1.7 Introduction to the Rest of the Book	19
Chapter Summary	21
Discussion Questions	21
For Further Reading	21
Key Terms	22
<b>2 Brain Mechanisms of Aging</b>	<b>23</b>
Learning Objectives	23
2.1 Introduction	23
2.2 Structural Changes in the Brain: Gray Matter	24
2.2.1 Relationships between Gray Matter and Behavior	29
2.3 Structural Changes in the Brain: White Matter	32

vi	Contents
2.3.1 Relationships between White Matter and Behavior	34
2.4 Connectivity	35
2.5 Default Mode Network	38
2.6 Perception and Sensation	40
2.7 Neurotransmitters	42
2.8 Individual Differences	43
2.8.1 Genes	44
2.8.2 Intelligence	44
2.8.3 Cognitive Reserve	46
2.8.4 Bilingualism	47
2.8.5 Personality	49
2.8.6 Stress	50
2.8.7 Summary	51
Chapter Summary	52
Discussion Questions	52
For Further Reading	53
Key Terms	53
<b>3 Cognition and Aging</b>	<b>55</b>
Learning Objectives	55
3.1 Introduction	55
3.2 Attention	56
3.3 Executive Function	60
3.3.1 Proactive and Reactive Cognitive Control	67
3.4 Motor Control	68
3.5 Language	71
3.5.1 Language and Hearing Loss	75
3.6 Training Cognitive Ability	76
3.6.1 Physical Activity	76
3.6.2 Meditation and Mindfulness	79
3.6.3 Cognitive Interventions	81
3.6.4 Working Memory Training	83
3.6.5 Long-Term Memory Training	84
Chapter Summary	86
Discussion Questions	87
For Further Reading	87
Key Terms	88
<b>4 Memory and Aging</b>	<b>89</b>
Learning Objectives	89
4.1 Introduction	89
4.2 Working Memory	90
4.2.1 Refreshing	93

<b>Contents</b>	<b>vii</b>
4.2.2 Inhibition in Working Memory	94
4.3 Explicit Long-Term Memory	95
4.3.1 Levels of Processing and Intentionality	96
4.3.2 Subsequent Memory	98
4.3.3 Recollection	100
4.3.4 Source Memory	102
4.3.5 Associative Memory and Binding	106
4.3.6 Semantic Memory	107
4.3.7 False Memory	108
4.3.8 Autobiographical Memory	111
4.3.9 Memory and Future Thinking	114
4.3.10 Reactivation	115
4.3.11 Controlled Processes in Long-Term Memory	116
4.3.12 Pattern Separation	118
4.4 Prospective Memory	118
4.5 Implicit Long-Term Memory	119
Chapter Summary	122
Discussion Questions	122
For Further Reading	123
Key Terms	123
<b>5 Emotion, Decision Making, and Aging</b>	<b>125</b>
Learning Objectives	125
5.1 Introduction	125
5.2 Neural Regions Involved in Emotion	126
5.3 Emotion Identification	128
5.4 Emotion Regulation	130
5.4.1 Life Satisfaction and Neural Activity with Age	136
5.5 Socioemotional Selectivity Theory and Age	136
5.6 Emotion and Memory	140
5.6.1 fMRI Research	140
5.6.2 ERP Research	145
5.7 Decision Making and Reward	147
5.7.1 Reward and Economic Tasks	148
5.7.2 Gambling Tasks	152
5.7.3 Economic Decision Making in a Social Context	154
5.7.4 Future Directions in Motivation	155
Chapter Summary	156
Discussion Questions	157
For Further Reading	157
Key Terms	158

viii	Contents
<b>6 Social Cognition and Aging</b>	<b>159</b>
Learning Objectives	159
6.1 Introduction	159
6.2 Self-Focused Processes	160
6.3 Self-Referencing and Memory	163
6.4 Own-Age Bias	167
6.5 Stereotype Threat and Stigma	169
6.6 Moral Judgments	171
6.7 Empathy and Theory of Mind	172
6.8 Social Interactions and Impressions of Others	175
6.9 Impression Formation and Memory	178
6.10 Trust	180
6.11 Conclusions	183
Chapter Summary	185
Discussion Questions	185
For Further Reading	186
Key Terms	186
<b>7 Alzheimer’s Disease and Other Disorders with Age</b>	<b>187</b>
Learning Objectives	187
7.1 Introduction	187
7.2 AD	188
7.2.1 Structural Changes in AD and aMCI	190
7.2.2 Functional Changes in AD and aMCI Related to Memory and Cognition	193
7.2.3 Functional Changes in AD and aMCI Related to Attention	195
7.2.4 Functional Changes in AD and aMCI Related to Self and Emotion	196
7.2.5 Summary of Functional Changes in AD and aMCI	198
7.2.6 Amyloid and Tau Imaging	199
7.2.7 Genes	202
7.2.8 Concluding Thoughts on AD	204
7.3 Other Age-Related Neurodegenerative Diseases	205
7.4 Social Cognition across Neurodegenerative Disorders	208
7.5 Depression	211
Chapter Summary	213
Discussion Questions	214
For Further Reading	214
Key Terms	214

<b>Contents</b>	<b>ix</b>
<b>8 Current and Future Directions</b>	<b>216</b>
Learning Objectives	216
8.1 Introduction	216
8.2 Individual Difference Factors Related to Identity	216
8.2.1 Race	217
8.2.2 Culture	221
8.2.3 Sex Differences	223
8.3 Neuromodulation	225
8.3.1 Overview	225
8.3.2 Noninvasive Brain Stimulation and Aging	228
8.3.3 Noninvasive Brain Stimulation and Age-Related Disorders	230
8.3.4 Other Approaches to Neuromodulation	231
8.4 Emerging Directions	233
8.4.1 Studying Aging across the Life Span	233
8.4.2 Intersection of Physical Health with Cognition	234
8.4.3 Exploring the Distinction of Socioemotional and Cognitive Domains	236
8.4.4 Contribution of Context to Aging	237
Chapter Summary	239
Discussion Questions	239
For Further Reading	240
Key Terms	240
